

JACKMAN NEAR DEATH AS AUTO HITS CURB AND BRINGS DOWN PHONE POLE

A heavy telephone pole, jerked over in an auto crash, was caught on a guy wire just as it was about to drop down on S. J. Jackman's head. A step on the phone pole caught on a guy wire. Just that and nothing more is all that saved the life of Jackman, who happened to be under the pole for the reason that his automobile had smashed into the curb and had struck a guy wire that jerked the pole toward him.

Jackman's smash-up occurred at the corner of North Broadway and West Washington, about 4:30 o'clock yesterday afternoon. While his automobile was badly damaged, Jackman was not thrown out of his seat. He was still holding tight to the steering gear when the machine came to a stop, with the telephone pole poised in the air above it.

Second Close Call
That was Jackman's second journey into close quarters with serious possibilities. Some three or four years ago an automobile he was driving ran into the corner doors of the First National Bank.

"I did this time just as I did when I ran into the First National Bank," said Jackman in telling of his experience yesterday. "I simply sat still, and waited for the finish."

Jackman declares that L. J. Carden cut a corner and caused him to run into the curb.

Jog at Crossing
Just previous to the accident, Carden alone in one automobile and Jackman alone in another were driving north on Broadway. Carden was in front. It was his intention to turn to his left and go west on Washington. At this intersection Washington avenue has a jog, the west portion of the crossing being about fifty feet further north than the east portion.

At a point near the entrance of Washington avenue on his right, Carden began to swing over toward the opening of Washington avenue on his left.

Jackman states that in that manner he was forced to swing over toward the west curb (his left) of Broadway. At the southwest corner of Broadway and Washington is an electric light pole of formidable proportions.

Tries to Stop
Jackman, who is able to use but one leg in driving his car, has an arrangement of his automobile foot-plates whereby one shove down of his left throws off the clutch and throws on the brake at the same time.

At first, Jackman says it appeared to him that he was going to hit the electric light pole, off his left. He shoved down, threw off his clutch and threw on his brake. Then he saw he was going to miss the pole, and he thought he would turn to his left on to Washington avenue and get on to that street ahead of Carden and avoid being struck by Carden, who was then to Jackman's right. Jackman says he threw on his power to get ahead of Carden, and he tried to turn off to his left. Jackman's speed, however, was such that he could not make the turn.

His machine ran up the curb on the north side of Washington, just west of the Broadway intersection.

Pole Is Held Up
Two guy wires reached from that parking upward. One was attached to a telephone pole, which was almost completely rotted off, and the other to a higher pole beyond and to the west of the telephone pole.

Jackman's machine struck the guy wire of the telephone pole, and it started to fall. It was a 20-foot pole, probably a foot in diameter. One of the iron steps in the pole hooked on to the other guy wire, and brought the pole to a stop just before it reached the glass windshield.

Carden's and Jackman's machines did not touch each other. Carden brought his machine to a stop near the center of Broadway, with most or all of his machine to the west of the center of Broadway, with the front of it about seventeen feet directly east of the electric light pole that Jackman missed by several feet.

Auto Is Damaged
It is the contention of those who take the view that Carden is not wholly responsible that Jackman had room to keep on Broadway, and that Jackman ought to have been able to stop his machine, if he was going north on Broadway no faster than Carden.

Jackman says Carden cut a corner, and forced the accident. The jog in the street may bring up a point as to where the center of the intersection really is.

The two right wheels on Jackman's machine were smashed, the axles sprung and some damage was done to fenders and other portions of the car.

**SACRAMENTO JITNEYS
CEASE OPERATIONS**

SACRAMENTO, July 15.—Drastic jitney bus legislation caused every jitney bus in the city to cease operations this morning.

The drivers are to seek an injunction against the law.

HARFORD T. MARSHALL (left), a prominent New York lawyer, who was counsel for "Bridgie" Webber (right), one of the chief witnesses against former Police Lieutenant Charles Becker, sentenced to electrocution in the week ending July 26, at Sing Sing, declares that Webber admitted to him he had committed perjury in the testimony he gave against the policeman. Mr. Marshall has kept silent for two years, but on the eve of the execution of the policeman he has spoken.

COL. ROOSEVELT TO BE AT SAN DIEGO'S FAIR JULY 26-27

SAN DIEGO, July 15.—Colonel Theodore Roosevelt will be the honored guest of San Diego Exposition July 26 and 27 and has consented to deliver an address on the afternoon of Tuesday, July 27, which has been designated Roosevelt Day at the exposition.

To meet the Colonel's wishes with regard to dinner engagements, the exposition has curtailed such to one informal dinner, that on the evening of July 27 at the Cafe Cristobal on the exposition grounds. Mrs. Roosevelt will accompany Colonel Roosevelt and it is hoped they will accept the favor of a reception in their honor by the official women's board of the exposition.

It is probable that Roosevelt will be joined at the exposition by Hiram Johnson, governor of California, Roosevelt's running mate in the last presidential campaign. President Davidson has forwarded Governor Johnson an urgent invitation to come.

Exposition visitors will have the opportunity of seeing and hearing Colonel William Jennings Bryan, late secretary of state, who will arrive in San Diego July 16 and has accepted an invitation by the exposition to deliver an address at the grounds July 17.

LEAPS FROM AUTO BUS TO BACK OF RUNAWAY

NEW YORK, July 15.—A leap from a speeding jitney bus to the back of a galloping horse by Patrolman Isadore Propper, stopped a runaway on Fifth avenue.

The horse, drawing the cab of Michael McDermott, of 29 West Seventh street, became frightened at Fifth street and dashed up Fifth avenue.

At Fifty-seventh street, Patrolman Propper and Edward Weisner attempted to stop the animal. They failed.

A passing bus picked them up and the pursuit was started. At Fifty-ninth street Weisner was thrown from the car and lacerated. Then Propper made his jump and stopped the horse.

GRAIN DUST EXPLOSION INJURES 5 WORKMEN

NEW YORK, July 15.—A dust explosion in a New York Central grain elevator at Weehawken injured five workmen under falling wains.

STREET CAR MEN IN CHICAGO WON OUT

CHICAGO, July 15.—It is learned today that the arbitration of the recent street car strike resulted in a complete victory for the platform men. The arbitration awards, to be announced tomorrow, give the men their maximum demands, higher pay and shorter hours.

GIRL LEAPS THREE STORIES TO ESCAPE MIDNIGHT PROWLER

LOS ANGELES, July 15.—Some unidentified man last night attacked Bernice Lorenzo, aged 22, in her bedroom and to escape him she leaped three stories to the sidewalk. She may die. E. C. Lierly has been arrested on suspicion.

JITNEY BUSS OWNERS PLAN NATION UNION

LOS ANGELES, July 15.—Jitney bus owners today formed a brotherhood of motorbus owners and operators and announce they will join the American Federation of Labor.

The plan is to form an American and Canadian international union, pool the funds, and oppose anti-jitney legislation everywhere.

**RUSHING THE GROWLER
NOW COMES UNDER
BAN IN BAKERSFIELD**
BAKERSFIELD, July 15.—Local police today banned the practice of "rushing the growler." The cops will closely watch all pedestrians carrying pitchers or suspicious looking cans and all beer "growlers" will be confiscated.

BLIND FINGERS KISS LIBERTY BELL WITH LOVE AND REVERENCE

PORTLAND, July 15.—In addition to the usual patriotic demonstrations on the arrival of the Liberty Bell here today, a number of blind people were allowed to caress the bell with their fingers. The historic old relic resumed its journey at noon.

NO BARE KNEES FOR CONEY ISLAND'S EYES

NEW YORK, July 15.—Coney Island police today placed a ban on immodest bathing suits. Bathing socks exposing bare knees are prohibited. Censors have been established to inspect all bathing costumes and order objectionables off the beach.

JOHN D. SPURNS IDEA OF GUARD; IS FEEBLE

CLEVELAND, July 15.—John D. Rockefeller arrived here from his country home at Tarrytown today and motored out to Forest Hills. The aged financier had a healthy coat of tan, but looked feeble. He arrived here without guards, despite the reported threats to assassinate him.

THE CITRUS MARKET

NEW YORK, July 15.—Nine cars oranges, four lemons sold. Averages—Oranges, \$2.01 to \$4.19. Highest—Glendora Heights, extra fancy, \$5.05. Weather, fair; temperature, 78 degrees.

THAW IS INSANE SAYS EVELYN; LIQUOR WILL DRIVE HIM VIOLENT

HIGH FINANCING ATTEMPT- ING TO SAVE HARRY K. THAW

Estimated cost to the Thaw family in the first two trials for the murder of Stanford White, \$1,000,000.
Cost of trials to taxpayers, \$350,000.
Cost to family, three later attempts to prove sanity, \$125,000.
Cost to family to escape Matteawan, \$50,000.
Cost to family of conspiracy and present sanity trial, \$200,000.
Cost to taxpayers of last two trials, \$75,000.
Total, \$1,800,000.
Total cost to family, \$1,375,000; total cost to taxpayers, \$425,000.

OTHER HIGH STAKES IN THAW'S CAREER

Allowed \$80,000 a year before reaching majority.
Spent \$50,000 in a single dinner to stage beauties in Paris.
Lost \$40,000 in one poker game in Pittsburgh in 1909.

NEW YORK, July 15.—Justice Hendricks this morning refused to make public his decision as to Harry Thaw's application to be released on bail.

The lawyers connected with the case were told that decision would be announced tomorrow. Meanwhile Thaw remains in the Ludlow street jail.

Thaw this morning told his friends he could easily furnish bail to the sum of \$40,000, if necessary.

MALONE, N. Y., July 15.—When Evelyn Thaw was informed today of the decision of the Thaw insanity jury, she promptly expressed her disagreement with its findings, and declared her belief that her husband is a lunatic.

She declared that if Thaw was set free she would leave at once for San Francisco and assume the management of a portion of the amusement zone.

Discussing Harry's condition, she said: "The first taste of liquor that passes his lips will drive him violently crazy."

CARRANZA PLANS CAMPAIGN TO GAIN YANKEE RECOGNITION

DOUGLAS, Ariz., July 15.—Thirty-five hundred Carranzaists have launched a campaign to conquer Sonora. They have defeated the Villalistas between Naco and Agua Prieta and occupied Anavavaci, a mountain pass, thus severing the Villalistas.

General Calles, commanding the Carranzaists, announces he will dominate Sonora within a month and give Americans their rights.

It is believed Carranza is vigorously campaigning there to improve the chances of American recognition.

TRANS-OCEAN TYPE SUBMARINE NEXT

WASHINGTON, July 15.—The navy department today denied that C-3 now under construction at Bridgeport is of an unusual type, that it has a 5500 miles cruising radius, or that it is oil propelled.

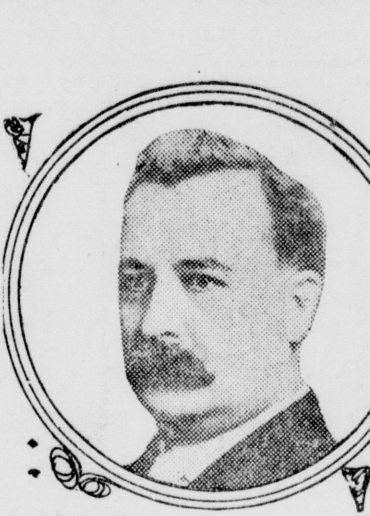

They say the vessel is of the old class used in the harbor and coast service. The department admitted that a trans-ocean submarine is a possibility and new vessels may be of this class.

VISIT EXPOSITION
SAN DIEGO, July 15.—Delegates to the Elks Grand Lodge Reunion came here from Los Angeles on special trains today to visit the Panama-California Exposition.

WOMAN HURT WHEN RACE CAR OVERTURNS

SANTA MONICA, July 15.—A racing car skidded and overturned three times this morning. Mrs. Lottie McMillan of Los Angeles was seriously hurt and three others slightly injured.

HERE ARE TWO of the Indiana politicians under indictment for conspiracy to violate the election laws. At the left in the circle is Mayor Joseph E. Bell of Indianapolis. The standing figure is Thomas Taggart, Democratic National Committeeman from Indiana.

BABE BURNS TO DEATH AS LAMP OVERTURNS IN BAKERSFIELD

BAKERSFIELD, July 15.—Left alone while the mother shopped, the three children of M. J. Waddell upset a lamp last night. A passing motorist heard shrieks and found the children and a baby burning. He beat out the flames. The three children will recover but the baby died.

DENIAL IS GIVEN TO MARYE RESIGNATION

WASHINGTON, July 15.—Secretary of State Robert Lansing and Private Secretary to the President Tumulty both denied today that George T. Mayne, American ambassador to Russia, has resigned.

Announcement had previously been made from semi-official sources of the resignation.

Despite the denials it is believed Mayne has expressed a desire to return home.

Lansing and Tumulty, however, insist that the ambassador is pleased with his post.

PEST ON FIRING LINE; GEN. FRENCH UNEASY

NEW YORK, July 15.—The trenches in Flanders abound with that pest, the Pediculus vestimentum, known by the shorter and uglier name of lice, according to a Canadian soldier, just arrived in New York on sick leave.

A short time ago, he says, a private of the Forty-eighth Highlanders took a needed bath close to Sir John French's headquarters tent.

After his bath the soldier, seeing the tent empty, crept in and took a complete change of linen, leaving his own in exchange.

Next day at inspection General French was observed to be extremely uneasy.

FORTY-FIRST COUNCIL SHRINERS ENDS TODAY

SEATTLE, Wash., July 15.—With the close of the forty-first council of the Shrine Lodge here today, J. Putnam Stevens of Portland, Maine, the imperial deputy, became the new head of the order and Dr. Frederick R. Smith, the present leader, became past imperial potentate. Henry P. Neiderhous, Jr., of St. Louis, Mo., became next in line to succeed to the leadership next year.

SENTENCED TO WORK DAYS; JAIL NIGHTS

LOS ANGELES, July 15.—Police Judge White today sentenced Albert Allen, a petty embezzler, to work days at the dye works until he earns enough to pay his pecuniations and to sleep nights in the city jail.

He will be released on his own recognizance daily.

Allen told the judge he stole \$3.00 weekly to pay alimony.

NEW NAVAL ADVISORY BOARD SOON NAMED

WASHINGTON, July 15.—Secretary of the Navy Josephus Daniels is today visiting Thomas A. Edison, the new naval advisory board head, at West Orange. Upon returning he is expected to announce the complete personnel of the new board. Unless congress appropriates funds for experiments the board's work may be so handicapped that good results will be impossible.

LIFE OF TEXT BOOKS
SACRAMENTO, July 15.—The life of a California free text book is four years, reports Edward Hyatt, superintendent of public instruction, after an investigation.

EYE WITNESS TO FRENCH BATTLE TELLS VIVID STORY OF FIGHTING

* AMSTERDAM, July 15.—The * German allies are planning a * concerted protest against Ameri- * can munition shipments to the * allies, Berlin dispatches today * state.
* Austria's protest note, publish- * ed in Vienna, is the first step. * Turkey will probably follow, * suggesting that America bar * such shipments unless safe con- * duct is assured similar shipments * to the Teutons.

THRILLING DESCRIPTION OF ALSACE FIGHTING

PARIS, July 15.—A French eye witness today thrillingly described the last month's fighting in Alsace.

Describing the French victory at Metzler he said the battle commenced June 11 and ended June 21 when the Germans burned the town and fled. The French attacked as drums beat and bugles played the "Marseillaise."

The Germans evacuated Wintera-gelwoods and the village of Sonder-nach despite the German machine guns stationed on the left bank of the Fecht river.

The French attacking used more than twenty miles of new roads and specially prepared trenches dug and built under constant fire.

One battalion of Chasseurs charged "Hill 830" to the music of a band. The bass drummer burst his drum and ran among the German musicians, where he captured a new drum.

Twenty German commissioned officers, fifty-three non-commissioned and 633 men surrendered.

Continuing their advance the Chasseurs penetrated the wire entanglements and fought hand-to-hand against greatly superior forces.

Reinforcements found every Chas-seur dead.

GERMANS OFFER PAY FOR TORPEDOED NEBRASKA

WASHINGTON, July 15.—The German memorandum regretting the torpedoing of the steamer Nebraska and making an offer of compensation, was formally received by the state department today.

The memorandum was handed to Ambassador Gerard in Berlin several days ago.

GERMANS SINK NORWEGIAN BOAT WITHOUT WARNING

YARMOUTH, July 15.—Fourteen sailors of the Norwegian steamer Ryn landed here today, reporting that a German submarine torpedoed and sank their vessel without warning, the second officer being killed.

The torpedoing occurred off Shipwash and the vessel sank in three minutes after being struck.

KIEL DISTRICT PLACED IN STATE OF SEIGE

AMSTERDAM, July 15.—Berlin dispatches today state that the entire Kiel district has been placed in a state of seige.

All constitutional rights have been revoked. The right of free speech, the inviolability of private homes and the right of public assembly have been abolished.

GERMANS MAKE FRESH DRIVE ON WARSAW

BERLIN, July 15.—It is announced today that the Germans have stormed and captured Przasnysz, fifty miles north of Warsaw. The Russians abandoned their artillery and retreated over the Makot roads.

Other eastern gains are announced.

FRENCH WAR OFFICE REPORTS VICTORY IN ARRAS

PARIS, July 15.—The War Office today claims the French have won a twenty-four-hour battle north of Arras, occupying the German works south of Cateau Carluet.

Between St. Mihiel and Pont-a-Mous-sion a German regiment is reported caught between a cross-fire and annihilated.

PRESIDENT TO ATTEND NEXT CABINET MEETING

WASHINGTON, July 15.—Secretary Tumulty today announced that President Wilson would attend Tuesday's cabinet meeting. The President probably will leave Cornish Sunday. He plans to discuss a new German note.

**120,000 COAL MINERS OF
BRITAIN ON STRIKE**
CARDIFF, July 15.—One hundred and twenty thousand coal miners today defied the government and struck. Britain now faces the most serious internal trouble since the opening of the war.

Labor leaders urged the miners to defer action in view of the government's threat to invoke the munitions act.

Crookshank-Beatty Company

LOCAL ATHLETES GIVEN BIDS TO ENTER EVENTS AT 'FRISCO

Santa Ana's fame in matters athletic was given another big boost today when Clyde Holley, representing the Los Angeles Athletic Club, telephoned to E. T. McFadden of this city, asking him to confer with Ray Adkinson and Ernest Plavan, with a view to inducing the two athletes to compete in the national championship meet to be held at the San Francisco Panama-Pacific exposition July 28 to August 10.

McFadden states that Plavan has practically made up his mind to participate in the meet. It is also practically assured that Adkinson will go.

Adkinson, who graduated from the Santa Ana Polytechnic high school, has just completed his first year at Pomona College. He is one of the best known sprinters in the state. Should he go to San Francisco he will enter the quarter-mile and the mile relay for the L. A. C., and will run either the quarter or half in the Junior meet.

Plavan graduated from the local high school this year. He has made some exceptional marks in both the

broad jump and javelin throw, both of which events he will enter, should he decide to represent the L. A. C., at San Francisco.

FORGIVES WOMAN WHO STOLE HUSBAND

DETROIT, July 15.—With her arm about the bowed shoulders of the woman who had stolen her husband, Mrs. Anne Hines gave a vivid lesson to the world on the text: "And the greatest of these is charity."

All the way from Springfield, Mass., Mrs. Hines had traced her husband and the woman, Mrs. Emma Champagne. Ten years ago the two women had been schoolmates and chums and had often strolled about with arms entwined. Recently they walked from the police court, where Mrs. Champagne and Mr. Hines had been arraigned on a statutory charge, and again their arms were about one another's waist.

"I forgive you, Emma," said Mrs. Hines. "All I ask is that you go away from Detroit and leave me with my problem, the winning back of my husband's love." The husband walked with them, still pondering on the words of Justice Stein:

"I hold this case over one week, and if the husband will go back to his wife and the other woman will go away there will be no case."

THIRTY-SIX FOR 25 CENTS
Dr. King's New Life Pills are now supplied in well-corked glass bottles, containing 36 sugar coated white pills, for 25c. One pill with a glass of water before retiring is an average dose. Easy and pleasant to take. Effective and positive in results. Cheap and economical to use. Get a bottle today, take a dose tonight—your Constipation will be relieved in the morning. 36 for 25c., at all Druggists.

OIL PROPERTY'S ASSESSMENT UNCHANGED

Board of Equalization Denies Four Petitions For Lower Valuations

At yesterday afternoon's meeting of the county board of equalization, motions were passed denying applications that have been made by the Monte Cristo Oil Company, Thomas Strain, Rev. A. L. Dearing and A. W. Poindexter for reductions of assessment.

In each of these cases the equalizers sustained the assessment that had been put on by County Assessor James Sleeper and his field deputies. The procedure in considering each petition included a close investigation of the assessments put upon property adjoining that to which objection was registered. The board of equalization became convinced in each instance that no injustice had been done.

The Monte Cristo Oil Company petition was presented last week by Henry Ashe of San Francisco, an attorney who was among those who represented Abe Ruef in the graft trials. He declared that his company was not making any money.

Thomas Strain's petition was also for a reduction on a piece of oil land. Poindexter declared that the 120 acres that Sleeper assessed for \$5250 was not worth over \$5,000. Sleeper showed that all the land surrounding it had been assessed in its relation to the oil fields, and that Poindexter had been dealt equitably by.

County Assessor Sleeper's books are going through the hands of the board of equalization with but very few changes. Probably no more changes will be made. The only ones that have been allowed so far were on the request of Assessor Sleeper, one being for an old soldier's exemption and the other for taking off an assessment on church property at Harper.

VASSAR GIRLS URGED TO 'NEW EDUCATION'

NEW YORK, July 15.—"Present day education in American high schools and colleges may do for the idle rich, but it is not practical enough for other young people," said Prof. John Dewey of the Department of Philosophy of Columbia, lecturing to Vassar students.

"Education now should be along the line of social service," he said. "We will soon come to see the importance of sciences and other practical subjects. We must have vocational training."

Gilbert's great once-a-year July Clearance Sale now on. You can save money on your dry goods now. Remember, only a few days of this wonderful sale. Beautiful Silk Poplin, regular price \$1.00, now 69c. Hundreds of bargains all over the store. Come to Gilbert's great money-saving sale. Extra help to wait on you.

SCHOOL OFFICE TO BE MOVED DOWN TOWN

After going over the situation again, the Board of Supervisors has concluded not to make further alterations in the basement of the court house at this time, and a number of changes that had been contemplated will not be made. It is proposed to hold down expenditures in alterations until such time, possibly next year, when a hall of records will be built or one or two more stories added to the court house.

In order to relieve the crowded condition in the tax collector's office, a series of changes has been decided upon. The office of the county school superintendent will be moved to some building outside of the court house. The recorder's office will be moved from its present location on the first floor to the suite now occupied by the school superintendent, and the tax collector's office will be moved into the room occupied by the recorder.

The room that is now occupied by the tax collector and the assessor will be left entirely to the assessor. It was thought best to keep the tax collector's office on the same floor and as near the assessor's office as possible. That was the reason the shift was made placing the recorder's office on the second floor, leaving the

recorder's room open for the tax collector. When the change is made the assessor and tax collector will be across the hall from each other.

The proposal to change the offices of surveyor, justice of the peace, horticultural commissioner and forester will not be carried out.

DREAMED OF HARM; HER SON IS DROWNED

NEW YORK, July 15.—Almost a day after the mother of 16-year-old William Lancaster of Belleville, N. J., had a premonition of some harm to him, he dived from a rowboat on Greenwood Lake and remained stuck in the muddy bottom fifty feet from shore. His body was recovered after sixteen minutes of diving and is being held at Warwick, N. Y., for examination by the coroner.

Young Lancaster, who was graduated from Belleville high school ten days ago, with highest honors, was in the rowboat with Henry Denison, one of several Belleville boy campers. He dived without warning and it was several seconds before young Denison noticed his absence and the search for him began.

The night before Mrs. Lancaster in Belleville cried out when the telephone rang: "something has happened to Willie!" Even when the message proved trivial she persisted in her belief that her son had suffered harm.

—Dr. J. W. Shan, 417 Hollingsworth Bldg., Los Angeles, in Santa Ana office Wednesday and Saturday afternoons, 1 until 7:30 p. m. Eye, ear, nose, throat and fitting glasses.

Closing out Wall Paper at about half price at Chandler's, 510-516 N. Main St.

150 LOCAL ELKS IN PARADE IN ANGEL CITY

It is estimated that Santa Ana Lodge No. 794, B. P. O. E., was represented in the Elks' parade in Los Angeles this morning by 150 members. The parade started at 10 o'clock from Eighteenth and Hill streets, moving on Hill street to Tenth; thence to Broadway, First, Spring, Eighth, and to Los Angeles street, where it disbanded. The program for this afternoon included an exhibition at Bostock's arena and Jungle, Main and Washington streets; a reception to visiting ladies at Hotel Alexandria; Grand Lodge session in Trinity auditorium, and at 8:30 this evening a special performance of the Mission Play, complimentary to grand lodge members.

The Santa Barbara float won second prize in the parade. The float represented a mission bell tower and was escorted by two hundred Santa Barbara Elks, garbed as monks.

The Santa Ana float, accompanied by its own band, was cheered. The parade took an hour and a half to pass a given point.

The judges were Ellen Beach Yaw, Mrs. Tobey Newman and Mrs. Jack Conable.

We Do Not Embarrass Our Customers

This is the store of no regrets. We do business under a FAIR SELLING POLICY which eliminates the discount sale. We mark our merchandise just as low as we can afford to sell it and stand by our prices.

You will never have the embarrassing experience of buying a suit here, say for \$20, and seeing the same suit advertised later for \$15. We have one price the year around—we do not embarrass you.

SCHOOLS WINNER OF A SILVER MEDAL

County Superintendent Gets Notice of Award Made In San Francisco

The showing made by the schools of Orange County at the San Francisco exposition brought an award of a silver medal. County Superintendent of Schools Mitchell today received the following statement from Arthur H. Chamberlain of San Francisco, chairman of the educational committee of the exposition:

"There has been handed to me as chairman of the California Education Committee at the Panama-Pacific Exposition, notice of the award to your schools of a silver medal.

"You perhaps have received notification of this, but I am now passing this as official information."

"Orange County has its educational film at the exhibition," said Superintendent Mitchell. "That is shown every day in the education building. We also have an exhibit showing two excellent photographs of each of the five high schools in Orange County. We have no exhibit of individual work at the San Francisco exhibit. There is a good deal of individual work on display in the Southern Counties building at San Diego, not, however, as a county exhibit but as a part of the Southern California educational exhibit. The silver medal award is only for the San Francisco fair."

PERSONAL AND SOCIAL NEWS NOTES FROM ORANGE CITY

ORANGE, July 15.—Many of the local herd of Elks turned their faces toward the big national convention today in Los Angeles, where the grand Elk parade, the climax of the week's fete, was held. A few of the Orange Elks who were in attendance are H. S. Huff, Leo Armstrong, Paul Clark, Jay Harbour, Perry Davis, W. R. Garrett, Dr. D. F. Royer and C. F. Newton.

About thirty members of Ruby Lodge Rebekahs attended the installation ceremonies of Torosa Rebekah Lodge in Santa Ana last evening. The Orange installation staff was in charge of the affair. The next installation will be held in Westminster next Saturday night.

The Royal Neighbors held one of their pleasant social and business gatherings yesterday in Odd Fellows' hall. The social side of the meeting consisted of a trip planned by the refreshment committee to the Star Restaurant, where delicious ice cream and cake were served on tables prettily decorated with red geraniums.

Mr. and Mrs. Ira Stolz and son Robert, Mrs. Louise A. Stolz and Arthur Boyd left yesterday for San Francisco. After a short visit at the exposition Mrs. Ira Stolz and baby will go on to their old home in Sandwich, Illinois, to visit relatives.

Mrs. R. R. Helwig left this morning for Milford, Utah, to join Mr. Helwig, who has located there. She will return home by way of the San Francisco exposition.

Mr. and Mrs. D. P. Crawford and daughter Hazel left this morning for a trip to the San Francisco exposition. They will be joined at Bakersfield by Miss Naomi Crawford, who will accompany them during the rest of the journey.

H. E. Fouch and family spent yesterday at Perris.

E. A. Honey was a visitor in Los Angeles today.

Dr. Caroline Paine went to Los Angeles on this morning's train.

F. L. Ainsworth and daughter, Mrs. Arch Burkett, were among today's Los Angeles visitors.

William Grecht and family spent today in Los Angeles.

Mrs. Louis De Long and Miss Betty Lucas left yesterday to spend a few days in Los Angeles.

Mrs. Evan Davis of East Palmyra avenue is reported on the sick list.

Mrs. Carl Porter of Villa Park went to Los Angeles today to attend the Elks' parade.

City Attorney W. R. Garrett and family visited Los Angeles today.

William Schleuter made a trip to Los Angeles this morning.

WHEN HOT WEATHER OPPRESSES

When you suffer from a feeling of oppression, when a naturally keen and alert brain seems dull and stupid, when bodily strength seems lacking and you are inert and languid—do not blame it altogether on hot weather. The hot sun will not effect you half so much if the bowels are regular and the liver active and healthy. Foley Cathartic Tablets are the ideal remedy for indigestion and constipation. They give stout persons relief from that uncomfortable bloated and congested feeling. Rowley Drug Co.

GOOD CROWD

A good sized crowd was in attendance at the Alexandria billiard parlors last night to witness the exhibition pocket billiard shots of Ed. Ziegler, whose work was given hearty applause.

W. R. Howell, expert accountant. Books opened, closed or experted. Room 234, Spurgeon Block.

—A "Record Breaker" was the opening day this year of our Annual Mid-Summer Clearance Sale. Buyers seemed to appreciate the values that are being offered.

—We are cutting prices on scores of lines of Spring Goods—getting ready for Fall business. And yet with Summer just beginning, you get a full season's use out of what you buy now.

Here is some of the "Cream" of our Specials:

Clearance Prices on Silks That You Cannot Afford to Overlook

—Seldom have dependable and seasonable silks been offered at these prices.

—In our desire to clean stock for Fall business, we have slashed through profit and deep into cost. Let these items speak for themselves:

\$1.50 Crepe de Chine, 98c

—A 40 inch, all silk crepe de chine, of fine texture and body. We show all the wanted shades for this season, except white and black. It is a splendid, seasonable material, and a bargain at 98c.

—Reduction covers all prices.

—Just when you want cool summer muslins, we offer our stock of Princess Slips at 1/4 off. This makes our \$1.00 values at 75c, \$1.25 styles at 95c, \$1.50 styles at \$1.10, \$2.00 styles at \$1.50, etc.

\$1.00 Marcella Combinations 75c

—Try the famous "Marcella" Combination Suits this season. It is a skirt, drawer, and corset cover all in one piece, easy to wash and iron.

—Made of long cloth, with dainty lace or embroidery trim, finished perfectly in the Marcella quality. Our regular \$1.00 numbers, on sale at 75c.

65c and 85c Gingham Aprons 45c

—Made of Amoskeag Apron Checks, empire style with both straight or fitted waists, sleeveless, full length, special for quick clearance, 45c.

Brassieres on Sale

—The cross back style, embroidery trimmed. Regular prices from 50c to \$1.25. Special, about 1/2 price.

Attractive Wash Materials 15c

—Figured Mulls, figured Plaisse crepes in kimono and dress designs, dress gingham, and half silk materials. Your choice for 15c per yard.

Splendid Values at 18c

—Our regular 25c Tissue gingham, the balance of our stock, in neat plaids, checks and stripes; a big line of half silk mulls and crepe de chine; Rice Voiles in staple colorings, selling originally at 35c per yard. Your choice of these materials, now 18c.

Remnants 1-3 Off

—Many good wash goods remnants have accumulated during Spring selling. We have marked them at close remnant prices, but during this sale, we shall sell them at one-third off the regular remnant prices.

—Silk and Wool remnants at one-third off.

Odd Corsets on Sale

—Small sizes of Nemo corsets on sale at \$2.00. These are regular \$3.50 and \$4.00 values, and you get a bargain if we have your size.

—Small Sahlin waists on sale at 25c.

Corsets Special \$1.00

—Special purchase of W. B. Corset allows us to place a \$1.50 number on sale at \$1.00.

—This is a new model, made of a new corset crepe, in white or flesh pink, exceptionally attractive.

—Style is medium bust with medium hips, made to fit the average figure. Has four supporters.

—Try one for \$1.00. We know you'll like it.

COTTON PETTICOATS AT 1/4 OFF

—Wash petticoats, in narrow striped Percales and Riplettes, colors of blues, gray and tans. Well made with deep flounces. Regularly priced at 85c, \$1.00 and \$1.25. Now just 1/4 off.

WATCH OUT FOR FRAUD STOCKS. CALIFORNIANS ARE WARNED

SACRAMENTO, July 15.—Brokers and agents of the type who used to pocket 30 to 60 per cent of the proceeds of stock sales in California, and whose profits in that direction have been curtailed by the operation of the Blue Sky law, have directed their activities to another field.

According to reports reaching Commissioner of Corporations H. L. Carnahan, the new game is to buy up privately-owned stock of little or no value, over which the state has no jurisdiction, and trade it for good stock which can be converted into cash. Aged people and the credulous who have had little or no business experience and readily listen to a glib-tongued salesman frequently find themselves in the possession of worthless shares for which they have exchanged good securities.

Commissioner Carnahan advises people to be on their guard against this kind of fraud. "It is reasonable to assume that the man who wants to trade you something believes that what you have is worth more than what he proposes to trade for it," says Carnahan. "It would be well for persons who have no knowledge of the value of stocks and other securities which they are urged to buy or to accept in exchange, to consult their banker, lawyer or some business man of experience, in whose judgment they have confidence, before acting."

Dr. Jacobs, Santa Ana Painless Dentists, 102 1/2 East Fourth. Phone 253.

ANOTHER BIG GUSHER ON STANDARD'S LEASE

Fullerton Tribune, July 14: The city of Fullerton has another big oil gusher. The Standard Oil Company brought in another well, No. 3, a mile north of the business district, here this afternoon. It is gushing a good grade of oil over the top of the derrick and it is believed it will make one of the best producers in the Coyote hills. It is near the 800-barrel well brought in about a month ago.

The new gusher is down about 4,000 feet.

ANAHEIM BROADWAY DISCUSSES PAVEMENT

Anaheim Herald, July 14: A meeting of Broadway property owners, called to order by H. M. Adams at 8 o'clock last evening, was held in the Board of Trade rooms.

The question of the advisability of paving at all at this time was discussed by Messrs. Rimpau, Fay, Duckworth, Dutton and others.

On request, a poll of the meeting was taken and there was found to be approximately 6000 front feet represented by the forty persons present.

Alex. Henry addressed the meeting on the question of paving the street full width. He was followed by Mr. Franz.

On motion of Mr. Goble, a vote was taken as to the sense of the meeting. There was found to be seventeen in favor of paving at this time and thirteen against. The chairman announced that the preponderance of frontage represented had voted against paving.

Mr. Lybarger and Mr. Nowatny spoke in favor of paving all at one time, asking for bids on and letting the contract for the street from end to end and not dividing it up into several small jobs.

Miss Parker, Mrs. Hahn, Mrs. Grimshaw, Mr. Lybarger and Mr. Henry spoke in favor of paving the full 60-foot width. Dr. Houck favored wide parking on the sides, while Dr. Johnston spoke at some length in favor of the center parking, provided the city had charge of its up-keep. These remarks were seconded by Mr. Fay and Mr. Dauter.

On motion of Dr. Johnston the meeting went on record as follows: That in the event of the paving being ordered done by the city trustees that they provide Broadway with suitable parking. Three thousand and fifty-eight feet voted in favor of parking; twenty-one hundred and thirty-eight voted against.

After further remarks by Mr. Braden, Mr. Bender and Dr. Johnston, Mr. Baum moved that it be the sense of the meeting that center parking meets with the approval of those present, provided the city assumes the care and oversight of the same. This the chairman announced carried unanimously.

On motion the chairman appointed the following committee to convey to the city trustees the wishes of the meeting: Mr. Braden, Dr. Houck and Mrs. Hahn.

FIRE AT ANAHEIM

Anaheim Herald, July 14: At half past three this morning fire broke out in the office building at the corner of Center and Atchison streets occupied by Williams Bros. as a real estate office. Although a quick run was made by the fire department the blaze had made such headway that the back part of the building was gutted before it was brought under control.

The cause of the fire is unknown but it is thought to have been caused by crossed wires of the lighting system. The house was occupied by Mr. and Mrs. S. E. Starr and their two sons, who were in the house at the time of the fire. Mr. Starr was awakened by the blaze and immediately turned in an alarm.

The building was recently purchased, supposedly, by the Salt Lake railroad and is understood to have been insured for \$1800.

IS SICKNESS A SIN?

If not, it's wicked to neglect illness and means of relief. It's wicked to endure Liver Ills, Headache, Indigestion, Constipation, one dose of Po-Do-Lax gives relief. Po-Do-Lax is Podophyllin (May Apple), without the gripes. It arouses the Liver, increases the flow of bile—Nature's antiseptic in the bowels. Your Constipation and other ills disappear overnight because Po-Do-Lax has helped Nature to remove the cause. Get a bottle from your Druggist today. Get rid of your Constipation overnight.

SALARIES IN PUBLIC OFFICE

Are salaries of public officials too high or too low? This is a much debated question.

Members of state legislatures and municipal governments may not be getting much more than they were ten years ago. But executive positions in a good many states are being paid quite liberally.

The attempt is made to attract to these positions men of commanding ability, sufficient to win very lucrative positions in business and the professions. If such men are actually secured, it probably pays.

But quite frequently it works like this: The politicians in state legislatures and local machines fix their ambitions on these so-called plums. They are affable and circulate over a wide extent to make friends. They work secret society and other social affiliations. By and by when the party managers have a fat piece of pork to dispose of, this useful worker has acquired a grip that can not be ignored.

It does not necessarily follow that these choices are bad. Many of these successful politicians are very bright fellows. Their ability to make friends so widely and land these positions shows that they have capacity, and they may perform their duties efficiently.

The objection is, that the politician type of public official can usually be hired for a very moderate price. All over the country men of this type are drawing salaries of \$3000 to \$5000, who would have jumped at salaries of \$1500 to \$2500.

No matter how well meaning and how capable an official of the political type may be, it is not the best school in which to train men for business positions. The successful politician has played the game too long to be able to drop it. He is apt to have too many friends. This question of salaries is a two-sided one. Advances in pay need to be carefully considered to see whether they are going to land a really superior type of man.

TYPHOID PREVENTABLE

Four hundred thousand persons in capacitated, and thirty thousand lives lost—this is the heavy toll exacted in the United States each year by the scourge of typhoid fever. And typhoid fever is a preventable disease!

A recent bulletin of the United States Public Health Service entitled "Typhoid Fever—Its Causation and Prevention," states that within the past ten years few of our communities having as many as two thousand persons have remained free from this disease for any period of twelve consecutive months. In recent times the rate of its prevalence for the United States as a whole has been from two to five times as high as in some of the countries of Europe. In these European countries the typhoid rate was formerly higher than the present figures for the United States. Their great reductions in the ravages of the disease have been brought about by improvements in sanitary conditions.

In many American cities there has occurred within the last twenty years a considerable reduction of typhoid fever. Due in a large part to improved sanitary conditions in the cities, the typhoid rate for some entire states has shown a material decrease. For the country as a whole, according to available figures, the rate has been reduced about 50 per cent in the past forty years. But the present rate is about the same as that which prevailed in some of the other advanced nations of the world thirty years ago. In other words, the United States is a generation behind the times, in respect to the reduction of its typhoid rate.

Practical and efficient measures for the prevention of typhoid fever are definitely known, but the efforts to get the people of the average self-governing community to carry out these measures to a reasonable extent are oftentimes decidedly experimental in character. In many instances the cost of modern sanitary improvements has been an obstacle in the way of typhoid prevention. It is often difficult to convince the governing authorities that money expended in the protection of the public health yields large dividends.

In rural communities and small municipalities another factor—the instruction and co-operation of the individual property owner—enters into the problem. Here every home must have its own method of sewage disposal, and in most cases its own water supply. The Public Health Service bulletin above referred to deals

in a comprehensive way with the construction of wells and outhouses.

In recent years a specific method for increasing individual resistance to typhoid germs has been employed. This is known as antityphoid inoculation or "vaccination." The method has been used extensively in military organizations of the United States, and from the results obtained it appears that inoculated persons are, upon equal exposure to typhoid infection, less than one-fourth as likely to develop the disease as those who have not been inoculated and who have previously had the disease. The average duration of protection given by inoculation has not been determined, but is supposed to be about two years.

It is pointed out, however, that the protection given by antityphoid inoculation is relative, not absolute, and that such inoculation is not to be regarded as a substitute for sanitation.

RHYMING CLERK WEDS WIDOW WON BY VERSE

MONROE, Wis., July 15.—John W. Stewart, county clerk of Green county and known as the "Poet Laureate," has won a rich widow as a bride. The ceremony was performed by the Rev. E. C. Dixon, district superintendent of the Madison district of the Methodist church, and the ceremony was conducted in rhyme, having been written by Mr. Stewart.

The groom is serving his third term as county clerk of Green county and it is his regular practice to summon jurors in meter, while many of the records of his office are written in rhyme.

During the last campaign for reelection all of the advertising literature used by Mr. Stewart was written in verse, and he was elected by the largest majority of any man ever being called to the office of county clerk.

KILLED BY FALL
MODESTO, July 15.—Jess Bittner, aged 26, fell 110 feet today into an uncompleted municipal water tank, dying in twenty minutes.

INTERESTING COMPARATIVE FIGURES ON EXPENSES OF LEGISLATIVE SESSIONS

[Statement of John Francis Neylan, Chairman of the State Board of Control, based on state records and giving facts concerning cost of recent legislative session.]

"Startling figures and comparisons sometimes give rise to the suspicion that they are fanciful. They should be thoroughly investigated. In order to afford some little pleasure to those gentlemen and interests who have been so active in misrepresenting the last legislature, the State Board of Control has instituted a comparison of legislative costs prior to Governor Johnson's administration and since he became chief executive. This comparison is based upon the sworn records of the state and is not only interesting but discloses the shameful manner in which the people of California were robbed for many years. The word 'robbed' is not any too strong."

"The 1915 legislature achieved a record for economy which will probably stand for many years. Its appropriations represented the smallest biennial increase in the history of the state, a record formerly held by the session of 1911, under Governor Johnson. The cost of the session was approximately \$28,000 less than the 1907 session under Gillett, in spite of the longer period due to the divided session."

"To the initiated, however, it has always been a well known fact that outside of the stuffing of the payroll, which was maintained under the old regime, the contingent expense fund

of each house of the legislature was the one which was subjected to all kinds of raids, from ordinary stealing of money to dishonest purchasing of supplies, large quantities at ridiculous prices."

"Let any honest and intelligent citizen examine the following contingent expense fund statements and make up his or her mind as to which legislature should be preferred:

Senate	
1905. Amount used	\$62,497.82
1907. Amount used	66,477.73
1909. Amount used	37,247.99
1911. Amount used	33,139.96
1913. Amount used	11,526.22
1915. Amount used	5,566.95

Assembly	
1905. Amount used	\$83,687.86
1907. Amount used	96,566.59
1909. Amount used	35,856.21
1911. Amount used	14,642.51
1913. Amount used	15,488.91
1915. Amount used	16,070.11

"Included in the 1915 expenses of the Assembly are the costs of the Childs impeachment proceedings."

"Prior to 1911, the legislature was controlled by those very gentlemen who have shamelessly attempted to block every governmental advance made in California. Every session of the legislature was productive of a scandal. Since 1911, the Progressive forces of the state have controlled the legislature."

ATTORNEY ATER PROPOSES AN AMENDMENT TO MARRIAGE LAWS

Recently Attorney W. F. Ater of Santa Ana called attention to a supreme court decision that seemed to make it possible for male minors under 21 and female minors under 18 to be married without the consent of a parent or guardian, provided the male be 18 years of age or over and the female 15 or over, and which also seemed to make it possible for males under 18 and females under 15 to be married if the consent of a parent or guardian be given.

On looking the matter up, County Clerk Williams and District Attorney West came to the conclusion that a section instructing the clerk not to issue a license to any minor without the consent of a parent or guardian had not been passed upon and was binding upon the clerk. Williams stated that he would not issue a license to any male under 18 or any female under 15.

Attorney Ater has now submitted a statement to the public in which he reviews the marriage laws and suggests an amendment. Ater's statement follows:

Ater's Statement
The gist of the marriage law of this state applicable to minors, as it is written and has been construed by the supreme court, and as it was at common law, which is applicable in all cases where we have no written law, is as follows, viz:

Marriage is a personal relation arising out of a civil contract. Consent of the parties, alone, is insufficient. It must be followed by a solemnization authorized by the code of personal relations. (C. C. 55.)

Any unmarried male of the age of 18 years or upwards and any unmarried female of the age of 15 years or upwards, if not otherwise disqualified (that is, mentally or by intoxication, fraud, etc.), are capable of consenting to and consummating marriage. (C. C. 56.) (Without the consent of parents or guardian and when under age of consent fixed by Civil Code 56 they may marry with the consent of parents or guardian.)

"It is only when marriage is contracted by a minor who is incapable of consenting to marriage by reason of being under the age of consent, as provided in Section 56, supra, that the consent of parents or guardian is essential to its validity." In re Ambrose, 149 Pac. 42 (Cal.).

Section 56 does not fix the minimum age at which minors may marry, we are, therefore, bound by the common law, which fact has been observed, judicially, and is indicated in the Code. People v. Souleotes, 146 Pac. 903 (Cal. App.), and C. C. 82, Subd. 1. (Okla.).

At Common Law
"The marriage of a party under 7 years of age is absolutely void; of a male between 7 and 14 or a female between 7 and 12 voidable; or a male over 14 or a female over 12 valid." Hunt v. Hunt, 100 Pac. 541 (Okla.).

The age of consent by the common law of the land is fixed at 14 in males and 12 in females. The law supposes that the parties, at that age, have sufficient discretion for such a contract and they can then bind themselves irrevocably. 2 Kent, 78.

At the age of consent at common law no other assent was needed. 1 Blackstone, 437.

Observation of the common law and statutory enactments in various states indicate that the age of consent is the

age of majority for the purpose of marriage contracts, and that the age of majority for all other contracts and personal rights is fixed at 21 in males and 18 in females. See 26 Cyc., 824 and 842 and authorities above.

All persons, about to be married, must first obtain a license of the county clerk. Minors cannot be married without a license. C. C. 69 and 79. But Section 69 continues and directs that the county clerk must not issue a license or guardian or consent of the parents or guardian when the male is under the age of 18 and the female under the age of 15. But you will observe no other limitation is fixed as to the minimum age and that the age, as fixed, is in conflict with Section 56, as it is written, and has just been construed by the supreme court in the Ambrose case.

The license is no part of the contract. It is simply evidence of the authentication. If a male 18 and a female 15 may marry without the consent of parents or guardian, and under those ages, with the said assent, and minors are not allowed to marry without a license, how are minors in those instances to obtain their civil rights when consent is given when required and withheld when not essential and the county clerk is directed not to issue the license and declares he will await a mandamus before doing so in each case of the instances? This is a serious question. Every one entitled to the equal protection, privileges and immunities of the law. Every bride and groom, voluntarily married as authorized by law, are entitled to a license to authenticate the marriage, whether or not they are minors. The law recognizes no social distinction. It does not require an idle act. We may not set our foot down upon one clause of a section of the law which has never been passed upon and say all marital rights, property rights and public policy laws applicable to minors are subject to this section, notwithstanding any other section of the law or construction of the supreme court to the contrary.

Amend the Law:
There is only one thing to do in a case of this kind, insofar as the public is concerned, and that is to have the legislature amend the law. The courts are not at liberty to modify the law. They take the law as it is and so declare it. Individuals and public officials are at liberty to place their own construction on a law until it is construed and often do so, but they do so at their own risk.

In view of the situation and under the exigency of the circumstances, I herewith submit for public approval and promulgation a proposed law applicable to minors. I lay no claim to it as author. I simply selected it as a model which I observed in making up this brief.

A Model Law
"Any unmarried male of the age of 21 years or upward, or any unmarried female of the age of 18 or upward and not otherwise disqualified, is capable of contracting and consenting to marriage; but no female under the age of 18 years and no male under the age of 21 years shall enter into the marriage relation, nor shall any license issue therefor except upon the consent and authority expressly given in writing by a parent or guardian, and every male under the age of 18 and every female under the age of 15 years are expressly forbidden and prohibited

from entering into the marriage relation (and all purported marriages of minors in violation of this code are expressly declared to be null and void); provided, that this section shall not be construed to prevent the courts from authorizing the marriage of persons in settlement of (certain suits of a criminal nature) when such marriages would not be incestuous under this (code)." See Hunt vs. Hunt 100 Pac. 541 (Okla.) for missing words. Words in brackets are modifications to cure objections stated by the court.

This brief law is authoritative and valuable. It merits recognition and admiration. I submit it not for the reward but for the good of the cause. If we are to avail ourselves of this valuable information, and correct the objectionable features of our marriage laws, somebody must do something. Nothing of this nature can be done without a leader. Who will volunteer? A petition should be on file in the county clerk's office of each and every county of this state to amend the marriage law, and at the proper time the petitions should be presented to the members of the Legislature of the respective districts to be taken up at the next Legislature.

IMPRESSIVE SERVICES

Torosa Rebekah Officers Are Installed By District Deputy President

The new officers of Torosa Rebekah lodge were duly installed last evening by District Deputy President Addie B. Lucy and her staff of installing officers, of Orange, assisted by Tinta Small, grand marshal.

The lodge rooms were beautifully decorated with Shasta daisies and ferns and the impressive services were faultlessly conducted, the following Torosa officers being installed:

Noble Grand—Clara V. Bullock.
Vice Grand—Emily C. Annis.
Recording Secretary—Mary E. Shaw.

Financial Secretary—M. V. Schnee.
Treasurer—Mary E. Cooper.
Warden—Lutie Lyman.
Conductor—Lona Moon.
Chaplain—Mary E. Moore.
Inside Guardian—Mary Ford.
Outside Guardian—Dora Martin.
R. S. N. G.—Sarah Uttley.
L. S. N. G.—Susan Mullinix.
R. S. V. G.—Ila Bishop.
L. S. V. G.—Nellie Young.
Altar Supporters—Pearl Jones and Laura Walker.

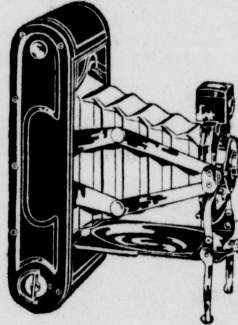

Musicians—Kathryn Clark.
Finance Committee—Mesdames Hutchins, Cullen and Robert Wallace.
Floral Committee—Mesdames Annis, Uttley and Mullinix.
Banner Bearers—Ethel Slocum, Lottie Roberts, Irene Mitchell and Edmonia Robertson.

There were many visitors from Orange at last night's affair and the installing staff and officers were presented with beautiful bouquets.

Late in the evening the company adjourned to the banquet hall where tables were artistically decorated with pink tinted hydrangeas, a spicy pink carnation marking the place of each. Here, Mrs. Laura Walker and her assistants served ice cream and cake, pleasantly closing the social hour.

Chairman Is Here
Max Kissick, chairman of the national convention of the Y. P. C. U. of the United Presbyterian church, held in Los Angeles recently, is being entertained at the home of S. H. Finley. An auto party of the young people of the local church is today showing him the beauties of this county.

PLEASING RECITAL

Musical and Literary Treat to Be Given at Tustin School Auditorium

Following is the program to be given at a recital by Miss Mabel Briney at the Tustin school auditorium on Friday night, assisted by the Tustin Christian Endeavor Society:

Music, chorus, "Praise Ye the Father (Gounod); readings, "Studying Wasps," "Molly," piano duet, "The Witch's Fright," (Russell), Misses Gertrude Utt and Margaret Tingley; readings, "Caddie," "How Mary Ellen Attended a School of Expression;" vocal solo, (a) "The Garden of My Heart" (Clara Rowe), (b) "I Hear a Thrush at Eve (Cadman), Miss Jessie Rawlings; reading, "The Priest at the Confessional;" chorus, "The Holy City" (Adams-Jacoby); readings, "The School Marm," "Aunt Peggy and High Art."

VEGELY-BARBER

Interesting Wedding Occurs At Christian Church Parsonage

Rev. Paul E. Wright offered his services yesterday to Dan Cupid and the popular city clerk, Edward L. Vegely, whose marriage to Miss Katherine Barber of Council Bluffs, Iowa, occurred at 4 o'clock at the residence of Rev. and Mrs. Wright at 602 Parton street.

The bride was becomingly attired in a traveling suit of blue and after the quiet wedding, Mr. and Mrs. Vegely slipped away to Los Angeles with their honeymoon destination unknown. Upon their return they will be welcomed by Mr. Vegely's many staunch friends.

Pleasant Meeting
The Ladies' Missionary Society of the Christian Church held its regular monthly meeting yesterday in the Sunday school room, which was very artistically decorated with shasta daisies and bougainvillea.

Miss Blanch Cartmell had the meeting in charge and after the devotional services and a business session, the speaker, Mrs. Thompson, of Los Angeles, superintendent of Young People's work, was introduced. She emphasized strongly the importance of training the young people for Christian service and also spoke of the foreigners who have come to us, to whom we are giving the Gospel instead of trying to get rid of them. Much has been done among the negroes and Orientals.

Mrs. Thompson spoke of the Buddhist Temple in Los Angeles; how those people are sending out their literature causing quite a number of American women to accept the Buddhist religion.

Mrs. Hayes favored the company with one of her sweet solos, concluding the meeting, which was one of interest and profit to all.

Informal Evening
A pleasantly informal gathering of relatives was held last evening at the home of Mr. and Mrs. J. J. Van Wyk of 1109 French street, whose present being Mr. and Mrs. Walter Vandermast, little son Newell, Mrs. Vandermast's brother, G. A. Thompson, who is a teacher in the state university at Orono, Me., and Mrs. Vandermast's cousin, Albert Thompson, of Harvey, Ill.

Refreshments were served during the merry social hours.

PRETTY WEDDING

Rev. Otto S. Russell Unites In Marriage Popular Los Angeles Teachers

The marriage of Miss Marian Richardson and Mr. John Richards of Los Angeles was solemnized yesterday afternoon at the First Baptist church, Rev. Otto S. Russell being the officiating clergyman.

The impressive ceremony was performed in the presence of a few close friends of the young couple, who are popular members of the Los Angeles high school faculty, Miss Richardson having been a teacher of the art department while Mr. Richards is an instructor of manual training.

The bride made a very charming picture in her stunning traveling suit of tan gabardine and she carried an exquisite shower bouquet of Cecil Bruner roses and maidenhair ferns. Those witnessing the pretty ceremony were Miss Florence Chapman and Mr. John Murray of Los Angeles; Miss Minnie Frisbe of Tucson, Arizona, and Mrs. Louis W. Beebe of Santa Ana.

Following the ceremony Mrs. Beebe, who is an old time friend of the winsome bride and Miss Frisbe, when all were living in Michigan, entertained the wedding party at the Florence Apartments where a color scheme of rose and green was developed with a profusion of roses, carnations and ferns.

A delicious two course collation was served at 5 o'clock, the dining table being centered by clusters of lovely pink roses and ferns.

After a wedding trip to San Francisco, Mr. and Mrs. Richards will make their future home on Orange avenue, Los Angeles.

FOR OREGON MAID

Miss Carolyn East Is Guest of Honor at Merry Afternoon Affair

Miss Carolyn East of Salem, Ore., who formerly resided in Santa Ana, has been heartily welcomed by old-time friends since her arrival in Santa Ana, and yesterday she was complimented with a jolly afternoon party at the home of Dr. and Mrs. T. J. Haughton, 429 South Sycamore, where Miss Carolyn Haughton was hostess.

A series of merry progressive games furnished a continual round of fun. In an amusing doll-dressing contest, in which the company fashioned the latest styles in "dollidom" from tissue paper, for clothespin models, Miss Maurine Cox was rewarded for her originality as a modiste, although there were many other stunning creations in the line of summer bonnets and fancy gowns.

Cooling refreshments rewarded the busy workers who afterwards continued their merrymaking on the pretty lawn.

Among those present were Misses Carolyn East, Rita Read, Jean Ross, La Verne Manning, Dorothy Dugan, Josephine Bull, Mary Josephine Wicks, Margaret Clayton, Frankie May Taylor and Maurine Cox.

For Eastern Visitor
A merry theater party at the Princess was given last evening in honor of Miss Bess Bell of Logansport, Ind., who is visiting Mr. and Mrs. Wm. White.

After the "movie" program had been enjoyed, the company was entertained by Mrs. R. W. Gillespie at her attractive home on South Broadway, where delicious refreshments were served during a jolly social hour.

Among those joining in the evening's pleasure were Miss Bell, guest of honor, Mrs. Cackler, Mrs. Gillespie, Misses Brightwell, Hahn, Claycomb and Morgan.

At Baptist Church
Miss Fannie Taylor will speak of her work among the Italians in Florida, at the First Baptist Church prayer meeting tonight.

Entertains New Club
A congenial little embroidery club, recently organized, was delightfully entertained yesterday afternoon at the home of Mrs. Mell Smith, 1077 West Fourth street.

Roses and delicately tinted hydrangeas added floral charm to the attractive rooms where the ladies merrily chatted over their needlework.

Late in the afternoon, the company gathered 'round the prettily appointed dining table centered by a crystal basket holding clusters of tiny pink flowers and here the guests enjoyed a delicious menu of salad, ice cream, cake and coffee.

Covers were laid for Mesdames Chas. Woodruff, A. Faccou, Win Smith, J. M. Osborne, H. R. Roberts, Wm. J. Sackman and Mrs. A. W. Wenskold and daughter Miss Alice of

American Made Fashions

Dear Margaret: You'll be astonished to receive my picture as Sylvia's bridesmaid. Yes, Sylvia has been wooed and won and wedded! A husband carried her off yesterday for the moon of honey.

Sudden! A month ago she didn't know him! The gossips are still babbling with the story of how it happened.

Hear now the manner of Sylvia's wooing.

You know Sylvia is said to be the image of her grandmother when a girl.

The grandfather of Sylvia's new husband was a "dabbler" in painting, besides being a financier. He met and loved Sylvia's grandmother long, long years ago, runs the romance that has just come to light. He painted a portrait that he prized because it had the gray eyes, the gold hair and the sweet face of that "sweetheart of his."

Others prized it as an exquisite bit of art.

It came about that those long-ago lovers married — the omnipresent "somebody else." So the "old sweetheart" portrait with gray eyes, gold hair and quaint frock was hung away in the gallery, just like any other portrait, and there it hung for years.

Robert, his little grandson, used, long after, to stand before that portrait and call it "my sweetheart," and when he grew up and went to college he still called that picture in the gallery "my sweetheart." Robert came home from his travels this spring. At the Carlton dance he met a girl marvelously like that old portrait—gray eyes, gold hair, and sweet face. The next day he led his grandfather to the portrait in the gallery and asked:

"Who is this lady in the sweetheart

picture I danced with her double last night?"

"Her name was Sylvia," said the grandfather dreamily.

"Her name is Sylvia?" exclaimed Robert.

"She was an old sweetheart of mine," said the grandfather.

"And she is—she is expecting me to call this afternoon!" And Robert strode away as do lovers in romance.

First thing we knew came a wedding, a wedding all to be traced back to that "old sweetheart" portrait, even to the inspiration of the gowns, Sylvia, the bride, her bridesmaids, and flower girls were arrayed old time like the portrait of Sylvia's grandmother, whom Robert's grandfather loved.

And I, even I, Sylvia's oldest friend, was her "old sweetheart" maid of honor. Behold me in light green taffeta and silver lace in that old fashioned mode, so happily for this very wedding came back as the newest of the new for this June's frocks.

Old fashioned—new fashioned are my pinched in waist, with really whaleboned seams; my wide gathered skirt, the tabs and scallops, sleeve caps and lace bertha. Still in the scheme are the green and pink roses down the front, the quaint leghorn hat trimmed with green ribbon and pink roses, and even the little ivory fan, Robert's gift to each bridesmaid.

Now it's all over and I've been maid of honor at Sylvia's "old sweetheart" wedding. It amuses me to wonder if any one ever painted my grandmother's portrait. However, Sylvia threw her bridal bouquet and—I caught it. Yours ever,

MAY.

Oakland, who are the house guests of Mrs. Sackman.

AMUSEMENTS

At Clune's

"Just Three Boys" is the title of a trio that leads an exceptionally good vaudeville bill at Clune's Theater this last half of the week. They are clever. Harmony is the keynote, with comedy thrown in for good measure.

At the Lyric

The third theme in the "Who Pays" series of pictures entitled "The Tempting of Justice," in three acts, each complete as shown, is the tempting headline for theater-goers at the Lyric tonight. King Baggot and Jane Gale are also being presented in a two-part modern drama, "A Life in the Balance."

Personals

Miss Nell Isaacson and her friend, Miss Susie Shaffer of Kansas City, who has been visiting at the Isaacson home, left this morning via the Salt Lake railroad for Kansas City, Mo. Miss Isaacson expects to be away three months and she will visit with Miss Shaffer and other Kansas City friends.

Mr. and Mrs. J. H. Chamberlain and daughter, Miss Eula, motored to Pomona today to secure her reservations at Pomona College for the coming year.

Mrs. A. R. Dresser and little granddaughter, Miss Dorothy Dresser, went to Los Angeles this morning for a several days' visit with relatives.

Mrs. C. C. Ward and son, Richie, of Garden City, Kan., are guests at the home of Mr. and Mrs. J. S. Runyan of South Birch street. Mr. Runyan's cousins, Mr. and Mrs. J. A. Warren of Bloomberg, Pa., and Miss Charlotte Kelley of Paw Paw, Ill., also arrived from Long Beach to spend several days at the Runyan home.

Mrs. Eva Burke left this morning over the Salt Lake line for Des Moines, Ia.

Mrs. L. Baade, Mrs. George Platt and Miss Carrie Graham spent today in Los Angeles.

J. C. Metzgar made a business trip to Los Angeles this morning.

O. S. Catland left this morning for Boston, Mass., expecting to be absent from Santa Ana for a month. He will visit his mother at Lynn, Mass., and also spend part of the time at his old home at Thomaston, Me., and points of historic interest. Mr. Catland is traveling over the Salt Lake line.

Mrs. J. A. King and Mrs. D. R. Helwig left today via the Salt Lake line for Malone, Utah.

J. Browne left this morning over the Santa Fe for Malone, Utah.

Mr. and Mrs. W. C. Dunlap, 722 Cypress, left this morning for a week's stay at Ocean Park.

Miss Pauline Parsons and Margaret Wakeham were among Santa Anans in Los Angeles today.

T. A. Winbigger and Mrs. I. D. Mills made a business trip to Los Angeles this morning.

Misses Addie and Minnie Cowan, accompanied by their house guests, Mrs. R. J. Dunn of Canton, Ohio, and Misses Mabel and Jessie Stewart of Springfield, Ohio, left this morning for a two-days' stay in Los Angeles. They will attend the Mission play at San Gabriel this afternoon.

Marshal Keeler and D. T. Gilmore left this morning for San Francisco via the Salt Lake route.

Mr. and Mrs. C. G. Hubert, of New York City, who have been guests at the home of Mrs. E. W. Hardy, are attending the San Diego fair.

Mrs. Max Reinhaus and daughters, Irma and Helen, are attending the San Diego fair.

Dr. and Mrs. Harry Zaiser have been enjoying a visit from Mrs. Zaiser's sister and her husband, Mr. and Mrs. Homer Howard, who left today for their home in Chicago.

Mr. and Mrs. Ray G. Morse and daughter, Miss Lulu Morse, of Marysville, O., went to San Diego yesterday after a visit at the home of J. J. Morse.

Mr. and Mrs. George F. Heil and family will leave tomorrow via automobile for San Diego, where they will spend two weeks.

Mrs. Charles Winans will leave tomorrow for San Diego to view the exposition.

Mrs. G. S. Gilbertson of Laporte, Ind., is here for a visit with her daughter, Mrs. H. O. Garlock, of 801 Santa Sycamore. Mrs. Gilbertson expects to remain until the first of August and will visit California's exhibitions before returning home.

TIRED, ACHING MUSCLES RELIEVED
Hard work, over-exertion, mean stiff, sore muscles, Sloan's Liniment lightly applied, a little quiet, and your soreness disappears like magic. "Nothing ever helped like Sloan's Liniment. I can never thank you enough," writes one grateful user. Stops suffering, aches and pains. An excellent counter-irritant, better and cleaner than mustard. All Druggists, 25c. Or a bottle today. Penetrates without rubbing.

JOHN McFADDEN, 113 E. 4th

ZONING NEW JOY TO SIGHTSEERS; THEY DRAIN IT TO DREGS

SAN FRANCISCO, July 14.—To the last dregs! To the last bitter protest of tired feet and fagged bodies; until dancers drop into chairs exhausted and worn; until barker's throats are dry and their voices cracked from hours of shouting and cajoling; until one by one the myriad lights fade out, and standing gaunt against the sky appear only the skeleton outlines of a fairy city.

So San Francisco and its thousands of visitors take their pleasure upon the "Zone," the joy spot of the Panama Pacific exposition.

Varied Sounds

It is far into the night. Over the many babble of voices come the notes of a bugle. They ride upon a breeze heavy with the odor of Japanese rice cakes, popcorn and handy outdoor kitchens. Upon a balcony, high above the joy-seeking throng a young woman in a much be-braided suit of semi-military cut supplies the lung power for this bugle, summoning all who still have a dance left in their system or are looking for a "reviver" to carry them through another hour. It is a German place is the "fortifying" position, but world's fair crowds are strictly neutral. A giant guardman in doublet and hose stands forbiddingly before the door. The long spear upon which he leans, however, is for other purposes than guarding the sacred portals. He is more likely to give you a friendly jab with the working end of the spear to assist you in, if there is any hesitancy.

Zoning Still New

Across the way the barker for an Irish village bids for patronage against the Teuton fortress. The glories of a near-by alligator farm are mixed with your anticipation of Irish joy, and, towering above you, but a step away is a giant "Mother Eve," of the inevitable exposition attraction "Creation."

"Zoning" is still new to San Francisco, and is ever new to the endless stream of Americans, possibly for the first time in their lives determined to "see America first."

There is the soft perfume of flowers, the quiet music of numerous fountains, the soft glow of invisible lights, the flutter of the wings of doves. You pass down the long line of palms, heavy with clinging vines and flowers. You quicken your step to keep in time with a band playing just across the way.

A Mile of Action

But now there is a new sound. You are still within ear-shot of the band, but you no longer hear it. There is a bang and crash. You are at the head of the Zone. A metallic sounding mechanical orchestra bangs out the latest song hit. It is the first thing on the Zone and something which every American knows—a merry-go-round. Stretching ahead is a mile of lights, laughing people, noise, and action. Behind you are the works and ideals of America. Before you is America at play.

From this American merry-go-round you may eat, drink and dance your way through the Panama Canal Zone, over the ice of the South Pole with Captain Scott, see educated horses, diving girls or the crazy lopsided village of Toyland with its "toy" soldiers towering sixty feet high. There are villages of Australasia, and Samon, and, hopping back to our own continent, of Mexico. A step and you are in Japan with fat wrestlers, monkey shows and innumerable fakirs demanding attention.

To the Last Dregs

While a miniature "Old Faithful" spouts in a miniature Yellowstone park, there floats up to the broad veranda of the Inn the "co-lala" music of the Turkish dancers. There is to be found—in the Orient, not the Inn—Holy Moses, the camel herds of numerous expositions, the gun spinners and the inevitable line of "Princesses" whose kind was originally made famous by the first "Streets of Cairo."

"Old Faithful" is the end of the Zone. But there is the opportunity for more to eat, drink and dance before starting to work your way back. One by one concessions close, lights flicker and go out. A fresh, cold drink comes off the bay. Fog begins to lower, chasing the heavy ice cake fumes. Tired dancers, diving girls and barker step from different shows and join the diminishing crowds. There is nothing more to see, but still the pleasure seekers linger along the deserted thoroughfare. Let's all go home.

But, listen! The bugle! The girl in the braided suit, the giant guardman, music, the dance. And so, to the last dregs!

FOR HAY FEVER OR ASTHMA

Many persons dread July on account of the recurrence of hay fever. Foley's Honey and Tar Compound long has been recognized as the ideal remedy for hay fever and asthma, because it heals and soothes the raw, rasping feeling in the throat and eases the choking sensation. It allays inflammation and brings about easy and natural breathing. Contains no habit-forming drugs. Rowley Drug Co.

Safety First. Stop, Look, Listen! Some real values in used cars that are covered with a guarantee that is good. Easy terms.

MARATHON RACE ENDS WITH CAPTURE OF THE LONG HAIRD RUNNER

Policeman Runs Down Man
Who Says He Killed Two
Priests at Beach City

Policeman John Ryan won in a chase yesterday afternoon. The Marathon course led along an alley, across a walnut orchard, along a street, through an orange orchard, along another street, into a walnut orchard and up a walnut tree.

The race was won at the walnut tree. Julius Brown thought Ryan couldn't ride his bicycle up the tree, and therefore Ryan couldn't catch him.

It was a vain hope. Ryan did not try to ride the bike up the tree. Ryan dropped his bike and got the pursued man by the seat of the pants and dragged him down from the tree.

To start the story at the beginning, let it be said that yesterday evening a long-haired, unkempt wanderer presented himself at the back door of Policeman Ryan's residence at 1504 Durant street, and asked for something to eat. Ryan gave the man a hand-out, and told him to sit down on a box and eat it.

Ryan's tone of voice and his size alarmed the man, with the long, wavy locks. He turned ran out of the back yard.

Ryan concluded that the man needed to be arrested. His actions were peculiar. The officer seized his bicycle and started the chase after the man whose wind proved to be as long as his hair.

When Ryan had a chance he rode his bicycle. When on it he could make substantial gains. Then the pursued person would turn off across a plowed orchard. Ryan flung his bicycle on his shoulder and kept hot on the trail. The policeman's speed was retarded by the unwieldy bike.

Ryan's running capacity was put to the test, and it proved equal to the occasion. Julius ran like a scared wolf. Ryan held doggedly to the trail. Finally Ryan closed the gap. Brown was about all in. He staggered into a walnut orchard on Hannah street near the Santiago creek. Ryan followed. He caught the man just as the man was shinning up a tree. That tree is a mile and a half from 1504 Durant street.

When Brown got his breath he broke loose with a flow of imprecation. Incidentally he said he had killed two Catholic priests over at Huntington Beach. He said all the policemen of Santa Ana were Catholics, and they would be killed.

The man was locked up by City Marshal Jernigan. He will be watched. The officers are satisfied that the man's mind is not right.

HOW TO KEEP IN HEALTH EVEN IF WEATHER IS SULTRY

WASHINGTON, July 15.—Dr. Harvey W. Wiley has promulgated a few "hot weather Do's and Don'ts."

"Eat everything, but eat moderate."

"Abstain from alcohol and tobacco."

"Drink plenty of cold water, but do not gulp it."

"Never drink with meals, but immediately after."

"Eat plenty of fruits and vegetables."

"Abstain from sweet soda fountain drinks, unless the syrup is used sparingly."

"If you eat moderately and refrain from drugs, do not be afraid of sunstroke."

ASSERTS DOCTOR USED APPENDIX FOR FISH BAIT

SMITH, La., July 15.—Bill Case is mad. He says that it is all right for Doc Holmes to be a fisherman, but he'll be dog-goned if Doc didn't carry it too far with him, and that he is entitled to the three-pound-seven-ounce trout Doc caught yesterday.

Bill and Doc went fishing the first two days of the season and brought in nice catches. A couple of days later Bill was taken sick.

His wife called up Doc on the phone and caught him just as he was starting fishing. Doc hustled over to Bill's house. He diagnosed the case as appendicitis, got out his instruments, performed the operation, got Bill back to bed and hurried off to go fishing.

He came back to see how Bill was doing and brought in the big trout to show his patient, who nearly had a relapse. Now Bill declares Doc just operated on him to get his appendix for bait and that he caught that big trout with it.

Has No War Orders

According to George A. Moore, president of the Giant Powder Consolidated Company, his company has not received one dollar's worth of war orders. "We do not make a pound of military powder," said Mr. Moore. "We are equipped for this business. Our output is confined exclusively to explosives for industrial uses."

We Will Buy Your Old Electric Light Fixtures!

The Champion Gas & Electric Appliance Co. as Electrical Contractors are in the front ranks of their line of business all over Orange County.

We intend to break this splendid record and lead all others.

In order to attain this high commercial standard we realize that we must serve the public with the greatest amount of efficiency combined with indisputable quality and quantity.

Next We Must Be Aggressive and Progressive in Our Business Methods

Considering these successful fundamental business essentials we now submit to the public of Orange County one of the most progressive offers ever placed before the public of any community to get rid of their old electric light fixtures and refurnish their homes with the very latest, modern, elegant and beautiful electric light fixtures manufactured and known in the world of illumination today. **Just think of it, we actually buy your old electric light fixtures.** Make you a liberal allowance on your new purchase in payment for your old fixtures.

Electric light fixtures get out of style and what is more they do become inefficient when compared with the latest methods of illuminating.

This Great Opportunity Will Afford You the Chance You Have Been Looking For to Renew and Beautify Your Home

Remember we lead in all of these progressive methods because we are after a large volume of business at a close margin of profit. Do not hesitate because you happen to be a little short of cash just at this time. It will afford us much pleasure to carry your account on the easy payment basis.

This new and liberal offer is for a very limited time and it will be to your advantage to call or telephone us for further free detailed information.

No matter how old or what condition your fixtures are in we will make you a liberal allowance for them in order to advertise our splendid line of new fixtures. We believe in advertising and we also believe in advertising our goods by spending money with our patrons so that they can send others to us.

Today's Feature Story

[By a United Press Staff Correspondent]

WASHINGTON, July 14.—Clifford Thorne sat in a corner of a hotel room, stretched his legs till his feet rested comfortably in the middle of the room and fired off statistics like a Roman candle shooting sparks.

The chairman of the Iowa State Railroad Commission is the greatest known container of statistics—and also one of the greatest unloaders thereof. He had just unloaded several carload lots on the Interstate Commerce Commission, but still had considerable f. o. b.

Having established beyond question that not only does two and two make four, but that two billion plus two billion make four billion and having shown the connection between these mathematics and the increase in rates wanted by western railroads, he propounded this question:

"What constitutes a reasonable rate of return?"

Not being furnished an answer, he went on:

"An error of one per cent, made by the Interstate Commerce Commission in fixing the rate of return that is reasonable is equivalent to a mistake of one billion dollars in the value on which it is held the carriers are entitled to a return. Do you follow that? If five per cent is reasonable return on the investment in railroads, an error of one per cent amounts to one-fifth. The alleged value of these western railroads is \$5,000,000,000. One-fifth of five billion is one billion—and there you are."

"It is very difficult for the human brain, with a sort of intellectual microscope, to intelligently analyze decimals of one-tenth of one per cent. We can handle with more facility variations of a hundred million dollars a year in the value of the property. One is an important as the other. The rate of return is certainly as important as the value."

If a railroad president is asked, he will say 7 per cent is reasonable. If a farmer, he says 3½ per cent. What is reasonable on government bonds is not reasonable in a manufacturing security; what is reasonable on the latter is not reasonable on railroad securities, either stocks or bonds. More than half the wealth of this nation is invested on a basis of four per cent or less. There are billions of dollars on deposit in our savings banks drawing four and three per cent; billions in government bonds, drawing less than three per cent; billions in railroad bonds drawing 4½ per cent and billions of dollars in our farms.

"While some farms earn as high as 10 and 15 per cent it is safe to say—on the records—they are earning an average of less than four per cent on a railroad. You cannot name a railroad that has been making regularly more than five per cent on the total value of its plant whose securities are not selling at or above par in ordinary years."

"The investor in the capital stock of these railroads is entitled to a higher return than the investor in the bonds and if there were in existence a colossal financial giant with the ability to purchase whole railroad systems then we might find out the rate at which they are willing to buy a railroad. But railroads are not bought individually. We buy and sell them piecemeal, by stocks and bonds. The market places of the country do not offer the best evidence of what the investing public considers to be a reasonable rate of return on the stocks and bonds of railroads."

"Taking all the stocks of our North-western group of railroads, weighing them in proportion to the amount of capital stock outstanding, their average price in the year 1914 amounted to 126½. This is a remarkable demonstration that the stocks of these companies are worth 126½ cents on the dollar in the eyes of its investing public, although it is common knowledge that a large portion of them do not and never have represented bona fide investments in the property. There is not a railroad company in this or any other part of the United States that has paid 6½ or 7 per cent dividends to its stockholders whose stock ordinarily does not sell for more than 100 cents on the dollar. The railroads of this territory are able easily to bond their property up to 65 or 70 per cent of their value. If you could secure to these railroad properties a return of 7 per cent on their total values, the stocks would be earning from 10 per cent to 15 per cent, and they will be selling—everyone of them—from 150 per cent to 200 per cent of their par value. You will be giving to these roads more than what the public says is reasonable."

Assess Investment Stock

In order to liquidate the stock of the San Joaquin Investment Company, whose affairs of high financing have been investigated by the Fresno County grand jury, an assessment of \$2 a share has been levied by the directors. It is hoped to pay off all the debts. At least some of the money obtained by S. N. Griffith with notes of the company as security may be recovered. It is reported that after all notes are paid the directors will file suit against Griffith. He has already been made defendant in a suit in Kings county brought by the First National Bank of Hanford.

Railroads Need Cars

Prosperity in the railroad world is manifested in the announcement that the Chicago, Burlington & Quincy is in the market for 4000 freight cars and the Chicago and Northwestern for 2000. Northwest lumber firms have been asked to submit bids on 25,000,000 feet of lumber to be used by these two roads.

COLLEGE YOUTHS GO TO JAIL AS RESULT OF INITIATION

NEW YORK, July 15.—To prove that they were worthy of admittance to a City College chapter of a Greek letter society, William Girdansky, Alvin Darrah and Jerome Schweitzer were directed to march through Seventh avenue from One Hundred and Sixteenth street to One Hundred and Thirtieth street at the promenade hour in attire that would have caused a riot even if their acts failed to do so.

The left trousers leg of each student was rolled above the knee. They wore odd and misfit shoes, jackets of riotous colors and fantastic hats. One played a mouth organ, another a violin and the third a cornet.

When they reached One Hundred and Twenty-fifth street the crowd became so great the police had to arrest them before they could disperse the crowd, which already was congesting traffic. The three were sent to cells in the West One Hundred and Twenty-third street station. Immediately twenty or more men offered to provide bail bonds.

When the students were brought from their cells, however, they refused to be released, saying that would debar them from the fraternity. They said they would have to go to court. As the police had been obliging in everything, there was no reason to deprive them of the joys of cell life and they were sent back to the cells to be arraigned in court on accusations of disorderly conduct.

Iowa Banks Big Borrowers

Vice-President Reynolds of Continental & Commercial National Bank of Chicago, is quoted as saying: "Iowa bankers are borrowing the heaviest of any bankers in the west. They are at a loss to explain the unusual demands. Iowa has had two bumper crops and the farmers have been full of money. The farmers have been known to be prosperous. Every one, however, commanding credit, seems to be making use of it and demands for money have exceeded all expectations. The spring automobile crop is partly responsible. Other liabilities, however, were much heavier than was suspected. Besides, farmers are making heavy loans for agricultural implements, fencing, tile and other improvements."

Unraveling a Tangle

The noteholders' protective committee of the General Petroleum Company have expressed a willingness to act with the bondholders in an effort to unravel the financial tangle of the company. This means that Andrew Weir will be eliminated. The records of the company, according to Captain John Farrison, president of the company, are at the disposal of the committee. Communications calling for deposits of bonds and certificates have been mailed to both classes of creditors.

THE SWEETEST
THING ON EARTH
is the general verdict regarding our confectionery. That you will agree with it we are absolutely certain, if you but give our candy a trial. People say they cannot tell the difference between ours and those sold at extravagantly high prices. No wonder. There isn't any difference except in the price.

OPEN SEASON ON MAYORS NOW IN INDIANA: GAME GOOD

INDIANAPOLIS, July 15.—This is the open season for mayors in Indiana. If you need recreation, come to Indiana and take a pot shot at some prosperous executive. There are a few left.

Here is the list of Indiana mayors who are either under indictment or who have been tried in the past three months:

Mayor Joseph E. Bell, Indianapolis, indicted with 127 others on forty-eight counts for conspiring to corrupt the Marion county election.

Former Mayor Don M. Roberts, Terre Haute, now in Leavenworth prison, sentenced by Federal Judge Anderson after conviction on charge of conspiring to corrupt the Vigo county election.

Mayor Rollin H. Bunch, Muncie, indicted by the Delaware county grand jury on graft charges and malfeasance in office.

Mayor George Stidger, Kokomo, indicted by the Howard county grand jury for "oppression, malconduct and malfeasance in office," but acquitted.

Mayor James Lew Watkins, New Castle, indicted by the Henry county grand jury for bribery, but acquitted.

It would be impossible to say just how many Indiana mayors, not to mention other officials, are under scrutiny at this time. The federal grand jury will soon be in session again and numerous county grand juries are working.

As each additional city joins the list, inquiring Hoosiers ask again whether these indictments and prosecutions indicate that Indiana city governments are more corrupt than cities of other states or whether a new sense of civic righteousness is sweeping over the state, causing counties to clean up cities where conditions are no worse than the average in other states.

With the indictment of Mayor Bell, Thomas Taggart, Democratic national committeeman, and 126 other Indiana politicians, including Chief of Police

Perrot of this city and Don Roberts, the previous indictments were thrown into the background. Mayor Bunch of Muncie has taken legal points of his case to the State Supreme Court and a decision will not come until October, and the Terre Haute conspiracy so thoroughly cleaned up by United States District Attorney Daily, is history.

The Indianapolis indictment, striking as it did so many prominent Indiana Democrats, has caused more state-wide bitterness than any of its predecessors. A political writer employed by state Democrats to write for Democratic papers has not hesitated to attack Prosecutor Alvah J. Rucker of Marion county and his assistant, Joseph Roach, until recently of Terre Haute. He has charged that Roach and Rucker take their orders from a source opposed to Thomas Taggart, which he ascribes as a "sinister influence."

When George M. Ray, editor of the Herald, a Democratic organ published here, printed an editorial attacking Judge James A. Collins of the Marion county criminal court, he was cited for contempt of court and of the grand jury on the application of Prosecutor Rucker. Ray's editorial charged that Judge Collins "tried to confine the grand jury until the indictments were agreed upon, but failed."

Judge Collins and Prosecutor Rucker were elected on the successful Republican ticket in the election investigated by the grand jury. The county election resulted in a Republican landslide while the state went Democratic, though with a majority somewhat reduced.

Much of the attack centered about Roach, who is the picturesque figure in the case. Roach, who admits he was a "dope" fiend, was sentenced to Michigan City prison after he had pleaded guilty to murder. While in prison Roach foresook his bad habits and began the study of law. Later Governor Marshall, now vice president, paroled and then pardoned him. Roach was the prominent figure in the various prosecutions of Mayor Donn Roberts. After Roberts landed in Leavenworth, Roach was employed by Rucker to assist in gathering evidence against Taggart, Bell and other prominent local Democrats.

Roach is a powerful man physically and of good appearance. In Terre Haute he is feared but popular. He has a reputation there of being fearless. Friends of the indicted men declare they are being "hounded by a convict."

LICENSED TO WED

Marriage licenses were issued in Los Angeles yesterday to Carl E. Hofer, 24, of Laguna Beach, and Ramona M. Strange, 21, of Los Angeles; Lawrence C. Neely, 21, and Esther W. Squires, 18, both of Santa Ana; Frederick V. Lentz, 19, of Orange, and Frances Dailey, 20, of Escondido.

We need the money and can show some real bargains in used cars that will interest you; fully guaranteed and liberal terms.

A Word With the Man Who Is Seeking a Ranch

There are three essential considerations that should enter into the location of the ranch you choose. First, it should appeal to you from a standpoint of happiness, where your family is going to be both comfortable and contented; in the second place it should appeal to you from a standpoint of health, and in the third place and more important of all it should appeal to you from a standpoint of dollars and cents in profit.

Do you know any place in California where you can buy land within four miles of a rapidly growing city of 50,000 people that has doubled its population three times within the last fifteen years? Consider the size of this, your home town, think what is the cheapest good land with water you can buy within four miles of here and you will find that it runs in the neighborhood of at least \$500 per acre. Now, if you could buy as good or better land that would raise as much or more to the acre with abundance of water delivered to your land for a total cost of one dollar per acre per year regardless of the amount of water you used, and you could buy that land at \$200 per acre and be reasonably assured of its netting you twenty-five per cent a year, you would be interested, would you not? I have exactly the above to offer, in addition it is within four miles of one of the fastest growing cities of 50,000 people in California, with a street car operating every hour to take you into the heart of this city in twenty minutes time and a fifteen-cent fare. Offering the best of stores, churches, schools, theaters, markets and all city comforts, in one of the most healthy sections of this state. You can practically buy this land upon your own terms. I have some exceptional inducements to offer the first 100 settlers, if you are in the market for good land, it will pay you to see me quick.

SWEETHEART OF JESSE JAMES ON STAND IN IOWA CASE

BEDFORD, Iowa, July 15.—A romance buried beneath half a century of memories was brought to light here in the trial of four gray-haired old men charged with a murder committed in 1863.

Mrs. Marie Porter, one-time sweetheart of Frank James, famous bandit leader of the James gang, on the witness stand at the trial defended the lover of her childhood days. He was accused of complicity in the crime.

As a young girl, Mrs. Porter washed the blood-stained quilt which the James gang had wrapped around the bodies of the men they had slain and robbed of \$90,000, which they later buried.

The court room was crowded with a curious throng as the aged woman took the stand. Feeble and worn by years of hard work, Mrs. Porter appeared confused as she was asked to take the stand.

"Frank James wasn't in this shooting affair. I don't want him mixed up with this. He was a friend to me—he came a'courtin'—and I don't want him in this."

"One day with another girl I found a cave close to home. All over the floor were new dimes and halves. Two months after I saw four men tugging at a blanket. Underneath I saw a man's leg. One of those four men was Jonathan Dark, my brother-in-law. He's dead or I'd never tell. He made me swear I'd never tell. 'If you do,' he said, 'we'll wash our hands in your heart's blood.'"

NEWS LETTER OF GARDEN GROVE

GARDEN GROVE, July 13.—Mrs. Mary T. Newcomer and her niece, Miss Hazel Srailey of Long Beach, accompanied by their friend, Mrs. Mason of Los Angeles, walked from Long Beach to Garden Grove Saturday in three hours. They visited at the home of Mr. and Mrs. W. H. Newcomer Saturday and Sunday, returning to Long Beach Monday.

Mrs. Emerson and children and Mrs. Henry Russell and children are enjoying a week's outing at Newport Beach. Jesse Hardy of Fallbrook and Mr. Vesbit of Pomona, visited at the home of Mr. and Mrs. C. B. Henry Saturday and Sunday, returning Monday.

Miss Ruth Collins of Santa Ana was also a Sunday visitor at the Henry home.

Mr. and Mrs. Wyant of Fresno spent the week end with Mr. and Mrs. James Henry.

Mr. Lake and family spent Sunday at Laguna Beach.

Bud George and Mr. Redmond went on a fishing trip to Laguna Tuesday.

Mr. and Mrs. Lake motored to Los Angeles Monday.

Miss Ruth Violett went to Los Angeles Monday to begin piano lessons with Prof. Gruen.

Malcom Wharton went to Seal Beach Monday with a load of furniture for the recently completed bungalow. He expects to spend some time there with Paul Davis of Santa Ana as his guest.

George Steidinger is steadily improving and will be around again in a week or two.

Rev. F. P. Rossetol, who owns a ranch northwest of Garden Grove, has accepted a call to the United Brethren church at Santa Ana. Rev. Rossetol has been pastor of the Hollywood church of that denomination, but his wife's health makes it necessary to be nearer home.

Dorothy and Marion Hosking of Los Angeles, nieces of Rev. William Phomas, were visitors at the Thomas home last week while their parents were at the San Diego fair.

Miss Christobel Thomas made a business trip to Los Angeles last Friday.

Mr. Waltz returned to his work at Simons Sunday, after a week's visit at home.

Miss Isabel Thomas of Los Angeles was home for a short stay Sunday.

Mr. and Mrs. Emmons entertained a cousin, Miss Hibbard, from Ohio. She spent several days in our vicinity.

KEEP THE KIDNEYS WELL

Health Is Worth Saving, and Some Santa Ana People Know How to Save It

Many Santa Ana people take their lives in their hands by neglecting the kidneys when they know these organs need help. Weak kidneys are responsible for a vast amount of suffering and ill health, the slightest delay is dangerous. Use Doan's Kidney Pills—a remedy that has helped thousands of kidney sufferers. Here is a Santa Ana citizen's recommendation.

Martin O'Meara, 518 East First St., Santa Ana, says: "I have never used anything for kidney trouble as satisfactory as Doan's Kidney Pills. I had that complaint for a long time. The kidney secretions pained in passage and I had to void them during the night. Whenever I use Doan's Kidney Pills, my back gets stronger and the trouble with the secretions is removed."

Price 50c at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. O'Meara had. Foster-Milburn Co., Props., Buffalo, N. Y.—Advertisement.

She came to California by way of San Diego and started Wednesday on her return by way of San Francisco.

Mrs. M. E. Saylor and her friend, Mrs. Lambert, of Kansas City, Mo., lunched with Mr. and Mrs. Barnes Friday.

Mr. and Mrs. Tubbs, in company with their son and wife from San Pedro, returned Monday from San Diego.

Mrs. Emmons, who has been quite sick for several days, is able to be up and around again.

Mrs. Lola Covington of Pasadena is visiting her aunt, Mrs. F. M. Waltz for a few days.

Miss Pearl Stone has just returned from a trip to the northern part of the state. She attended the S. D. A. North American Division, Council of Educators and Missionary Volunteers. About two hundred and fifty delegates from all parts of the United States for Canada were present at this council, held at the Pacific Union College, St. Helena, June 4 to 14. June 15 to 26 the Pacific Union Conference, which includes the states of California, Nevada, Utah and Arizona, held an educational convention at the same place. Miss Stone was one of about two hundred delegates at this convention. On her way home she visited friends in Oakland and spent some time at the exposition.

Mrs. P. M. German and daughter, Constance, spent Tuesday in Los Angeles.

The opening of the Japanese Mission at Garden Grove was a great success in every respect.

A large company of Japanese, as well as Americans met to dedicate the opening of the mission, which was formerly the Mennonite church building, Sunday afternoon, July 12. The building and the ground on which it stands was purchased recently for an interdenominational Japanese mission for Garden Grove and vicinity.

The following program was given with Rev. C. C. Violett presiding:

After the opening hymn and invocation by Rev. Thomas and Doxology, Rev. Shibata read the scripture, followed by prayer by Rev. Hata. The offering was then taken and after another song Rev. Ban of Santa Ana gave the opening address followed by an address of welcome from Rev. Thomas, which was responded to by Mr. Sasaki.

Rev. Schrock of the Congregational church of Santa Ana gave an address, after which Mr. and Mrs. P. M. German sang a duet.

The sermon of the afternoon was given by Rev. Hata, missionary for Southern California for interdenominational work among the Japanese, followed by closing remarks by Rev. Hata, Baptist missionary at Moneta, who spoke on the work in this vicinity.

After the closing hymn and benediction by Rev. Schrock according to the Japanese custom refreshments were served. The sermon by Rev. Hata is as follows:

One thing thou lackest. Come follow me. Luke 18:21.

The narratives of this young man in the synoptic gospels reveal to us that he was rich, had a high position among his people, and ruler and was a man of high moral character.

1. He was rich. We who are brought up under the Buddhist training which exalts loyalty and filial piety above all other graces and disdains the accumulation of wealth, are naturally inclined to despise the rich as a miser. As you all know in olden times our people were divided in four classes—ranking the business men as lowest because their life was after wealth. However this idea swung to another extremity just like a pendulum, and seems to me as if they all are after gold. Wealth is necessary to better our lives and to improve the social condition and for the advancement of our civilization. Suppose you were born in a slum district of a large city, you should not be what you are now. As a proverb says, "when poverty comes in from the door, happiness flies away through the window. Wealth is needful for a happy home but we must be careful not to run either extremity."

2. He was a ruler. The man's greatness is known by the depth, height and extent of his personal influence. Caesar and Napoleon for instance, had influence among men of their days, but it died with them, though they may have some worshippers among a few of our day who believe in militarism. On the contrary, the personal influence and power of our Master is ever increasing and deepening and His kingdom is from everlasting to everlasting. He is the greatest among men. He was given the name which is above every name—that at the name of Jesus every knee should bow of things in heaven, and things in earth and things under the earth.

We all wish to stand high in society, in profession and in everything we undertake. This young man had the honor of being such a man.

3. He was a moralist. We esteem more men or women of pure character and guileless life, however lowly they may be in their daily walks, than the man of wealth and of high position whose life is stained with impurity and moral corruption. Jesus said to the young man: "Thou knowest the commandments. Do not commit adultery. Do not kill. Do not steal. Do not bear false witness. Honor thy father and mother."

Then the young man said: "All these things have I observed from my youth up."

I think only very, very few of us can answer thus to our Master. He led from his boyhood up to his manhood a clean undefiled life. But mark you, all these things, wealth, position and morality did not follow Jesus. I am aware some of you, have, like this young man, accumulated wealth, have some influence among your fellow men, and strive to live blameless lives, but that is not sufficient. You lacked one thing, and that was a place of worship. A center for your spiritual training; you need religion no matter whether you care for it or not just this moment. And this one thing was supplied by the generosity of American friends of this town. The only way you can show your appreciation

of their kindness will be that you make the best use of this house, a token of their love. May none of you turn away from this place sorrowfully, but each one of you come out as a faithful follower of Jesus Christ, is my sincere prayer.

The above sermon was given to the Japanese in their language and all Americans present wanted to know what he said, so he translated it for me. I wish you could find room to publish it.

Mrs. Charles Lint and baby daughter left Thursday for China to spend a few days with her husband who has a position there.

Mrs. Mott and Mrs. Beardsley spent Wednesday with Mrs. Vienna Donelson. For the past ten years these three Kansas friends have come together once a year for an annual dinner and social time.

Mr. and Mrs. Willard I. Cain entertained several other members of the Cain family at their home on West Ocean avenue Saturday night. Those enjoying the pleasant evening were:

Mrs. Allie Cain, mother of the host, and her son and daughters, Homer and Oneta and Mr. and Mrs. Morris A. Cain.

A truck load of Garden Grove people attended the camp meeting at Huntington Beach Wednesday evening.

Mr. and Mrs. Lentz, accompanied by Mrs. Schimming of Anaheim, met with quite a serious accident while turning the corner by the post office on their way to Santa Ana by machine Wednesday about 2 p. m.

Mr. Lentz was driving at about 15 miles an hour and might have made the turn successfully had not another machine been standing on the corner.

It is generally understood that no blame can be attached to the accident apart from Mr. Lentz trying to make too short a turn at too great a speed.

His machine came in contact with the telephone post, smashing the windshield, crushing the radiator in, breaking one lamp and the crank, the axle also being sprung.

Mrs. Lentz received quite a severe cut on the lip and injuries about the face, which caused a violent nose bleed. The lady was assisted to a room back of the post office where she was attended by Dr. Dodge.

The doctor reports the injuries were slight. This is the third or fourth machine that has come in contact with that same post in the last year or two, while turning that corner.

Mrs. Watts and son, John, from Huntington Park, are spending a week with her sister, Mrs. Sandman.

SUMMER ACHES AND PAINS

That backache or stiff muscle that cannot be explained on account of having "sat in a draft and caught cold" is more than likely the result of weakened or disordered kidneys. Foley Kidney Pills promptly relieve backache, sore, swollen or stiff muscles and joints, rheumatism, and sleep disturbing bladder ailments. They put the kidneys in sound, healthy condition, and help them eliminate uric and other poisons from the system. Rowley Drug Co.

NOTICE FOR PUBLICATION OF TIME FOR PROVING WILL, ETC.

In the Superior Court of the County of Orange, State of California.

In the Matter of the Estate of Fred G. Strech, Deceased.

Notice is hereby given that Friday, the 23rd day of July, 1915, at 10 o'clock a. m. of said day, at the Court Room of Department No. 1 of this Court, in the City of Santa Ana, County of Orange, State of California, has been appointed as the time and place for hearing the application of Ellen Jane Strech, praying that a document now on file in this Court, purporting to be the last Will and Testament of the said deceased, be admitted to probate, that Letters Testamentary be issued thereon to her, at which time and place all persons interested therein may appear and contest the same.

Dated July 8, 1915.
W. R. WILLIAMS, County Clerk.

BRITISH CENSORS DELETE ALL
RUSSIA PEACE RUMORS

NEW YORK, July 15.—Letters received from the United Press Berlin correspondents indicate that the British censor is carefully eliminating from the news dispatches all references to Russia possibly negotiating a separate peace. Mailed articles duplicating the cabled dispatches contain numerous references to separate peace rumors. All were deleted from the cables.

SHORT STORIES

Federal Trade Board, on its swing around the circle, will include Los Angeles in its itinerary.

A new canner in Florida will can cucumbers and beets.

Liverpool Journal of Commerce says that ten months' period of war has witnessed loss of about 450,000 tons of warships, costing \$23,000,000.

Since the war began the number of workers at the Krupp works in Essen has increased from 70,000 to 115,000. Opinion prevails there that production of 42-centimeter guns is merely a prelude to the manufacture of other heavy guns of immense range.

Goodyear Rubber Company has added five acres of working floor space to its Akron plant. When the new buildings are completed the plant will turn out 15,000 tires a day.

For the first time in years Brazil has ordered locomotives from this country, the American Locomotive Company taking an order for six standard engines for the Central railway of Brazil.

The American Locomotive Company has given orders to start the Cooke plant at Peterson, which has been operating at practically the lowest percentage of operations in years. The plant will run in full working order for the first time for twenty large engines from Belgium.

The Russian government has given the Baldwin Locomotive Works an order for 57,400 car wheels, mounted on axles, deliverable in 90 days.

Argentine butter exports for the fiscal year are 100,000 cases above the same period last year.

Of Italy's exports 13.7 per cent go to Germany and 16.8 per cent of her imports come from that country.

The rate of insurance against "aircraft bomb risks," current at Lloyd's after the recent Zeppelin invasion of London's metropolitan area, was five shillings for £100 on all ordinary premises.

In August, 1914, Germany's iron output was only 37.4 per cent of its normal production in time of peace. Last March it was 60.2 per cent. Steel output had risen from 30.4 per cent to nearly 70.

The H. C. Erick Coke Company has issued orders for the firing of 400 additional coke ovens in the Connellsville, Pa., district. The order includes fifteen plants, a number of which have been idle for months.

JOY-RIDING OF TWO ON BIKE BUILT FOR ONE BRINGS DISASTER

Joy-riding with a woman on the handle-bars has been added to the list of the various kinds of joy-rides.

As a result of the particular joy-ride that has found its way into Justice Cox's court, Leslie Darling, alleged to be stabbed or slashed on the right hip. He has sworn to a complaint against W. M. Jones, who lives on East Third street east of the Santa Fe, charging Jones with an assault with a deadly weapon with intent to commit murder.

The charge is a serious one. Jones was put in jail today. His preliminary examination was set for July 17 at 9 o'clock, and his bond was fixed at \$1,000.

City Marshal Jernigan and Officer Ryan received official knowledge of the case Monday night when it was reported to them that a man had been cut with a knife.

The fracas was reported to have occurred on East Fourth street. As they got it, Darling was riding along on a bicycle with a woman on the handle-bars when W. M. Jones interfered. They were also informed that Darling had felt the effects of a knife.

Policeman Ryan brought Jones to the city hall. Jones denied using a knife. He said that if Darling was cut it must have been with Jones' finger-nails.

Darling could not be found. However, he showed up at the court house and a warrant was issued for Jones. In court today Jones said he used no knife. He said Darling might have been hurt in the scuffle.

Jones stated that Darling came here about six weeks ago from Arizona.

To Better Oil Industry

Speaking of the meeting of oil men called for Saturday, July 10, at Taft to take action looking to remedial legislation which will aid the oil industry, the Petroleum Reporter of Taft says:

"Saturday, July 10, has been set as the date for the oil men's big get-together meeting at the Petroleum Club in Taft. And while this will be a get-together meeting it means even more, for it is the start of a movement which promises to be fruitful. At the same time it will without a doubt bring about recognition of the oil industry from those who have heretofore looked upon it as being but a side issue of the mining game. Working individually none can convince the authorities that an injustice is being done in the way the withdrawal of 1909 has been handled. In an organized body, with the facts presented backed by all oil operators, the government officials are certain to recognize the strength and give credence to the ideas of those who really know."

"With all apologies to the officers of the government, we believe the operators will be treated unfairly. But we further believe fairness would predominate if it were that the oil men of the fields would stand together and show officials right from wrong. Certainly these officials do not in any way desire to be a representative in their handling of the situation, though at present it appears they are taking all in a big sweep. In the future, however, appears a representative body, which can be brought about by organization of the men of the fields."

"This organization can only be effected by oil operators showing the proper interest, either by being present at the meeting at the Petroleum Club or sending a representative. In case neither is possible, a letter expressing an idea of what should be done would assist those at the head of the movement in carrying out the plan to the betterment of all. You are but one of the many in the fields, and whether you are interested or not, you are needed. Be present."

Third Largest Oil Producer

Illinois held its own in 1914 as the third state in the union in the production of petroleum, with a total of 21,919,749 barrels, according to the statement just made public by the United States Geological Survey, which compiled the statistics in co-operation with the Illinois State Geological Survey. This was a decline of 1,744,150 barrels compared with the output in 1913, but it indicates a notable improvement in production with the decline of 18.45 per cent of the previous year and tends to confirm the opinion that the state has passed the stage of rapid decline in the production of its present oil fields and has entered on a period of settled production with gradual decline, subject, however, to fluctuations resulting from the possible discovery of new pools.

The average price was \$1.16 a barrel, a price that compares favorably with the average of \$1.29 a barrel in 1913 and is notably higher than the average of \$0.851 a barrel in 1912. The total value of the Illinois production in 1914 was \$25,426,179 at the wells, exceeding the value of the 1913 production, which was \$20,900,000 barrels greater, by more than a million dollars.

Stocks of Illinois petroleum increased during the year from 8,243,421 to 13,563,743 barrels, 2,000,000 barrels less than at the end of 1912. The increase resulted to a great extent from the overstocking of refineries ordinarily handling Illinois petroleum with crudes from other states.

Field activity in Illinois in 1914 resulted in the completion of 1579 wells in 21 counties. Of these wells, 107, or nearly 74 per cent, yielded an average initial daily oil production of 33.75 barrels a well. Twenty-eight were gas wells. The total number of wells recorded as having been drilled for oil in Illinois prior to January 1, 1915, is 24,566, of which 2159, representing 12.3 per cent, were unsuccessful.

OIL AND OIL FIELDS

The United States tank steamer Kanab, from Mare Island, loaded 65,000 barrels of oil at San Pedro for the Atlantic coast. The oil was from storage at El Segundo refinery.

An oil rig is being erected on the D. W. Griffith ranch just east of San Fernando. The well to be put down is a test one in that locality.

A benzol plant has been established by the Sydney (Nova Scotia) Steel Mills, the product being converted into toluol and naphthalene.

STORY TELLING FOR CHILDREN IS TO START SATURDAY

Arrangements have been made for starting a story-telling department for children at the Public Library. The first of the stories will be told at 2:30 o'clock next Saturday afternoon, and others will be told once a week throughout the summer.

At the final meeting of the Parent-Teacher Association of the Intermediate school, the advisability of conducting a story-telling department was discussed, and a committee, consisting of Miss Hazel Jemus, chairman, Mrs. Wicks and Mrs. Violet, was appointed to undertake the organization of the work.

This committee has done its preliminary work and is now ready to start the course. Miss Jemus has visited the Los Angeles library, where story-telling classes have been conducted by the library once a week for the last two years, and made a careful study of the system followed there. She also secured lists of books for children and parents and books to be read to children by parents. One of these lists is that given out by the Los Angeles library, another by the library at St. Louis, Mo., and a third by the library at Jacksonville, Fla.

There will be two classes at the Santa Ana library next Saturday afternoon at 2:30. One of these classes will be for children of the ages found in pupils of the fifth, sixth, seventh and eighth grades, and the other for the primary grades. Children are invited, whether or not they attend the Santa Ana schools.

To each class some story will be told. Suggestions will be given for reading at home of other stories. With this supervision, it is believed that the kind of reading that children do can be guided. It is hoped that parents who do not pay much attention to what their children read will become interested.

Under the plan of the committee, the story telling will continue throughout the summer, once a week. The day or the regular meetings of the classes has not yet been selected. Those who are furthering this work hope that it will not be discontinued with the opening of school. It is also hoped by the committee that the work will be continued either under the supervision of the Public Library or through some arrangements that may be made by the board of education.

IN THE JUSTICE COURT

MAY AUTHORIZE WARRANT FOR CONSTABLE

Justice Cox Gives Verdict of Not Guilty In Trial of Ernest Rentz

With the completion of the trial of Ernest Rentz upon a charge of battery against Constable Eugene Davis of Huntington Beach, Justice Cox rendered a verdict of not guilty. Immediately thereafter Rentz and his attorney, Cate, asked District Attorney West to authorize the issuance of a warrant for the arrest of Davis on a battery or an assault charge. The district attorney has the matter under consideration. The indications are that the warrant will be issued.

According to the evidence received in Rentz's trial, Rentz was intoxicated. Constable Davis decided to lock him up. Davis says that Rentz made "pass" at him with his fist. Davis was not struck.

Several witnesses stated that Davis

THIN FOLKS WHO WOULD BE FAT

Increase in Weight Ten Pounds or
More

A Physician's Advice
"I'd certainly give most anything to be able to fat up a few pounds and stay that way," declares every excessively thin man or woman. Such a result is not impossible, despite past failures. Thin people are victims of mal-nutrition, a condition which prevents the fatty elements of food from being taken up by the blood as they are when the powers of nutrition are normal. Instead of getting into the blood, all the fat and flesh producing elements stay in the intestines until they pass from the body as waste.

To correct this condition and to produce a healthy, normal amount of fat the nutritive processes must be artificially supplied with the power which nature has denied them. This can best be accomplished by eating a Sargol tablet with every meal. Sargol is a scientific combination of six of the best strength-giving, fat-producing elements known to the medical profession. Taken with meals, it mixes with the food and turns the sugars and starches into rich, ripe nourishment for the tissues and blood and its rapid effect is remarkable. Reported gains of from ten to twenty-five pounds in a single month are by no means infrequent. Yet its action is perfectly natural and absolutely harmless. Sargol is sold by good druggists everywhere and every package contains a guarantee of weight increase or money back.

Caution:—While Sargol has produced remarkable results in the treatment of nervous indigestion and general stomach disorders, it should not, owing to its remarkable flesh producing effect, be used by those who are not willing to increase their weight ten pounds or more.—Advertisement.

clubbed Rentz on the head with a revolver. One witness said that Rentz was first struck when he was sitting down, the blow following his refusal to get up when he was ordered to do so by Davis. Another witness said that while Dan Ross and Frank Catchings were helping Rentz along, each having hold of one arm, Davis struck Rentz twice on the head.

"I cannot see that there is evidence here to convict Rentz of battery," said Justice Cox, "and the decision of the court is in his favor."

Says He Was Married
Dioniso Corchado, a Mexican who formerly lived at Placentia, was arraigned today on a felony charge, and his preliminary was set for July 30. Corchado is charged with running away with Annie Gutierrez. He stated this morning that the girl's parents told him she was 18 years old. He says that about a year ago he got a marriage license in San Bernardino and that he and the girl were married at Redlands. The girl's father in the complaint alleges that she is but 15 years old now.

Burglary Charge
Bernardo Castillo was brought to jail yesterday by Constable Murillo of Los Angeles. Castillo is charged with burglary, the stealing of a bicycle from Adrian Cabara's poolroom at Los Alamitos. According to Murillo, the bicycle was traded for a horse. Castillo's preliminary is set for July 21.

Embezzlement Charge
J. W. Roberts was arrested in Los Angeles yesterday afternoon on a complaint sworn to by J. A. Speer and charging Roberts with having embezzled \$17. The two men have been getting out the program for Clune's Theater. It is alleged that Roberts collected for advertising in the program and failed to turn in the money. Roberts left for Los Angeles on the 4:25 car yesterday afternoon. Los Angeles police were notified to arrest Roberts. Officer Pond went to Los Angeles and brought Roberts here.

Neckties Galore
Hipolito Sepulveda, a sugar factory electrician, used to have more neckties than any other man in Santa Ana. At least, if anyone outside of a store owner owned more at one time, Justice Cox does not know his name. This morning Sepulveda testified that seventy-five neckties, worth \$35, were stolen from his room at Delhi. A violin and other articles were also stolen. He says that he and Fred Soto are accused of the burglary. They were held to answer. A witness stated that he saw them in the vicinity of the house.

Fined \$50
Van Horn, driver of a Union Oil Co. truck at Olinda, was today fined \$50 for driving the truck on the county highway, damaging it by reason of the fact that two of the tires were off the wheels.

AT THE COURT HOUSE

Suit on Note
Today G. A. Edgar brought suit against R. L. Forsyth, formerly a hotel man of Santa Ana, on a note for \$500.78. The complaint, filed by Attorney Clyde Bishop, states that in 1910 Forsyth owed a number of bills here. It was agreed that the note should be given in payment of the bills. J. A. Turner being named as trustee. The note has been assigned to Edgar by the consent of those interested so that he could bring the action.

Case Dismissed
Today Attorney Cronk filed a request for the dismissal of the action of Thomas Yates against C. W. Stover, stating that the mortgage upon which action was brought has been fully satisfied.

Marriage License
Edward L. Vegely, 40, of Santa Ana, and Katherine Barber, 32, of Council Bluffs, Ia.

'DEATH SIGN' FAILS TO SCARE MAGISTRATE

NEW YORK, July 15.—"You cannot scare me," said Magistrate McQuade on the Tombs Court as Alfred Lotario, a cigar maker, awaiting sentence for disorderly conduct, glared at him and drew his right hand across his throat—the "death sign."

"I'm just fixing my tie, but I want a square deal," the prisoner answered. "Three months in the workhouse," said the magistrate.

EDEN MUSEE, SEEN BY 12,000,000, IS CLOSED

NEW YORK, July 15.—The Eden Musee, known throughout the world for its figures of famous folk in wax, has closed its doors at No. 55 West Twenty-third street.

A voluntary petition in bankruptcy, giving liabilities of \$17,568, with assets doubtful, was filed by the directors.

It is estimated the Eden Musee has been visited by twelve million persons.

GIRL HURT BY AUTO LEAP SUES HER HOST

NEW YORK, July 15.—Miss Sadie Fagan, a resident of this city, through a guardian, sued David Judson, a large canal engineer, for \$25,000 damages.

She alleges Judson invited her to dine with him in Albany and to take an automobile ride. She charges that he tried to take her "to some house or other," and she was permanently injured in escaping. Judson denies the charge.

Eradicating Cattle Tick
It has cost the State of California \$2.46 per square mile to rid the state of the cattle tick, of which sum the federal government paid \$1.06 and the balance. Only a section of San Diego county is now infested. The campaign to destroy the tick was begun in 1907. Since then a total of 73,97 square miles has been disinfected. This has cost the federal government \$2,822, the state \$23,523, the California counties \$35,983.

LOCAL OPTION
SPRINGFIELD, Mo., July 15.—At least fifteen local option elections will be held in Missouri towns before the first of the year.

Auto Service Stand, White Cross Drug Store. Both phones 42. Special trip anywhere at any time. Prices reasonable. R. A. Harlow.

Dr. Wilcox has moved to Padgham's Jewelry Store, where he is better prepared than ever for making glasses on short notice.

'BLUE SKY' LAW OF CALIFORNIA PROVES SELF SUPPORTING

SACRAMENTO, July 15.—The first semi-annual statement of receipts and disbursements of the State Corporation Department rendered to the state treasurer and secretary of state by Commissioner of Corporations H. L. Carnahan shows that the fund of \$10,000 appropriated for the purpose of organizing the department for administration of the Blue Sky law has been drawn on to the extent of but \$3.96.

The department is permitted to spend not to exceed \$50,000 a year, providing that the fees reach that amount. For the first six months the total receipts, including \$331.55 excess fees which was returned, amounted to \$1,720.65, while the disbursements, including the salaries of the commissioner of corporations and all employees, traveling expenses, furniture, supplies and other office expenses, totaled \$11,724.01, leaving the \$10,000 state fund appropriated to start the department practically intact.

Under the fee system, the tax on corporations making application for permission to sell their shares or other securities averages about one-hundredth of one per cent of the par value of the securities proposed to be sold. Agents pay a fee of \$1 per year and investment brokers \$5 per year.

COFFIN FROM HEARSE HITS GIRL IN A CAR

NEW YORK, July 14.—Mrs. Anna Clark of Corona, L. I., was a passenger in a trolley car when it collided with a horse-drawn hearse at Second avenue and Fifty-second street.

She sprang up, stuck out her head and cried: "Oh, my!" just in time to be hit by the coffin, which was hurled forward by the force of the impact. The woman was not seriously hurt.

TWINS, 86, ROCKED IN THEIR OLD CRADLE

MIDDLETOWN, N. Y., July 14.—NEW YORK, July 15.—Miss Anna Mrs. Nathan V. Brand of Leonardsville, who claim the distinction of being the oldest twins in the state, celebrated their eighty-sixth birthday together, with some unusual features. The cradle in which they slept as children has been preserved and the twins were rocked in it in the presence of the guests.

Oil Wells Mile Deep

The deepest well in the world is in Upper Silesia, in the German empire. It is a diamond-drill hole in a coal field and is 7350 feet deep. A well in the United States which may go deeper, according to the United States Geological Survey, is four miles northwest of McDonald, Pa., and about 15 miles west of Pittsburgh. This well, which is being sunk to the Medina sandstone—a bed that elsewhere contains oil and gas—is now 7174 feet deep. Some gas and oil were struck in the upper part of the well. Between the depths of 6820 and 1100 feet rocks bearing rock salt and salt water were encountered. These are regarded as of Salina age, the same as those carrying rock salt in western New York. The temperature in this well at the depth of 6775 feet, as recently determined with great accuracy, is 145.8 degrees Fahrenheit.

At Derrick City, McKean county, Pa., near Bradford, there is a well 5820 feet deep, which is probably the second deepest well in the United States. Another deep well is on Slaughter Creek, Kanawha county, W. Va.; it is 5595 feet deep. It penetrated a sandstone at 5030 to 5050 feet, and from this depth to the bottom, a distance of 545 feet, the well is in limestone. Near West Elizabeth, Pa., there is another well 5575 feet beneath the surface, penetrating into a black shale. Another deep well is being drilled at Gaines, Pa. This has already reached a depth of 5500 feet. Deep well drillers in this country of course employ the most improved and effective rigs, but one of the most remarkable of wells, reaching a depth of 3600 feet, was drilled for petroleum in western China by means of such crude appliances as a cable made of twisted strands of rattan.

SANTA ANA, CALIFORNIA, THURSDAY EVENING, JULY 15, 1915.

CATALINA ISLAND Y. M. C. A. CAMP IS POPULAR WITH BOYS

Although the time for the Orange County Y. M. C. A. Camp at Catalina Island, is nearly a month away, about a dozen boys have already signed up to go this year.

It was feared that the two expositions would interfere with the attendance of the boys at camp this year, but while a number are going to the expositions, the inquiries that are being made and the interest shown by the boys over the county indicates that the limit of fifty boys for this county will be secured very soon.

One unusual thing is that of the boys already enrolled, hardly more than one is of the same community, seven different communities being already represented. Last year twelve communities were represented, and there is no doubt that this number will be even larger this year.

Parents Satisfied
One of the best evidences of the popularity of the camp with the boys and the satisfaction of the parents is the fact that the majority of those boys who are signing up and of those intending to go, are the ones who have been there before, some as many as two or three times.

Another evidence of popularity is found in the fact that those communities which had one or two boys last year are furnishing two or three times as many this year. Santa Ana of course leads in number of boys attending, having last year sixteen boys, and if it were so desired the entire number could be secured from Santa Ana alone, but it is the purpose of the camp committee to have as many communities represented as possible and for this reason the advertising is not being pushed in those sections which have heretofore furnished the larger numbers.

Physician
Not because there has ever been found any special need for one, but to enable the parents of the campers to feel easier, Dr. Nat. Burkovitz of the Los Angeles County Hospital, will take his vacation at camp and will serve as camp physician. He will be supplied with a hospital tent and will have special equipment in case any one should need attention.

In all the eight years of the camp, there has never been a serious accident. By many who have visited the camp and have taken notice of the efficient organization and careful management and supervision, the assertion has been made that the boys are really safer at camp than they are at home.

Opens August 9
The camp begins on August 9, and continues till August 21. The camp fee is \$9 and the transportation amounts to \$3 more, making \$12 as the total necessary expense. Any parents who desire the finest kind of an outing with the best moral environment, and the most careful supervision for their boy, may arrange to send him by communicating with T. M. Brown, county secretary of the Y. M. C. A., Santa Ana.

WILLYS-KNIGHT SETS MOTOR PRECEDENT

Announcement is made in this paper of the new car that is being put out by the Overland factory. It is called the Willys-Knight and is the first car put out with a Knight motor, at a medium price. In speaking to a party of some fifty Overland agents at a banquet in Los Angeles last week, Charles Y. Knight, the inventor of the Knight motor, said: "The Knight sleeve-valve motor has been extensively manufactured in Europe for several years and some of the leading motor car manufacturers of America have been making them with great success, but none have yet reached the perfection to be found in the motor put out by the Willys factory."

AUBURN OWNERS TO HOLD PICNIC IN PARK

That there are fifty Auburn owners in and around Orange is the statement of W. J. Burt of the Burt Motor Car Company in announcing the Auburn picnic for the county park on July 25. "I have looked this country over very carefully and do not know of another spot so suitable for such an occasion," said Mr. Burt.

CHEVROLET WINNING MANY FRIENDS HERE

The Chevrolet, one of the first to announce a reduction in price on 1916 models, has already made a large number of friends locally and indications are that Waffle & West, Santa Ana agents, will run up a good season's sales. The most recent purchaser of a Chevrolet is J. Flood Walker, who during the past week has had delivered to him a "Baby Grand" touring car.

CLARENCE ROWLAND, (right) the new manager of the White Sox, shares honors with Collins (left) for whom the Chicago team paid the record price in baseball history. A few weeks ago Rowland was unknown; today he is famous and credited with having almost supernatural powers in controlling his players and their plays. Last year Rowland was the manager of the Peoria, Ill., team in the "Three-I" League and his team finished second. In the few weeks of his big league experience he has established himself as one of the best baseball leaders ever produced.

SANTA ANA'S JITNEY ORDINANCE

Following is Santa Ana's new "Jitney" ordinance, which was passed by the board of trustees Monday night and which went into effect yesterday:

Section 1. It shall be unlawful for any person, firm or corporation maintaining or operating any motor vehicle for hire to keep, deposit, store or stand any such vehicle on that part of Fourth street of said city between its intersection with Bush street on the East and its intersection with Sycamore street on the west or on that part of the east half of Main street from its intersection with Fifth street on the north to its intersection with the alley between Third street and Fourth street on the south or on that part of the west half of Main street from a point 110 feet north of the curb line produced on the north side of Fourth street to the alley between Third and Fourth street on the South.

Sec. 2. It shall be unlawful for any person, firm or corporation to deposit, store or stand any motor vehicle, for a longer period of time than three consecutive minutes on that part of the south half of Fourth street from its intersection with Main street on the east to a point 75 feet west from the curb line on the west side of Main street produced, or on that part of the north side of Fourth street from its intersection with Main street on the west to a point 75 feet east from the east curb line of Main street produced.

Sec. 3. It shall be unlawful for any person, firm or corporation maintaining or operating any motor vehicle other than for hire to deposit, store or stand said vehicle on that part of the west half of Main street, commencing at a line at right angles with the curb at a point 110 feet north of the curb line on the north side of Fourth street produced, to the intersection of said Main street with Fifth street on the north.

Sec. 4. It shall be unlawful for any person, firm or corporation

maintaining or operating any motor vehicle for hire to carry or convey with said vehicle more than two persons at any time in excess of the factory rating of the capacity of said vehicle including the operator or driver of said vehicle.

Sec. 5. It shall be unlawful for the driver or operator of any motor vehicle for hire to smoke tobacco or other weed or mixture of a similar nature while operating said vehicle within the city limits of said city.

Sec. 6. It shall be unlawful for any person, firm or corporation to operate any motor vehicle including motorcycles within the city of Santa Ana, unless the said vehicle shall have a muffler thereon and the same shall be closed so as to deaden the sound of the exhaust from said vehicle.

Sec. 7. Any person, firm or corporation who shall violate any of the provisions of this ordinance shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined not to exceed \$100.00, or shall be liable to imprisonment in the city jail not to exceed fifty days or shall suffer both said fine and imprisonment at the discretion of the court.

Sec. 8. Any person other than the owner in charge of any vehicle who shall violate any of the provisions of this ordinance shall be guilty of a misdemeanor and upon conviction thereof shall be punished in the manner and to the extent provided in Section 7 hereof, but this section shall not affect the liability to punishment of the person, firm or corporation owning such vehicle.

Sec. 9. Any ordinance or ordinances in conflict with this ordinance or part or parts thereof as it affects this ordinance is to that extent hereby repealed.

MARYLANDER IS FINED FOR RUTTING HIGHWAY

The first case in Maryland of a man being charged with operating a motor vehicle without due regard for wear upon the highway was tried in Baltimore July 2. Clarence Thornburg, a chauffeur for the Pierce-Arrow Company, was fined \$25 and costs. He ran a motor truck over the asphalt of one of the main thoroughfares. Two of the wheels were without tires and the fenders cut into the paving, causing damage amounting to about \$10.

ELEVEN '16 OVERLANDS ALREADY SOLD HERE

P. L. Austin, Overland agent, reports the sale of two of the new 1916 Overland four-cylinder cars this week. The purchasers were Roy Labadie and Edna L. Miller, both of Huntington Beach. This makes a total of eleven sales since the new model came out a few weeks ago and leaves Mr. Austin without a single car in stock and customers waiting. Another shipment of Overlands is expected to arrive soon.

WORK OF PAVING EAST FIRST IS TO START IN FEW DAYS

Paving operations on East First street, from the Santa Fe tracks eastward to the east city limits at Maybury street, are expected to begin shortly.

It was stated this morning by C. F. Bennett, one of the committee of East First street property owners having in charge the circulation of private contracts calling for the surfacing of a twenty-foot strip in the center of the street, that all the contracts would probably be signed by this evening.

The contracts are being circulated for M. W. Crandall, who will do the work. Bennett states that it is certain every property owner will sign and that none of the work will need to be done under Vrooman proceedings. The city has agreed to surface with oil and gravel all that portion of the street other than the twenty-foot strip which the property owners will surface with a concrete base and an asphalt covering.

The movement to pave First street from the Santa Fe tracks to Maybury was started more than a year ago. For some reason the petition of the property owners to the city trustees that the city do a portion of the work was mislaid. Nothing was done in regard to the matter for some months. With the arrival of the state highway paving crew on East First, outside the city limits, the property owners inside the city limits again got busy with the result that the private contracts are now all practically signed up.

Bennett states that the work of paving will begin as soon as the city council orders the street closed. The curbs will be done under a separate contract, Bennett states.

LOCAL MEN MAKE LONG TRIP IN CADILLAS '8'

On one portion of a 2500-mile trip taken Sunday by Sam Shallenberger, one of the salesmen of the local Cadillac agency, and Roy Andre, the two men drove the Cadillac Eight in which they were riding from sea level to an elevation of one mile without boiling the water in the radiator.

"Inasmuch as no one has ever succeeded in boiling the water in the radiator of a Cadillac Eight, no matter how steep the grade may have been, we don't consider our performance so very remarkable," remarked Shallenberger today.

The route taken by the two men took them from Santa Ana to Escondido; thence to Hemet, San Jacinto, Beaumont, the Yucaipa Valley, Redlands, Riverside and thence back to this city.

Despite the fact that this route was over some difficult roads, the Cadillac averaged better than twelve miles to each gallon of gasoline.

FINE NEW LAUNCH IS LAUNCHED AT BEACH

J. A. Ricker, the sportsman-artist from East Newport, launched his fine cruiser recently, which he built, from the keel up, with his own hands, at East Newport.

The boat is built so as to stand very rough weather at sea, and has sleeping and cooking accommodations that will make trips aboard her a genuine pleasure. She is equipped with a heavy duty Gray motor and can make about ten knots an hour. She is modeled on the same lines as Mr. Ricker's former boat, the Outdoor Soli, and on which he and Joe Ingelsoll took the famous trip to Alaska.

TIRE TRADE GOOD IN SOUTHERN CALIFORNIA

The rapid increase in the sales of Kelly-Springfield tires throughout Southern California this season is due, according to R. E. Lynds, local agent for the tires, to the fact that auto owners are demanding certainties in tires.

"Kelly-Springfield quality year after year is proving a great asset to the manufacturers—so great in fact that the capacity of the plant is to be doubled to meet the constantly growing demand. Here in Southern California the increase this season over previous seasons has been 300 per cent," said Mr. Lynds.

FORMER CIRCUS WOMAN NOW MOTOR ENTHUSIAST

The motor car is making new conquests daily in all sections of the country. Each day finds some enthusiastic lover of horses saying goodbye to Old Dobbin for the luxuries and comforts of the automobile. One of the most recent automobile converts of note is Mlle. Ida St. Leon, who in her circus days was one of the most noted and daring equestriennes in the country. She recently has been appearing in "Polly of the Circus," re-living the former triumphs of the sawdust ring. Just a few weeks ago she changed her allegiance after riding in one of the new Cole eight-cylinder cars in Los Angeles. "I am a motor adherent now," declares Miss St. Leon. "It seems strange to say it, but I have been won away from the big dapple grays by the motor car."

The Baker Bevel Piston Rings

THEY SAVE FUEL AND GIVE INCREASED POWER

The BAKER BEVEL piston ring is a result of a long series of experiments in an attempt to furnish a more satisfactory piston ring to prevent carbon and increase power.

The BAKER BEVEL piston ring is made of cast iron, being made somewhat larger in diameter than the bore of the cylinder and split so it can be sprung into place.

In this newly constructed BAKER BEVEL ring, a pair of diagonally split rings are used, the split in one ring coming on one side of the cylinder, and the split in the other coming on the opposite side, so that there is practically no leakage through the pair. The rings are so shaped that they make a tight closure of the walls of the cylinder and with the grooves of the piston in which they lie.

Various rings have been made in which a pin is used to insure the proper relationship of the parts. The BAKER BEVEL rings are held in their proper relation by a guiding lip and pin. In this ring the pin projects inwardly, thereby preventing the danger of injuring the cylinder walls, which would be scored by a loose pin and require reboring.

The BAKER BEVEL piston ring has already been proven to be a distinct advance in making a more perfect gas tight joint between the piston and the walls of the cylinder.

SUPERIORITY OF THE BEVEL
The arrangement of the BEVEL seat is such that as the ring and groove in the piston wears the ring raises on the bevel and insures a perfect fit in the groove.

The BAKER BEVEL piston ring is the only ring on the market which fills the groove of the piston when the groove becomes worn, by raising on the bevel and thereby making it perfectly tight and preventing oil from passing through and forming carbon on the piston and cylinder heads.

POWER
The BAKER BEVEL piston rings increase the power by increasing the compression. Does your motor seem to have less power than it should, or is your motor smoky and does it seem to carbonize and require valve grinding frequently? Then have installed in it the BAKER BEVEL piston rings and they will make the motor run smoothly and soon pay for themselves, and give the satisfaction you have long desired, for they are reliable.

The BAKER BEVEL piston rings are proving the most satisfactory of any yet placed on the market for motorcycles, and are just as efficient for portable engines and aeroplanes. Made in both regular and oversizes. Retail price up to 7 inches is \$2.00 each.

THE AMERICAN TOBACCO COMPANY

EAST CHAPMAN IS NOW GETTING A SMOOTHING

Orange News.—The work of smoothing the bumps out of East Chapman avenue is now under way. Pulling a heavy road drag belonging to the county, the city's steam roller is being used in leveling up the street between the paving and the bridge.

The drag is working in a very satisfactory manner and it is believed that the road will be in fine condition for the summer and fall traffic when it is completed. After being leveled, a coat of asphalt oil will be spread on and sanded, finally being rolled again with the steam roller.

Similar treatment will be given North Glassell, East Walnut avenue, North and South Tustin street, and North Cambridge and North Shaffer

SHORTAGE OF WORKERS IN KISSELKAR PLANT

The Kissel Motor Car company, Hartford, Wis., in common with other industries in the motor car and allied metal working trades, is experiencing difficulty in getting sufficient trained help to meet its needs. The company is advertising in the metropolitan papers for experienced machinists for milling machines, universal grinders and drill presses. All around machine hands are preferred. There is a scarcity of skilled workmen in many line,

TWIN CITY RACE TO HAVE \$50,000 PRIZES

MINNEAPOLIS, Minn., July 15.—Entry blanks have been issued by the Twin City Motor Speedway company for its first race on their new speedway now under construction. The event is set for September 4 and is open to cars of 300 inches and under. The distance is 500 miles and the purse \$50,000. The race is called the World's Motor Derby.

Concrete laying on the track at Fort Snelling began July 6 and will be completed in 30 days. The concrete base is 18 inches thick and the surface six inches. Three miles of fence with four gates are being painted red with white trimmings. The contractors have 350 men at work to complete grading by July 15.

act in the event of a strike. It is believed the trouble will be soon settled. Arbitration has been proposed. The miners demand better conditions and say "now's the time to smash organized greed."

U. S. VESSEL NOT USED BY TEUTON AS SHIELD

WASHINGTON, July 15.—A State Department dispatch from Liverpool today quotes the captain of the American ship Normandy as denying the report that a German submarine used the Normandy as a shield in torpedoing the Russian merchantman Leda.

TO HALT STRIKE DELAYING ALLIES' MUNITIONS

BRIDGEPORT, Conn., July 15.—Samuel Gompers is expected here today for the purpose of stopping the Remington arms strike which threatens to delay the manufacture of munitions for the allies.

BRITISH CENSORS DELETE ALL RUSSIA PEACE RUMORS

NEW YORK, July 15.—Letters received from the United Press Berlin correspondents indicate that the British censor is carefully eliminating from the news dispatches all references to Russia possibly negotiating a separate peace. Mailed articles duplicating the cabled dispatches contain numerous references to separate peace rumors. All were deleted from the cables.

SHORT STORIES

Federal Trade Board, on its swing around the circle, will include Los Angeles in its itinerary.

A new cannery in Florida will can cucumbers and beets.

Liverpool Journal of Commerce says that ten months' period of war has witnessed loss of about 400,000 tons of warships, costing \$25,000,000.

Since the war began the number of workers at the Krupp works in Essen has increased from 70,000 to 115,000.

Opinion prevails there that production of 42-centimeter guns is merely a prelude to the manufacture of other heavy guns of immense range.

Goodyear Rubber Floor has added five acres of working floor space to its Akron plant. When the new buildings are completed the plant will turn out 15,000 tires a day.

For the first time in years Brazil has ordered locomotives from this country, the American Locomotive Company taking an order for six standard engines for the Central railway of Brazil.

The American Locomotive Company has given orders to start the Cooke plant at Paterson, which has been operating at practically the lowest percentage of operations in years. The plant will run in full working on the order for twenty large engines from Belgium.

The Russian government has given the Baldwin Locomotive Works an order for 75,000 car wheels, mounted on axles, deliverable in 90 days.

Argentine butter exports for the fiscal year are 100,000 cases above the same period last year.

Of Italy's exports 12.7 per cent go to Germany and 16.8 per cent of her imports come from that country.

The rate of insurance against "aircraft bomb risks" current at Lloyd's after the recent Zeppelin invasion of London's metropolitan area, was five shillings for £100 on all ordinary premises.

In August, 1914, Germany's iron output was only 37.4 per cent of its normal production in time of peace. Last March it was 69.2 per cent. Steel output had risen from 30.5 per cent to nearly 70.

The H. C. Frick Coke Company has issued orders for the firing of 400 additional coke ovens in the Connelsville, Pa., district. The order includes fifteen plants, a number of which have been idle for months.

Gilbert's great once-a-year July Clearance Sale now on. You can save money on your dry goods now. Remember, only a few days of this wonderful sale. JOY-RIDING OF TWO ON BIKE BUILT FOR ONE BRINGS DISASTER

Joy-riding with a woman on the handle-bars has been added to the list of the various kinds of joy-rides.

As a result of the particular joy-ride that has found its way into Justice Cox's court, Leslie Darling alleges he was stabbed or slashed on the right hip. He has sworn to a complaint against W. M. Jones, who lives on East Third street east of the Santa Fe, charging Jones with an assault with a deadly weapon with intent to commit murder.

The charge is a serious one. Jones was put in jail today. His preliminary examination was set for July 17 at 9 o'clock, and his bond was fixed at \$1000.

City Marshal Jernigan and Officer Ryan received official knowledge of the case Monday night when it was reported to them that a man had been cut with a knife. The man was reported to have occurred on East Fourth street. As they got it, Darling was riding along on a bicycle with a woman on the handle-bars when W. M. Jones interfered. They were also informed that Darling had felt the effect of a knife.

Policeman Ryan brought Jones to the city hall. Jones denied using a knife. He said that if Darling was cut it must have been with Jones' fingers.

Darling could not be found. However, he showed up at the court house and a warrant was issued for Jones. In court today Jones stated that Darling came here about six weeks ago from Arizona.

To Better Oil Industry

Speaking of the meeting of oil men called Saturday, July 10, at Taft to take action looking at remedial legislation which will aid the oil industry, the Petroleum Reporter of Taft says:

"Saturday, July 10, has been set as the date for the oil men's big get-together meeting at the Petroleum Club in Taft. And while this will be a get-together meeting it means even more, for it is the start of a movement which promises to be fruitful. At the same time it will without a doubt bring about recognition of the oil industry from those who have heretofore looked upon it as being but a side issue of the mining game. Working individually none can have the authority that an industry is being done in the way the withdrawal of 1909 has been handled. In an organized body, with the facts presented, backed by all oil operators, the government officials are certain to recognize the strength and give credence to the ideas of those who really know."

"With all apologies to the officers of the government, we believe the operators are being treated unfairly. But we further believe the government would be wise if it were that the oil men of the fields would get together and show the officials right from wrong. Certainly these officials do not in any way intend to be confiscatory in their handling of the situation, though at present it appears as if they are taking a line back of their move, however, appears a desire for fairness which can be brought about by organization of the men of the fields."

"This organization can only be effected by oil operators showing the proper interest, either by being present at the meeting at the Petroleum Club or sending a representative. In case neither is possible, a letter expressing an idea of what the oil men would assist those at the head of the movement in carrying out the plan to the betterment of all. You are but one of the many in the fields, and whether you are interested or not, you are needed. Be present."

Third Largest Oil Producer

Illinois held its own in 1914 as the third state in the union in the production of petroleum, with a total of 21,919,719 barrels, according to the statement just made public by the United States Geological Survey, which compiled the statistics in co-operation with the Illinois State Geological Survey. This was a decrease of 1,741,150 barrels compared with the output in 1913, but it indicates a notable improvement compared with the decline of 16.45 per cent of the previous year and tends to confirm the opinion that the state has passed the stage of decline in the production of its present oil fields and has entered on a period of settled production with gradual decline, subject, however, to fluctuations resulting from the possible discovery of new pools.

The average price was \$11.16 a barrel, a price that compares favorably with the average of \$12.96 a barrel in 1913 and is notably higher than the average of \$9.831 a barrel in 1912. The total value of the Illinois production in 1914 was \$254,367, at the wells, exceeding the value of the 1912 production, which was 6,500,000 barrels greater, by more than a million dollars.

Stocks of Illinois petroleum increased during the year from 8,242,421 to 13,562,743 barrels, 5,000,000 barrels less than at the end of 1912. The increase resulted to a great extent from the overstocking of refineries ordinarily handling Illinois petroleum with crudes from other states. Field activity in Illinois in 1914 resulted in the completion of 1579 wells in 21 counties. Of these wells 1163, or nearly 74 per cent, yielded an average initial daily oil production of 33.75 barrels a well. Twenty-eight were gas wells. The total number of wells recorded as having been drilled for oil in Illinois prior to January 1, 1915, is 24,556, of which 2129, representing 12.3 per cent, were unsuccessful.

OIL AND OIL FIELDS

The United States tank steamer Kanawha, from Mare Island, loaded 65,000 barrels of oil at San Pedro for the Atlantic coast. The oil was from storage at El Segundo refinery.

An oil rig is being erected on the D. W. Griffith ranch just east of San Fernando. The well has been put down in a test hole in that locality.

A benzol plant has been established by the Sydney (Nova Scotia) Steel Mills, the product being converted into toluol and naphthalene.

STORY TELLING FOR CHILDREN IS TO START SATURDAY

Arrangements have been made for starting a story-telling department for children at the Public Library. The first of the stories will be told at 2:30 o'clock next Saturday afternoon, and others will be told once a week throughout the summer.

At the final meeting of the Parent-Teacher Association of the Intermediate school, the advisability of conducting a story-telling department was discussed, and a committee, consisting of Miss Hazel Lemus, chairman, Mrs. Wicks and Mrs. Violett, was appointed to undertake the organization of the work.

This committee has done its preliminary work and is now ready to start the course. Miss Lemus has visited the Los Angeles library, where story-telling classes have been conducted by the library once a week for the last two years, and made a careful study of the system followed there. She also secured lists of books for children and parents and books to be read to children by parents. One of these lists is that given out by the Los Angeles library, another by the library at St. Louis, Mo., and a third by the library at Jacksonville, Fla.

There will be two classes at the Santa Ana library next Saturday afternoon at 2:30. One of these classes will be for children of the ages found in pupils of the fifth, sixth, seventh and eighth grades, and the other for the primary grades. Children are invited, whether or not they attend the Santa Ana schools.

To each class some story will be told. Suggestions will be given for reading at home of other stories.

With this supervision, it is believed that the kind of reading that children do can be guided. It is hoped that parents who do not pay much attention to what their children read will become interested.

Under the plan of the committee, the story-telling will continue throughout the summer, once a week. The day or the regular meetings of the classes has not yet been selected.

Those who are furthering this work hope that it will not be discontinued with the opening of school. It is also hoped by them that the work will be continued either under the supervision of the Public Library or through some arrangements that may be made by the board of education.

IN THE JUSTICE COURT

MAY AUTHORIZE WARRANT FOR CONSTABLE

Justice Cox Gives Verdict of Not Guilty In Trial of Ernest Rentz

With the completion of the trial of Ernest Rentz upon a charge of battery against Constable Eugene Davis of Huntington Beach, Justice Cox rendered a verdict of not guilty. Immediately thereafter Rentz and his attorney, Cate, asked District Attorney West to authorize the issuance of a warrant for the arrest of Davis on a battery or an assault charge. The district attorney has the matter under consideration. The indications are that the warrant will be issued.

According to the evidence received in Rentz's trial, Rentz was intoxicated. Constable Davis decided to lock him up. Davis says that Rentz made a "pass" at him with his fist. Davis was not struck.

Several witnesses stated that Davis

THIN FOLKS WHO WOULD BE FAT

Increase in Weight Ten Pounds or More

A Physician's Advice

"I'd certainly give most anything to be able to fat up a few pounds and stay that way," declares every excessively thin man or woman. Such a result is not impossible, despite past failures. Thin people are victims of malnutrition, a condition which prevents the fatty elements of food from being taken up by the blood as they are when the powers of nutrition are normal. Instead of getting into the blood, all the fat and flesh producing elements stay in the intestines until they pass from the body as waste.

To correct this condition and to produce a healthy, normal amount of fat the nutritive processes must be artificially supplied with the power which nature has denied them. This can best be accomplished by eating a Sargol tablet with every meal. Sargol is a scientific combination of six of the best strength-giving, fat-producing elements known to the medical profession. Taken with meals, it mixes with the food and turns the sugars and starches into rich, ripe nourishment for the tissues and blood and its rapid effect is remarkable. Reported gains of from ten to twenty-five pounds in a single month are by no means infrequent. Yet its action is perfectly natural and absolutely harmless. Sargol is sold by good druggists everywhere and every package contains a guarantee of weight increase or money back.

Caution:—While Sargol has produced remarkable results in the treatment of nervous indigestion and general stomach disorders, it should not, owing to its remarkable flesh producing effect, be used by those who are not willing to increase their weight ten pounds or more.—Advertisement.

clubbed Rentz on the head with a revolver. One witness said that Rentz was first struck when he was sitting down, the blow following his refusal to get up when he was ordered to do so by Davis. Another witness said that while Dan Ross and Frank Catchings were helping Rentz along, each having hold of one arm, Davis struck Rentz twice on the head.

"I cannot see that there is evidence here to convict Rentz of battery," said Justice Cox, "and the decision of the court is in his favor."

Says He Was Married

Dioniso Corchado, a Mexican who formerly lived at Placentia, was arraigned today on a felony charge, and his preliminary was set for July 30. Corchado is charged with running away with Annie Gutierrez. He stated this morning that the girl's parents told him she was 18 years old. He says that about a year ago he got a marriage license in San Bernardino and that he and the girl were married at Redlands. The girl's father in the complaint alleges that she is but 15 years old.

Burglary Charge

Barnardo Castillo was brought to jail yesterday by Constable Murillo of Los Angeles. Castillo is charged with burglary, the stealing of a bicycle from Adrian Cabara's poolroom at Los Alamitos. According to Murillo, the bicycle was traded for a horse. Castillo's preliminary is set for July 21.

Embezzlement Charge

J. W. Roberts was arrested in Los Angeles yesterday afternoon on a complaint sworn to by C. A. Speer and charging Roberts with having embezzled \$17. The two men have been getting out the program for Clune's Theater. It is alleged that Roberts collected for advertising in the program and failed to turn in the money. Roberts left for Los Angeles on the 4:25 car yesterday afternoon. Los Angeles police were notified to arrest Roberts. Officer Pond went to Los Angeles and brought Roberts here.

Neckties Galore

Hipolito Sepulveda, a sugar factory electrician, used to have more neckties than any other man in Santa Ana. At least, if anyone outside of a store owner owned more at one time, Justice Cox does not know his name. This morning Sepulveda testified that seventy-five neckties, worth \$35, were stolen from his room at Delhi. A violin and other articles were also stolen. E. Reyes and Fred Soto are accused of the burglary. They were held to answer. A witness stated that he saw them in the vicinity of the house.

Fined \$50
Van Hec's delivery of Union Oil Co. truck at Olinde was today fined \$50 for driving the truck on the county highway, damaging it by reason of the fact that two of the tires were off the wheels.

AT THE COURT HOUSE

Suit on Note

Today G. A. Edgar brought suit against R. L. Forsyth, formerly a hotel man of Santa Ana, on a note for \$500.78. The complaint, filed by Attorney Charles Bishop, states that in 1910 Forsyth owed a number of bills here. It was agreed that the note should be given in payment of the bills, J. A. Turner being named as trustee. The note has been assigned to Edgar by the consent of those interested so that he could bring the action.

Case Dismissed

Today Attorney Cronk filed a request for the dismissal of the action of Thomas Yates against C. W. Snover stating that the mortgage upon which action was brought has been fully satisfied.

Marriage License

Edward L. Vegey, 40, of Santa Ana, and Katherine Barber, 32, of Council Bluffs, Ia.

'DEATH SIGN' FAILS TO SCARE MAGISTRATE

NEW YORK, July 15.—"You cannot scare me," said Magistrate McQuade in the Tombs Court as Alfred Lotiario, a cigar maker, awaiting sentence for disorderly conduct, glared at him and drew his right hand across his throat—the "death sign." "I'm just fixing my tie, but I want a square deal," the prisoner answered. Three months in the workhouse," said the magistrate.

EDEN MUSEE, SEEN BY 12,000,000, IS CLOSED

NEW YORK, July 15.—The Eden Musee, known throughout the world for its figures of famous folk in wax, has closed its doors at No. 55 West Twenty-third street.

A voluntary petition in bankruptcy, giving liabilities of \$17,568, with assets doubtful, was filed by the directors.

It is estimated the Eden Musee has been visited by twelve million persons.

GIRL HURT BY AUTO LEAP SUES HER HOST

NEW YORK, July 15.—Miss Sadie Fagan, a resident of this city, through her guardian, sued David Judson, a barge canal engineer, for \$25,000 damages.

She alleges Judson invited her to dine with him in Albany and to take an automobile ride. She charges that he tried to take her "to some house or other," and she was permanently injured in escaping. Judson denies the charge.

Eradicating Cattle Tick

It has cost the State of California \$2.46 per square mile to rid the state of the cattle tick, of which sum the federal government paid \$1.06 and the state balance. Only a section of San Diego county is now infested. The campaign to destroy the tick was begun in 1907. Since then a total of 73,97 square miles has been disinfecting. This has cost the federal government \$126,832, the state \$23,523, the California counties \$35,983.

LOCAL OPTION

SPRINGFIELD, Mo., July 15.—At least fifteen local option elections will be held in Missouri towns before the first of the year.

Auto Service Stand, White Cross Drug Store, Both phones 42. Special trips anywhere at any time. Prices reasonable. R. A. Harlow.

Dr. Wilcox has moved to Padgham's Jewelry Store, where he is better prepared than ever for making glasses on short notice.

'BLUE SKY' LAW OF CALIFORNIA PROVES SELF SUPPORTING

SACRAMENTO, July 15.—The first semi-annual statement of receipts and disbursements of the State Corporation Department rendered to the state treasurer and secretary of state by Commissioner of Corporations H. L. Carnahan shows that the fund of \$10,000 appropriated for the purpose of organizing the department for administration of the Blue Sky has been drawn on to the extent of but \$3.96.

The department is permitted to spend not to exceed \$50,000 a year, providing that the fees reach that amount. For the first six months the total receipts, including \$331.55 excess fees which was returned, amounted to \$1,720.05, while the disbursements, including the salaries of the commissioner of corporations and all employees, traveling expenses, furniture, supplies and other office expenses totaled \$11,724.01, leaving the \$10,000 state fund appropriated to start the department practically intact.

Under the fee system, the tax on corporations making application for permission to sell their shares or other securities averages about one-hundredth of one per cent of the par value of the securities proposed to be sold. Agents pay a fee of \$1 per year and investment brokers \$5 per year.

COFFIN FROM HEARSE HITS GIRL IN A CAR

NEW YORK, July 14.—Mrs. Anna Clark of Corona, L. I., was a passenger in a trolley car when it collided with a horse-drawn hearse at Second avenue and Fifty-second street.

She sprang up, stuck out her head and cried: "Oh, my!" just in time to be hit by the coffin, which was hurled forward by the force of the impact. The woman was not seriously hurt.

TWINS, 86, ROCKED IN THEIR OLD CRADLE

MIDDLETOWN, N. Y., July 14.—NEW YORK, July 15.—Miss Anna Mrs. Nathan Brand of Leonardsville, who claim the distinction of being the oldest twins in the state, celebrated their eighty-sixth birthday together, with some unusual features. The cradle in which they slept as children has been preserved and the twins were rocked in it in the presence of the guests.

Oil Wells Mile Deep

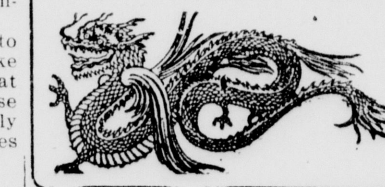

The deepest well in the world is in Upper Silesia, in the German empire. It is a diamond-drill hole in a coal field and is 5230 feet deep. A well in the United States which may go deeper, according to the United States Geological Survey, is four miles northwest of McDonald, Pa., and about 15 miles west of Pittsburgh. This well, which is being sunk to the Medina sandstone a bed that elsewhere contains oil and gas—is now 7174 feet deep. Some gas and oil were struck in the upper part of the well. Between the depths of 6850 and 1100 feet rocks bearing rock salt and salt water were encountered. These are regarded as of Salina age, the same as those carrying rock salt in western New York. The temperature in this well at the depth of 6775 feet, as recently determined with great accuracy, is 165.8 degrees Fahrenheit.

At Derrick City, McKean county, Pa., near Bradford, there is a well 5820 feet deep, which is probably the second deepest well in the United States. Another deep well is on Slaughter Creek, Kanawha county, W. Va.; it is 5595 feet deep. It penetrated a sandstone at 5030 to 5050 feet, and from this depth to the bottom, a distance of 545 feet, the well is in limestone. Near West Elizabeth, Pa., there is another well 5575 feet beneath the surface, penetrating into a black shale. Another deep well is being drilled at Gaines, Pa. This has already reached a depth of 5500 feet. Deep well drillers in this country of course employ the most improved and effective rigs, but one of the most remarkable of wells, reaching a depth of 3600 feet, was drilled for petroleum in western China by means of such crude appliances as a cable made of twisted strands of rattan.

"It's Really Different"—Framed Enlargements Free

SANTA ANA, CALIFORNIA, THURSDAY EVENING, JULY 15, 1915.

CATALINA ISLAND Y. M. C. A. CAMP IS POPULAR WITH BOYS

Although the time for the Orange County Y. M. C. A. Camp at Catalina Island, is nearly a month away, about a dozen boys have already signed up to go this year.

It was feared that the two expositions would interfere with the attendance of the boys at camp this year, but while a number are going to the expositions, the inquiries that are being made and the interest shown by the boys over the county indicates that the limit of fifty boys for this county will be secured very soon.

One unusual thing is that of the boys already enrolled, hardly more than one is of the same community, seven different communities being already represented. Last year twelve communities were represented, and there is no doubt that this number will be even larger this year.

Parents Satisfied
One of the best evidences of the popularity of the camp with the boys and the satisfaction of the parents is the fact that the majority of those boys who are signing up and of those intending to go, are the ones who have been there before, some as many as two or three times.

Another evidence of popularity is found in the fact that those communities which had one or two boys last year are furnishing two or three times as many this year. Santa Ana of course leads in number of boys attending, having last year sixteen boys, and if it were so desired the entire number could be secured from Santa Ana alone, but it is the purpose of the camp committee to have as many communities represented as possible and for this reason the advertising is not being pushed in those sections which have heretofore furnished the larger numbers.

Physician
Not because there has ever been found any special need for one, but to enable the parents of the campers to feel easier, Dr. Nat Burkovitz of the Los Angeles County Hospital, will take his vacation at camp and will serve as camp physician. He will be supplied with a hospital tent and will have special equipment in case any one should need attention.

In all the eight years of the camp, there has never been a serious accident. By many who have visited the camp and have taken notice of the efficient organization and careful management and supervision, the assertion has been made that the boys are really safer at camp than they are at home.

Opens August 9
The camp will open on August 9, and continues till August 21. The camp fee is \$9 and the transportation amounts to \$3 more, making \$12 as the total necessary expense. Any parents who desire the finest kind of an outing with the best moral environment, and the most careful supervision for their boy, may arrange to send him by communicating with E. M. Brown, county secretary of the Y. M. C. A., Santa Ana.

WILLIS-KNIGHT SETS MOTOR PRECEDENT

Announcement is made in this paper of the new car that is being put out by the Overland factory. It is called the Willis-Knight and is the first car put out with a Knight motor, at a medium price. In speaking to a party of some fifty Overland agents at a banquet in Los Angeles last week, Charles Y. Knight, the inventor of the Knight motor, said: "The Knight sleeve-valve motor has been extensively manufactured in Europe for several years and some of the leading motor car manufacturers of America have been making them with great success, but none have yet reached the perfection to be found in the motor put out by the Willis factory."

AUBURN OWNERS TO HOLD PICNIC IN PARK

That there are fifty Auburn owners in and around Orange is the statement of W. J. Burt of the Burt Motor Car Company in announcing the Auburn picnic for the county park on July 25. "I have looked this country over very carefully and do not know of another spot so suitable for such an occasion," said Mr. Burt.

The popularity of Orange County Park will be spread by the coming of Auburn owners from all over Southern California to the picnic.

CHEVROLET WINNING MANY FRIENDS HERE

The Chevrolet, one of the first to announce a reduction in price on 1915 models, has already made a large number of friends locally and indications are that Waffie & West, Santa Ana agents, will run up a good season's sales. The most recent purchaser of a Chevrolet is J. Flood Walker, who during the past week has had delivered to him a "Baby Grand" touring car.

CLARENCE ROWLAND, (right) the new manager of the White Sox, shares honors with Collins (left) for whom the Chicago team paid the record price in baseball history. A few weeks ago Rowland was unknown; today he is famous and credited with having almost supernatural powers in controlling his players and their plays. Last year Rowland was the manager of the Peoria, Ill., team in the "Three-I" League and his team finished second. In the few weeks of his big league experience he has established himself as one of the best baseball leaders ever produced.

EDDIE COLLINS MANAGER ROWLAND

SANTA ANA'S JITNEY ORDINANCE

Following is Santa Ana's new "Jitney" ordinance, which was passed by the board of trustees Monday night and which went into effect yesterday:

Section 1. It shall be unlawful for any person, firm or corporation maintaining or operating any motor vehicle for hire to keep, deposit, store or stand any such vehicle on that part of Fourth street of said city between its intersection with Bush street on the East and its intersection with Second street on the west or on that part of the east half of Main street from its intersection with Fifth street on the north to its intersection with the alley between Third street and Fourth street on the south or on that part of the west half of said Main street from a point 110 feet north of the curb line produced on the north side of Fourth street to the alley between Third and Fourth street on the South.

Sec. 2. It shall be unlawful for any person, firm or corporation to deposit, store or stand any motor vehicle, for a longer period of time than three consecutive minutes on that part of the south half of Fourth street from its intersection with Main street on the east to a point 75 feet west from the curb line on the west side of Main street produced, or on that part of the north side of Fourth street from its intersection with Main street on the west to a point 75 feet east from the east curb line of Main street produced.

Sec. 3. It shall be unlawful for any person, firm or corporation maintaining or operating any motor vehicle other than for hire to deposit, store or stand said vehicle on that part of the west half of Main street, commencing at a line at right angles with the curb at a point 110 feet north of the curb line on the north side of Fourth street produced, to the intersection of said Main street with Fifth street on the north.

Sec. 4. It shall be unlawful for any person, firm or corporation

MARYLANDER IS FINED FOR RUTTING HIGHWAY

The first case in Maryland of a man being charged with operating a motor vehicle without due regard for wear upon the highway was tried in Baltimore July 2. Clarence Thornburg, a chauffeur for the Pierce-Arrow Company, was fined \$25 and costs. He ran a motor truck over the asphalt of one of the main thoroughfares. Two of the wheels were without tires and the flanges cut into the paving, causing damage amounting to about \$10.

ELEVEN '16 OVERLANDS ALREADY SOLD HERE

F. L. Austin, Overland agent, reports the sale of two of the new 1916 Overland four-cylinder cars this week. The purchasers were Roy Labadie and Edna L. Miller, both of Huntington Beach. This makes a total of eleven sales since the new model came out a few weeks ago and leaves Mr. Austin without a single car in stock and customers waiting. Another shipment of Overlands is expected to arrive soon.

WORK OF PAVING EAST FIRST IS TO START IN FEW DAYS

Paving operations on East First street, from the Santa Fe tracks eastward to the east city limits at Maybury street, are expected to begin shortly.

It was stated this morning by C. F. Bennett, one of the committee of East First street property owners having in charge the circulation of private contracts calling for the surfacing of a twenty-foot strip in the center of the street, that all the contracts would probably be signed by this evening.

The contracts are being circulated for M. W. Crandall, who will do the work. Bennett states that it is certain every property owner will sign and that none of the work will need to be done under Vrooman proceedings.

The city has agreed to surface with oil and gravel all that portion of the street other than the twenty-foot strip which the property owners will surface with a concrete base and an asphalt covering.

The movement to pave First street from the Santa Fe tracks to Maybury was started more than a year ago. For some reason the petition of the property owners to the city trustees that the city do a portion of the work was mislaid. Nothing was done in regard to the matter for some months. With the arrival of the state highway paving crew on East First, outside the city limits, the property owners inside the city limits again got busy with the result that the private contracts are now all practically signed up.

Bennett states that the work of paving will begin as soon as the city council orders the street closed. The curbs will be done under a separate contract, Bennett states.

LOCAL MEN MAKE LONG TRIP IN CADILLAS '8'

On one portion of a 2500-mile trip taken Sunday by Sam Shallenberger, one of the salesmen of the local Cadillac agency, and Roy Andre, the two men drove the Cadillac Eight in which they were riding from sea level to an elevation of one mile without boiling the water in the radiator.

"Inasmuch as no one has ever succeeded in boiling the water in the radiator of a Cadillac Eight, no matter how steep the grade may have been, we don't consider our performance so very remarkable," remarked Shallenberger today.

The route taken by the two men took them from Santa Ana to Escondido; thence to Hemet, San Jacinto, Beaumont, the Yucaipa Valley, Redlands, Riverside and thence back to this city.

Despite the fact that this route was over some difficult roads, the Cadillac averaged better than twelve miles to each gallon of gasoline.

FINE NEW LAUNCH IS LAUNCHED AT BEACH

J. A. Ricker, the sportsman-artist from East Newport, launched his fine cruiser recently, which he built, from the keel up, with his own hands, at East Newport.

The boat is built so as to stand very rough weather at sea, and has sleeping and cooking accommodations that will make trips aboard her a genuine pleasure. She is equipped with a heavy duty Gray motor and can make about ten knots an hour. She is modeled on the same lines as Mr. Ricker's former boat, the Outdoor Life, and on which he and Joe Ingersoll took the famous trip to Alaska.

TIRE TRADE GOOD IN SOUTHERN CALIFORNIA

The rapid increase in the sales of Kelly-Springfield tires throughout Southern California this season is due, according to R. E. Lynds, local agent for the tires, to the fact that auto owners are demanding certainties in tires.

"Kelly-Springfield quality year after year is proving a great asset to the manufacturers—so great in fact that the capacity of the plant is to be doubled to meet the constantly growing demand. Here in Southern California the increase this season over previous seasons has been 300 per cent," said Mr. Lynds.

FORMER CIRCUS WOMAN NOW MOTOR ENTHUSIAST

The motor car is making new conquests daily in all sections of the country. Each day finds some enthusiastic lover of horses saying good-bye to Old Dobbin for the luxuries and comforts of the automobile. One of the most recent automobile converts of note is Miss Ida St. Leon, who in her circus days was one of the most noted and daring equestriennes in the country. She recently has been appearing in "Polly of the Circus," reliving the former triumphs of the sawdust ring. Just a few weeks ago she changed her allegiance after riding in one of the new Cole eight-cylinder cars in Los Angeles. "I am a motor adherent now," declares Miss St. Leon. "It seems strange to say it, but I have been won away from the big dapple-grays by the motor car."

The Baker Bevel Piston Rings

THEY SAVE FUEL AND GIVE INCREASED POWER

The BAKER BEVEL piston ring is a result of a long series of experiments in an attempt to furnish a more satisfactory piston ring to prevent carbon and increase power.

The BAKER BEVEL piston ring is made of cast iron, being made somewhat larger in diameter than the bore of the cylinder and split so it can be sprung into place.

In this newly constructed BAKER BEVEL ring, a pair of diagonally split rings are used, the split in one ring coming on one side of the cylinder, and the split in the other coming on the opposite side, so that there is practically no leakage through the pair. The rings are so shaped that they make a tight closure of the walls of the cylinder and with the grooves of the piston in which they lie.

Various rings have been made in which a pin is used to insure the proper relationship of the parts. The BAKER BEVEL rings are held in their proper relation by a guiding lip and pin. In this ring the pin projects inwardly, thereby preventing the danger of injuring the cylinder walls, which would be scored by a loose pin and require reboring.

The BAKER BEVEL piston ring has already been proven to be a distinct advance in making a more perfect gas tight joint between the piston and the walls of the cylinder.

SUPERIORITY OF THE BEVEL

The arrangement of the BEVEL seat is such that as the ring and groove in the piston wears the ring raises on the bevel and insures a perfect fit in the groove.

The BAKER BEVEL piston ring is the only ring on the market which fills the groove of the piston when the groove becomes worn, by raising on the bevel and thereby making it perfectly tight and preventing oil from passing through and forming carbon on the piston and cylinder heads.

POWER

The BAKER BEVEL piston rings increase the power by increasing the compression. Does your motor seem to have less power than it should, or is your motor smoky and does it seem to carbonize and require valve grinding frequently? Then have installed in it the BAKER BEVEL piston rings and they will make the motor run smoothly and soon pay for themselves, and give the satisfaction you have long desired, for they are reliable.

The BAKER BEVEL piston rings are proving the most satisfactory of any yet placed on the market for motorcycles, and are just as efficient for portable engines and aeroplanes.

Made in both regular and oversizes. Retail price up to 7 inches is \$2.00 each.

THE AMERICAN TOBACCO COMPANY

EAST CHAPMAN IS NOW GETTING A SMOOTHING

Orange News.—The work of smoothing the bumps out of East Chapman avenue is now under way. Pulling a heavy road drag belonging to the county, the city's steam roller is being used in leveling up the street between the paving and the bridge.

The drag is working in a very satisfactory manner and it is believed that the road will be in fine condition for the summer and fall traffic when it is completed. After being leveled, a coat of asphalt oil will be spread on and sanded, finally being rolled again with the steam roller.

Similar treatment will be given North Glassell, East Walnut avenue, North and South Tustin street, and North Cambridge and North Shaffer

streets. Some trouble is being encountered with the flues of the steam roller and for that reason the work was delayed recently.

SHORTAGE OF WORKERS IN KISSELKAR PLANT

The Kissel Motor Car company, Hartford, Wis., in common with other industries in the motor car and allied metal working trades, is experiencing difficulty in getting sufficient trained help to meet its needs. The company is advertising in the metropolitan papers for experienced machinists for milling machines, universal grinders and drill presses. All around machine hands are preferred. There is a scarcity of skilled workmen in many line.

TWIN CITY RACE TO HAVE \$50,000 PRIZES

MINNEAPOLIS, Minn., July 15.—Entry blanks have been issued by the Twin City Motor Speedway company for its first race on their new speedway now under construction. The event is set for September 4 and is open to cars of 300 inches and under. The distance is 500 miles and the purse \$50,000. The race is called the World's Motor Derby.

Concrete laying on the track at Fort Snelling began July 6 and will be completed in 30 days. The concrete base is 18 inches thick and the surface six inches. Three miles of fence with four gates are being painted red with white trimmings. The contractors have 350 men at work to complete grading by July 15.

NEW CHASSIS IS BEING BUILT BY MACK

NEW YORK, July 15.—Slowly and laboriously, but withal cheaply, Connie Mack is building a chassis for a new machine. His material is costing him nothing, and all the elongated leader is out is the time he puts in training it in the way it should shoot.

By this same simple method, Mack built up the most famous machine in two decades—the late lamented Athletics—only to see it cough, splutter and finally go headlong into the ditch October 1914. Mack, it will be remembered, paid practically nothing for Collins, McInnis, Barry and Baker, the four members of the far-famed "\$100,000 infield." One cog netted him \$50,000, which was practically so much clear profit, and but for the defalcation of J. Franklin Baker the Athletics' stockholders probably would have stuck another \$50,000 in their pockets.

So these hot July days finds the famous leader in exactly the same position he was in the July days of 1908 and 1909, when the Tigers were on the topmost pinnacle of fame—laboriously building and planning for the future.

There has been a constant flow of college and semi-pro boys through Shibe park this season. No school has been barred from sending its proteges to Mr. Mack's institution of learning. Return tickets are always supplied, and most of them used. Connie always gives them a fair show, too. A good example of this was seen a few days ago when the Yanks were playing the Mackmen, a double header. Mack started a young collegian named Haas on the mound. The Yanks drew 15 hits and 16 base on balls off the youngster and walloped the Philadelphiaans 15 to 7. Yet Mack didn't take the kid out—he let him stick and take his medicine. The kid, though, used his return ticket to Worcester academy that night.

The same day, however, Mack drew what looks to be a diamond in the rough. He is a young collegian named Crowell from Brown. Pitching his first professional game he let the Yanks down with three hits, but lost by the tough luck score of 3-2, when his mates kicked the game away.

There is probably another reason why Mack is laboring so diligently to build up a new machine—he wants to give some of his knuckers the big guffaw—those who knocked him following the series with the Braves. The roar of the multitude still is sweet to the tall leader, too, and it doesn't seem right to him that he should be completely out in the cold as far as praise is concerned.

GOTHAM EDITOR GIVES PRAISE TO COLE CARS

E. S. Warner of the editorial staff of Smart Set and Field and Stream, is one of the new owners of Cole eight-cylinder cars. Mr. Warner has had his car fitted with a special Victoria top and has been touring continually for the past three weeks. In that time he has traveled more than 3000 miles. He reports that the car has exceeded his every expectation in its wonderful performance over all kinds of hills and roads.

HONEYMOON TRAIL TO COVER 10,000 MILES

Hiram E. Tattle, secretary of the Waltham, Mass., Board of Trade, is making a tour to California in a Metz roadster with his bride. The honeymoon trail is to stretch 10,000 miles, the motorists taking in the California expositions and the national parks. Westward the Waltham motorists are covering the southern route, but intend returning by way of the Yellowstone.

FORD MOTOR COMPANY PLANS TO MAKE OWN TIRES IN OWN PLANT

Two Million Rubber Shoes to Be Made During the First Year

DETROIT, Mich., July 15.—The Ford Motor company will make its own tires within the next 18 or 24 months. A large tire manufacturing plant will be put up on the land recently purchased by Henry Ford along the River Rouge for his new tractor plant, steel mills, blast furnace and other works. It is probable that the tire plant will not be ready for operation until the beginning of 1917. It is likely that the first year's output will be 2,000,000 tires or thereabouts, which represents a value of at least \$20,000,000.

All the workers at all the Ford plants or works probably will be given the benefit of the \$5 a day pay, which will effect a force of from 50,000 to 60,000 men the first year in the various new plants and those now in operation.

SMITH IS SENSATION IN FLYING AT FAIR

Art Smith is the official heavier-than-air artist of the Panama-Pacific International Exposition. This youth is by long odds the most sensational flyer aviation has thus far produced. Practically unknown a fortnight ago, he is now the most talked of aviator in the land. He is at present the sensational feature of California's big show.

Smith makes both day and night flights, his flight across the night sky is marked with a trail of fire reproducing the effect of a comet. Although Art says it's easy, as yet no professional imitators have tried to steal the act. This daring aviator's flights are made in a biplane driven by an internal combustion engine lubricated with Zerolene, the Standard Oil for motor cars. His selection of Zerolene was made after he had done much testing of it and other lubricating oils. He says: "I use Zerolene because I have found it gives perfect lubrication."

NEW REASON IS GIVEN FOR MATTY'S SLUMP

NEW YORK, July 15.—Theories galore have been offered since the baseball season started about the cause of Matty's defection, but it remains for Howard Trumbo, a contracting engineer of Havana, Cuba to come out with a new one. Trumbo is in New York on a vacation.

According to Trumbo, the famous Giant pitcher is suffering from "golf rheumatism."

"It's a fact," says Trumbo. "Nearly every golfer in Cuba has suffered from the peculiar ailment this year, and I haven't a doubt but that the stuff got into Matty's shoulder when he was playing on our links last winter. It affects us just like reports say Matty is affected. Several of us have fallen off badly in our golf game because of this muscular stiffness."

STUDEBAKER EMPLOYEES BE INSURED FOR LIFE

DETROIT, Mich., July 15.—An arrangement was completed a few days ago between the Studebaker corporation and the Equitable Life Insurance Society of the United States, New York, whereby 6500 of the 13,000 workmen now employed by the corporation are insured for life while the remainder will also be insured in the same way within a short time. It is stated that it is the first instance in the motor car industry where a manufacturer insures all of its workmen for life without any expense to them. No matter how long the Studebaker workman has been with the concern, through the deal with the insurance company he will have the benefit of a life insurance. Furthermore, there will be no need for the men of being examined by the insurance company's medical inspectors, the certificate given to that effect by the Studebaker officials being accepted.

CANADIANS PASS HERE EN ROUTE TO BIG FAIR

After having spent seven weeks on the road in their automobile in making a trip from London, Ontario, J. B. Smallman, owner of a large department store, accompanied by the Misses Alice and Bertha Smallman and Chauffeur S. T. Reddings, arrived here at noon Monday and after stopping for luncheon proceeded on to San Diego. The party came West by way of Detroit, Chicago, Iowa City, Des Moines, Omaha, Cheyenne, Denver and thence over the Santa Fe trail to Los Angeles. After their visit to the San Diego exposition they will motor to San Francisco and then return East by way of the Lincoln highway.

WOMEN ATTEND BOXING SHOWS IN GOTHAM

NEW YORK, July 15.—Women are becoming some of New York's most ardent fight fans. Each succeeding card, especially the open air variety, finds more and more of the reputed weaker sex occupying seats with the same sang-froid as their supposedly sterner escorts. About 400 have attended each of the last two bouts and they evidenced the same—and sometimes more—interest in the smack of the glove meeting the jaw, than the men. And the conservative individual who imagines they can't stand the sight of the red, red blood is all wrong.

Gory Orgy
Johnny Weissmuller, the Brooklyn impresario, staged a card at Ebbetts field a few nights ago that was about the goriest New York fans have seen for moons. The first ten-round affair was stopped by the referee after one of the boys had dyed the ropes and the referee's matty white suit with red. An awful howl went up when the arbiter called a halt—and it wasn't all done by the men, either.

Stately Dame Peeved
"Outrageous!" commented one stately, grey-haired dame who sat near the ring and nonchalantly smoked gold-tipped cigarettes.

"That man had no right to stop that bout; the boy wasn't hurt, he just looked bad. Don't you think so?" she finished, turning to her companion, an elderly man. He nodded assent.

The second affair, between Sailor Fred Fritts and Boer Rodel, was even more gory. The referee, however, didn't like to risk the further displeasure of the crowd and let the bout go on. Then in the eighth round, when the sailor went down for the long sleep under a straight right to his bloody visage, the women cheered as loudly as the men.

The stately, grey-haired woman applauded.

RENE THOMAS PRAISES WORK OF DE PALMA

PARIS, July 15.—Owing to the war, the result of Indianapolis' 500-mile reached Paris after a delay of one week. Rene Thomas, last year's winner, is delighted at the speed attained, his only regret being that he was unable to be present.

"I am glad to hear Ralph de Palma has broken my record and I want to congratulate him on what must have been a wonderful race," he said. "Manufacturers over here seemed to think the record would stand for another year, and on that account were not disposed to send cars. This is a lesson to them that in the racing game, progress must be constant. France had the cars and she had a few good drivers free from military service; she ought to have sent those men across, instead of being satisfied to live in the false hope that the old record would remain untouched."

\$100,000 SPEEDWAY IS PLANNED AT SPOKANE

SPOKANE, Wash., July 15.—The Spokane Speedway association has been organized and incorporated by a group of Spokane sportsmen.

It is planned to build a two-mile speedway close enough to the center of Spokane so that it may be reached by street railways. The association has been incorporated for \$100,000. Negotiations are now pending for the property.

TOUTS GIANT BUSHMAN AS WILLARD OPPONENT

NEW YORK, July 15.—Jim Corbett, one time king of the heavyweight universe, has a new wants-to-be-champion. Jim vows he's a wonder and will be a champion before long. The name of this new menace of Willard's is Tom Cowler and he hails from Sydney, Australia, where Corbett picked him up while on a vaudeville tour. The Australian stands six feet two and a half inches and hits the scales about 208 pounds worth.

Corbett plans to pit him against the second-rate heavyweights for a while to give him a chance to find out how they do it in the States. Then he'll put him against several good boys as a sort of polisher and then Willard. Coffey and the bunch can hop on Tom's neck whenever they feel like it. This, of course, is all according to Mr. Corbett.

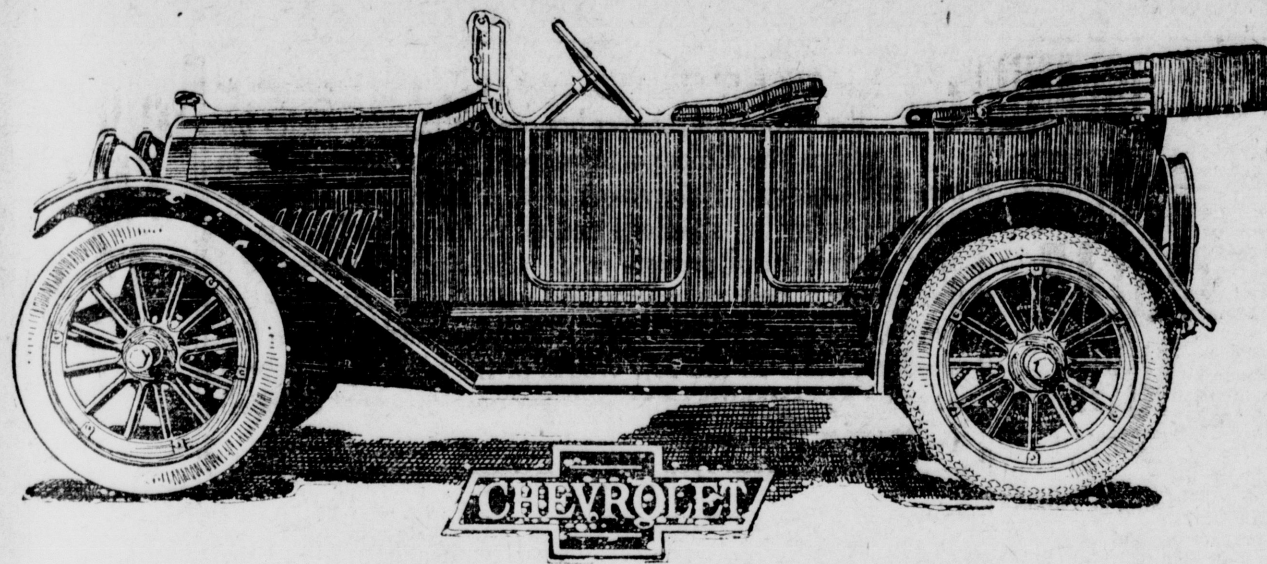

CHICAGO'S FALL RACE DATE IS NOW CHANGED

CHICAGO, July 15.—The date for the 300-mile fall race, originally scheduled to be run on the Chicago speedway October 9, has been changed to September 18 in order that there will be no conflict between the local event and the dedication of the New York track, which is set for October 2.

The Chicago promoters feared that if they held their fall race the Saturday after the New York event, the drivers would not have sufficient time to prepare their cars and that lack of preparation would result in many eliminations, taking the edge off the competition.

Howe Red Tubes—90 per cent pure gum.

Auto Electrical Work of All Kinds.

Best Vulcanizing and Retreading.

Santa Ana Vulcanizing Works, 421-423 West 4th St.

The hangman's noose for anyone so insane as to try to write sporting editorials during the torrid days of summer!

It will have been noticed that the Register's "Pink" pages have been remarkably unsullied recently by the sproutings that defiled the column under this head during the more livable days of winter and spring.

The intentions of the chap who has this column in charge are of the best. Yet there are times, and occasions when even the most righteously lazy of Pink editors are moved to utterances—and the present time is one of them.

It is nothing less than the Philadelphia club of the National League that has caused me to burst into song on the present occasion.

You noticed that yesterday's percentage tables had the Phillies back at the apex of the heap? After a considerable period of comparative submergence? Well, isn't that enough to make you rise up on your hind legs and blow a couple blasts for the Phils? Especially when C. C. Cravath, our own "Gavy," happens to be a member of the club. And, more especially, when said Cravath is hitting 300 or better?

In spite of the fact that a number of the National League clubs have been tramping on the Phils for the past few weeks there are still a large number of Santa Anans who adhere to the belief that Cravath will be with the club in the National League that tops the list by the end of the season.

At that, this belief is not so wild a one as might at first glance appear. Any club that boasts a heavier hitter Grover Cleveland Alexander, who Tuesday won his eighth straight game and registered four shut-outs in three weeks, stands a first-class little chance to exhibit pronounced pennant-grabbing propensities.

COPS USE JITNEYS AS PATROL WAINS IN THIS LIL MARYLAND TOWN

Neither Officer Nor Prisoner Has to Pay Driver Any Fare

Brooklyn, a suburb of Baltimore, has no police patrol, in spite of the fact that officers frequently are called upon to take prisoners two miles or more to the lockup. Often they used the street cars for patrols, but now the jitneys have done away with this. Whenever a policeman makes an arrest he calls one of the little busses and uses it for a patrol. Neither the policeman or his prisoner has to pay any fare.

OVERLAND HELP SEES BIG-LEAGUE BALL GAME

In the presence of nearly every one of the 11,000 employees of the Willys-Overland company, the Detroit Tigers and the New York Giants gave an exhibition baseball game at Toledo recently. The event was arranged by President John N. Willys, of the Willys-Overland company and was witnessed by many prominent invited guests. It was an unique affair, it being the first time that a motor car manufacturer had two of the biggest ball teams in the country play for the exclusive benefit of his employees.

WOMAN AWARDED \$5000 IN JIT DAMAGE SUIT

The first jitney damage suit in the Maryland courts was concluded recently at Baltimore, when a woman who sued a jitney owner because she was struck by one of his vehicles was awarded \$5000 damages. Her husband was granted \$1250 for the loss of his wife's services. The jitney owner failed to defend the suit.

DRY CEMENT SLOWLY
Do not put a tire in a draft to hasten the drying of the cement. A film is likely to form on the surface, leaving the cement below very tacky. This leads to blistering. Do not apply a second coat of cement while the first is still sticky and tacky. Wait till the cement is absolutely dry, but don't overdo this, for cement loses some of its adhesive quality if allowed to dry too long.

LEE Tires

"Smile at Miles"

Constructed of Lee "Vanadium" Rubber, plain wrapped, smooth tread tires and Velvet Red Tubes are now sold at the following prices:

Size	Lee Tires	Lee Velvet Red Tubes
28x3	\$ 8.95	\$2.65
30x3	9.45	2.75
30x3 1/2	12.20	3.20
32x3 1/2	14.05	3.30
34x3 1/2	15.70	3.50
31x4	18.90	4.35
33x4	20.05	4.60
34x4	20.40	4.70
35x4	21.25	4.80
36x4	21.60	4.90
36x4 1/2	28.80	6.10
37x5	34.00	7.40

Lee Zig Zag and Non-Skid Pneumatic Puncture Proof Tires.

Vegely's Garage

210-12 North Main. Opposite City Hall.

POINTERS ON BUILDING ECONOMY

732,720 ACRES IN CALIFORNIA PROTECTED FOR GAME

SACRAMENTO, July 15.—There will be after August 7, exactly 732,720 acres of forest land in California where birds and wild animals may make their quarters without fear of being molested by hunters.

Only predatory animals can be shot in these preserves and even then the hunter must have the permission of the state fish and game commission.

The legislators at the instigation of the fish and game commission almost doubled the acreage of the reserves at the 1915 session, the representations being made by F. M. Newport, head of the commission, that such action had to be taken because wild game in California is fast disappearing.

The acreage of the six preserves after August 7 will be: Cleveland national forest in Orange and Riverside counties, 99,840 acres; National Finches forest, San Benito and Monterey counties, 14,980 acres; Trinity National forest, 66,560 acres; west end of National Angeles reserve, San Bernardino and Los Angeles counties, 321,360 acres; east end Angeles reserve, San Bernardino county, 226,280 acres; California Redwood Park, Santa Cruz county, 4,600 acres.

Fishing in these reserves will be permitted under certain restrictions.

The fish and game commission was also successful in securing legislation to become effective August 7 for the protection of game outside the reserves. The deer season in the central division will be open from August 15 to October 15; in the coast division, from August 1 to September 15, and in the southern district from September 1 to October 1. The limit on quail will be reduced from 20 to 15.

The duck limit will remain at 25 but the season will be shortened from October 15 to January 31.

Finding that most of the fresh water fish were being exported from California, the fish and game commission put through laws reducing the areas in which salmon and striped bass may be caught by nets and by abolishing the small-mesh beach net. By thus reducing the commercial feature it was possible to extend the season for hook and line fishing.

The three-pound limit on striped bass caught with hook and line will be abolished after August 7, and the hook and line angler will be permitted to catch striped bass and salmon every day in the year.

During the closed season for nets, September 25 to November 14, the hook-and-line will be allowed to catch a limit of five striped bass and three salmon a day. During the open season for nets there will be no limit. There will be a closed season on only the trout, white fish and black bass on the bass from November 30 to May 1, and on trout and white fish from October 31 to April 30 except on golden trout, which will be from October 1 to July 31.

PEDESTRIANS TO TOE 'JAY' LINES, EDICT

In order to decrease the number of motor car accidents that have recently occurred on the streets in Harrisburg, Pa., Jay lines will be placed at busy street intersections in the central part of the city. The lines will be painted in white and will mark the space to be used by pedestrians when crossing streets. The one will extend across the street intersection from the curb line, while the other will connect the building line.

ALLOW NO SHOOTING OF BIRDS FROM CARS

One of the novel acts of the present session of the Wisconsin legislature is the passage of a law prohibiting the killing of game birds from motor cars. The penalty is a fine of \$10 to \$25 or ten to thirty days in jail. The law is now effective. Wisconsin is a great fishing and hunting state, and the practice of shooting game without leaving the comfortable cushions of motor cars has grown to large proportions. During the deer hunting season, November 1 to 20 of each year, many deer are killed in this manner, but the chances are regarded as too small to make it necessary to regulate the practice by law.

CHICAGO RACE NETS PROMOTERS \$280,000

A total of \$280,000 was jotted down on the profit side of the ledger of the Chicago Speedway management after the recent contest at the Windy City, according to President David D. Reid. The receipts totaled \$500,000, and the expenses were \$120,000.

FAMILY CARRIAGE IS MAKING WAY TO MOTOR

From the reports of the tax assessors in Columbus, O., which boasts of 225,000 population, only four of the old-fashioned family carriages were returned for taxation this year. That shows how the motor car industry has made inroads in the carriage building trade and how the motor car has supplanted the old family carriage.

INSPECT TIRE
Inspect a tire for loose fabric or tread before undertaking to repair it. The heat of vulcanization expands the air between the plies of fabric or beneath the tread and simply makes the trouble worse. If the carcass is not sound, pass it up.

EMERGENCY GAS
A two quart "Karo" syrup can filled with gasoline may be carried under the rear cushions of a Ford car as an emergency supply. The can is air tight.

DANCER, TOURING LAND IN PAIGE CAR, HIGH IN PRAISE OF ROADS

Joan Sawyer Declares Highway Greatly Improved In Recent Times

CHICAGO, Ill., July 15.—Miss Joan Sawyer, the dancer, who is touring across the continent from New York to San Francisco, has two Paige cars for herself and her party, both seven-passenger sixes, and being an ardent motorist, she is personally doing most of the driving. As she is also an experienced tourist and sportswoman she is in a position to make intelligent comment on the recent advance made in this country's road building.

It is Miss Sawyer's opinion, based on her experience covering that section of the route of her present transcontinental tour from New York to Chicago, that at least the main traveled roads are vastly improved over what they were a short time ago.

1916 STATE LICENSE PLATE REALLY A BEAR

The 1916 California motor car license plates, made permanent by the law passed by the last legislature, are to carry the California bear such as graces the state seal. The new plates are to be three inches shorter and one inch narrower than the 1915 plates. The color is to be blue and white. The section of the plate bearing the date of registration will be in the form of a bear.

FIVE-CENT PACKAGE DELIVERY BY 'JITS'

ST. LOUIS, Mo., July 15.—Five-cent package delivery has been inaugurated here by some of the jitney bus operators. Packages are delivered within a restricted zone for a nickel.

MARYLAND FARMERS IN ARMS AGAINST RULING

Farmers who have motor cars and who use them on some occasions for the transportation of persons, feel that the rule handed down by the public service commission of Maryland to the effect that all such persons must register with the commission, subjects them to somewhat unnecessary trouble. It is pointed out that they are not in the regular transportation business and only take a few persons now and then more for the convenience of the passengers than anything else. This is the case at many of the summer resorts where farmers frequently gather a little extra change by carrying persons who are going to farms back in the country.

KISSELKAR TRUCKS TO GO TO SERBIAN ARMY

Eighty Kisselkar trucks left the factory of the Kissel Motor Car Co. in one trainload last week. The entire train was made up of flat cars, two trucks being loaded on each car. The shipment was consigned to the government of Serbia and consisted of thirty ambulances and fifty heavy service vehicles for commissary use.

CIRCUIT-BREAKING
In the make and break of current of a magnet the space between the contact points is very important. If the space is too wide the engine will tend to miss at low speed, and if too close it will miss at high speed.

MOTOR WIRING
The wiring of a motor car requires the best possible protection. As a rule the wires should be well insulated and be carried in copper tubes that are impervious to oil and water.

SPARK RETARDATION
Even though you are sure that you can start your motor with the spark advanced without breaking your arm, it is not proper to do so. The thrust backward of an advanced explosion has a tendency to injure the motor.

VALVE STEM WARPS
If there is lack of compression and the valve heads seem clean and perfect, examine the valve stems for heat warping.

RICE GOES EAST WITH HIS NEW GEAR SHIFTER

Local Inventor Will Show Big Auto Maker Something New For Machines

With a perfected gear-shifting device, Percy Rice is going to start east the last of this week. He is going to demonstrate his invention to one of the foremost automobile manufacturers in the United States, and his visit east is by appointment with that manufacturer.

Rice has invented other automobile appliances, some of which are now in the shops of eastern manufacturers. The device that he is taking east with him on this trip is one that he has been working with off and on for the last four years.

The inventor will go from California to Detroit, Mich. He expects to go on to Washington for a few days. He will be gone between four and six weeks.

MACHINE WORKS HEAD SAYS BUSINESS GOOD

The Park Garage & Machine Works reports business good, and getting better every week. This is attributed by the management to the fact that all work is guaranteed to be first class. This guarantee is possible because only experts are employed to handle repair work, no matter how simple the repair is.

BUFFALO BILL DESERTS BRONCHO FOR MOTOR

William F. Cody, known the world over as "Buffalo Bill," has deserted the broncho for a motor car. He recently purchased an Overland touring car and now is seldom seen except at the wheel of his machine. He frequently uses the car for jumps from town to town when traveling with the Wild West Show of which he is the leader. In referring to his love for motoring, the famous scout draws an interesting comparison between the Overland Six and the old overland stage which is now one of the properties of his show, and which was finished in 1865 and put in service between Dodge City, Kan., and St. Joseph, Mo.

MAXWELL IS RETIRING FROM SPEEDWAY GAME

CHICAGO, July 15.—Ray Harroun, chief engineer of the Maxwell Motor company, states that the Maxwell will retire from the racing game after competing in the contests at Sioux City, Omaha and Tacoma. The reason given for this action is the company's objection to the rule recently adopted by the contest board of the A. A. A. that all cars entered in races hereafter shall be designated as specials.

OVERLAND FIRM WANTS SITE AT MINNEAPOLIS

MINNEAPOLIS, Minn., July 15.—The Willys-Overland company has been negotiating for the purchase of a 18-acre site in this city for the purpose, it is said, of establishing a plant in the future.

GETS 18 MONTHS FOR BORROWING MOTOR CAR

The heaviest penalty yet meted out in Wisconsin for the theft of a motor car is the sentence of 18 months imposed upon Frank Giller, a mechanic in a garage at LaCrosse, Wis., who confessed to using a Ford car belonging to J. S. Smale without the owner's knowledge or consent.

APPERSON LAUNCHES ITS 23RD SEASON

With the beginning of the 1916 season a change has been made in the sales organization of the Apperson Bros. Automobile company, Kokomo, Ind. J. B. Eccleston, who has been sales manager since last September, has retired and his work has been taken over by Vice-President T. E. Jarrard, who will be in charge of sales. Assisting him will be J. H. Newmark, who also continues in full charge of the advertising department. The 1916 season begins the company's twenty-third manufacturing year.

CARBON REMOVER
Camphor is composed of carbon, hydrogen and a small amount of oxygen. When subjected to great heat, as in the combustion chamber of an explosive engine, the hydrogen is set free and combines with other elements present to make new substances. In doing so it "burns up" the carbon deposits to a considerable extent, and thus helps to clean the combustion chambers of the motor. It is entirely harmless to the metal parts.

BEING PREPARED
One of the principal factors in doing good work is being properly prepared for the job. You cannot properly wash a car, clean a spark plug, or grind a valve without facilities for doing it properly. The repair shop that is imperfectly equipped for work will require considerable more time to accomplish any given task, and therefore will cost the customer more for his work.

EASIER TO TURN
For an engine of large size that is very hard to turn over, have the crank made three inches longer by welding in a piece.

BRUSH ADJUSTMENTS
When magneto or generator brushes need adjusting great care should be taken to avoid too violent contact. The springs should press the pieces of carbon very lightly but surely against the commutator surfaces.

Our Presentation!

OF THIS \$5.00

Illustrated Bible

Present Six Free Certificates

No book ever printed holds such a place in literature as the Bible. As an educational work it demands a place in every home. One need not hold religious beliefs to appreciate the educational and literary value of this great work. Even though one may have many others, this illustrated Bible is the one you will use, for it brings out in pictures the very points that have seemed obscure and throws a new light on them.

Read what the Editor of the

Ladies' Home Journal

SAYS ABOUT THIS GREAT WORK:

THE LADIES' HOME JOURNAL
The Curtis Publishing Co.
Philadelphia
Edited by Edward W. Bok

"Why I like this illustrated edition of the Bible is because everything about it has been well done and seems to have been done in the right spirit. The Book itself has been approached by the annotator with reserve and intelligence, and by its artists with sympathy and knowledge. It has not been made into a meaningless picture book. The pictures here serve a distinct purpose. They enrich the text, but they do more; they intelligently explain it, and many a hitherto obscure passage will assume to thousands a new meaning through these eye-teaching pictures. Popularizing the Bible is a risky experiment in the hands of many, but it has been made a splendid achievement in this case."

"EDWARD W. BOK."

USED CAR MARKET IS GOOD HERE, SAYS BRANCH HEAD

The Russell Motor Sales Company which has had its place of business with the Guarantee Garage, has rented the vacant lot at Fifth and Bush streets, also the adjoining building formerly occupied by McFadden's hardware store. Their cars will be displayed on the vacant lot during the day and run into the building at night. They expect to put in a complete auto repair shop in connection and will do general auto repairing and rebuilding. This company established its branch here about four months ago and has been doing a large business in used cars.

RICKENBACKER CASTS OFF JUNK AT LAST

Eddie Rickenbacker has shaken off the junk and has come back with a vengeance! The idol of all American racing fans has set a record for long distance racing speed in an American car that almost passes comprehension; 96.53 miles per hour for 500 miles was the speed that he averaged at Chicago when he drove a Maxwell into third money—the first American driver in the first American car to finish. Then came his whirlwind victory at Sioux City when he led the field from the start and again proved an easy winner at the speed of 74.7 miles per hour. It is a remarkable coincidence that he first jumped into fame during the 1914 season by winning this same classic and this victory was doubly sweet to him.

Omaha was next. Again Rickenbacker drove his Maxwell to first money in the 300-mile sweepstakes. On a fast mile and a quarter track he secured the lead and was never headed during the entire race, and once more broke all speed records of the previous season by averaging 91.07 miles per hour. These three victories for an American car and driver are even more remarkable because of the exceedingly fast foreign cars in competition, and all three races prove one thing—that American engineers have solved the problem of building cars that will compare favorably with European design in reliability, durability and speed.

These latest triumphs of Rickenbacker demonstrate that he is the premier American driver. He has always had the reputation of being one of the most daring pilots in the game and it has only been a question with him of finding a car that would stand up under the gruelling pace that he invariably sets. It looks as if this latest Maxwell racer has all that "Rick" desires and every racing enthusiast will doubly rejoice at his latest showing, which means that he has finally broken the hoodoo that has robbed him so often of the prize money when victory was all but won.

LINT IN GAS

It is well to remember that gasoline contains small particles of lint resulting from the straining at the refineries. This lint gradually accumulates in front of screened dirt excluders in the gasoline line from tank to carburetor, and insufficient feed of gasoline to the engine, often without completely stopping the flow, is the result. Gasoline always should be put through a chamois skin strainer.

In the Mining World

From the Los Angeles Financial News.

Mining pays better than any other business, according to government figures that are made the basis of a statement recently issued by Chester R. Lawrence, a Boston financier. He calls attention to the fact that mining profits lead all others, and that the major portion of railroad earnings come from hauling ore or some commodity connected with the mining industry. In his statement he says:

"The National Banker in a recent issue makes the unequivocal statement that the combined dividends paid by the gold and silver companies of the United States are greater than the combined dividends paid by all the banking institutions in the United States."

"That the combined dividends paid by the copper companies of the United States are greater than the combined dividends paid by all of the railroads in the United States and that 52 per cent of the freight hauled by these same railroads is either ore or some commodity connected with the mining and milling of ore."

"To this somewhat astounding and generally known fact Bradstreet's and Dun's commercial agencies supply the somewhat startling addenda that but 36 per cent of all the legitimate mining investments fall, as against 54 per cent in other commercial lines."

"Seventy-six mines of the United States have paid dividends in 1914 up to October 1 over \$75,000,000. During 1915, 1916, 1917 and 1918, 290 were lost in 'old' securities and about as much during the past two years, which was more than was ever lost in mining."

"More money had been lost through banks in the last five years than was lost in mining in the past fifteen years."

"Government figures show the following returns of capital invested:

Railroad	3 per cent
National banks	6 1/2 per cent
Insurance	11 per cent
Lumbering	14 per cent
Mining	18 1/2 per cent

Two milling plants having a combined ore treating capacity of nearly 300 tons constructed in the Tom Reed-Gold Road mining district, Arizona, within the next ninety days. Such, at least, is the present plans of the men who are behind the two enterprises. Both plants will be erected with the object of supplying a growing ore reduction need in one instance that obtaining at the United Eastern mine, and in the other the tonnage or custom ore which is accumulating in various sections of the camp. The present plan is to start work on the United Eastern mill within the next sixty days and to hasten it to completion as soon as may be, in order that a revenue may be obtained from the large body of high grade milling ore which is on hand and 600-foot levels in the mine, and which is continuous from a depth of 300 feet. The estimated value of the tonnage now in sight is from \$1,500,000 to \$2,000,000, and this is continually being augmented as the drifts on the vein are extended. The general average value of the ore opened west of the shaft on the 565-foot level is \$36.60 per ton across a breadth of 22 feet. During the last two weeks free gold in considerable quantity

has featured the work on the lower level, and whenever this occurs the general average grade of the ore is increased considerably.

In 1882 there was organized in Boston the Society of California Pioneers of those who were lured to this golden state when the discovery of yellow metal was made in 1848. Since its organization it has had 546 members enrolled, 73 members now remaining. Of these ten held the three hundredth luncheon in Boston June 24 and the twenty-fifth anniversary of the excursion which in 1880 took 200 members of the society to California. These ten members were Charles H. Allen of Lowell, George W. Wood of Farmington, N. H., Charles P. Darling of Providence, Timothy W. Sanford of Dorchester, Joshua H. Kilbourne of Waltham, Capt. John L. Manson of Dorchester, Capt. Alden H. Blake of Taunton, Rufus B. Tobey of Wollaston, Stephen W. Foster of Dorchester and the Rev. Mr. Merrill of Santa Fe, N. M., Capt. L. Manson, second vice-president, presided. He has sailed around Cape Horn 36 times since the first of his visits to California. Mr. Foster was secretary. He is 85 years old. The oldest member present was Mr. Sanford, who will be 88 in September, and the youngest was Mr. Kilbourne, aged 75. The oldest surviving member is Capt. John Weston of Wellesley.

What is a placer? is a question frequently asked. A placer is an unconsolidated deposit accumulated by mechanical processes, carrying one or more minerals in commercial quantities. All placers are secondary deposits—that is, the material of which they are composed was originally derived by erosion of bedrock. Although it is undoubtedly true that under certain conditions nuggets of placer gold have been enlarged through chemical precipitation, yet this action is a negligible quantity in placers. Placers may be derived from rock weathering without water sorting, but more commonly are the result of water transportation, sorting, and deposition. Many of the richest placers are those formed by the erosion of older placers and the reaccumulation of their gold.

Since January 1 fifteen copper companies have resumed or increased distributions to stockholders to the amount of about \$22,000,000 per annum. This number includes Granite Mining, Occochee and Ray, which recently resumed dividends after being off the list since last year. The \$3 extra by the Phelps-Dodge Company, an increase of 50 cents over the previous declared in December, 1913, is also included.

Belt Quicksilver Mining Company has been permitted by the State Corporation Commissioner to issue 200,000 shares to Thos. M. Buley in exchange for an option to purchase mining rights in La Libertad and Jack mine in Santa Luis Obispo county, and to sell 50,000 shares at 35 cents per share to net not less than 80 per cent of the selling price.

The largest hydraulic mine in the world is located four miles west of Weaverville, in Trinity county. This week it was visited by M. F. Orth, minister of commerce and labor in Russia, who desired to familiarize himself with the methods employed. Moving pictures exhibiting of the property caused the visit.

THE MARKETS

NEW YORK, July 14.—Thirteen cars Valencia, five cars lemons sold. The market is easier on Valencia, sizes 150s and larger; higher on 176s and smaller. Unchanged on lemons. Weather fair.

LOS ANGELES PRODUCE MARKET

Fancy Valencia oranges have been marked up to \$2.25, and the ordinary grade is being sold for \$2.75 a crate. Apples also took a tumble, and the new figures are \$1.75 for the White Astrachan variety, and \$1.10 for crab-apples. Bartlett pears and Satsuma plums also suffered as the result of the general price cutting, and were quoted at \$2.40 a packed box, and 75 cents to \$1.00 a lug, respectively. Currants are cleaned off the market, and but a few cherries can be purchased at this time.

Further reductions were noticed in the green vegetable list, cucumbers dropping to 35 and 40 cents a lug; bell peppers to 11 and 12 cents a pound, and tomatoes declining to \$1.00 a crate. New potatoes were off 5 cents, and sweet tubers were on the market at the low price of 5 and 5 1/2 cents a pound.

CURRENT PRICES

[The following market prices on poultry and eggs, fruits and vegetables are compiled daily for the Register, based on the quotations prevailing on the Los Angeles market exchange for the business day preceding. Every effort is made to keep these quotations accurate and down to the latest possible available figures.]

ORDER FOR NOTICE FOR HEARING OF PETITION FOR CONVEYANCE

In the Superior Court of the State of California, in and for the County of Orange.

In the Matter of the Estate of Edward R. Amerige, Deceased.

George H. Amerige, the executor of the last will and testament of Edward R. Amerige, deceased, having filed herein his verified petition praying for an order directing the executor of the last will and testament of Edward R. Amerige, deceased, to execute a conveyance of certain real estate:

It is hereby ordered, that the hearing of said petition be had at the Court House of Department One, of this Court, on the 6th day of August, 1915, and that notice thereof be published in the newspaper known as the "Santa Ana Daily Register," a newspaper published at Santa Ana, Orange County, California, once a week for four consecutive weeks before said time of hearing.

Dated this 5th day of July, 1915.

Z. B. WEST,
Judge of Superior Court.

S. M. DAVIS, Attorney for Executor,
Trust Building, Santa Ana, Cal.

NOTICE OF SALE UNDER DEED OF TRUST

Notice is hereby given that under and in accordance with the powers, terms and provisions of a certain Deed of Trust made and executed on the 4th day of June, 1914, by the Santa Ana Savings & Trust Company, a corporation, the party of the first part, as Trustee, to W. A. Zimmerman and C. E. Lamme, the parties of the second part, as Trustees with the right of survivorship, and Orange County Savings & Trust Company, a corporation, the party of the third part, as beneficiary, to secure the payment of two certain promissory notes made and executed by the said W. A. Zimmerman and C. E. Lamme, on the 4th day of June, 1914; said two promissory notes being made and executed by the said Consolidated Securities Company, a corporation, to Orange County Savings & Trust Company for the payment of the aggregate sum of \$10,000, one of said promissory notes being for the sum of \$7,000 and one thereof being for the sum of \$3,000 and each of said notes being payable two years after their date, together with interest at the rate of seven (7) per cent per annum, the said interest being by the terms of said notes payable semi-annually from date, to-wit: the 4th day of June, 1914, until paid; and should default be made in the payment of any installment of interest when due, then the whole sum of principal and interest shall become immediately due and payable at the option of the holder of said notes.

The said Deed of Trust provides that if default be made in the payment of any sum or installments of principal or interest when due, according to the terms of said promissory notes, then the owner and holder of said promissory notes may at its option declare the whole sum of the principal and interest of said promissory notes immediately due and payable, and which Deed of Trust was thereupon, on the 11th day of June, 1914, recorded in the office of the County Recorder of Los Angeles County, California; and the record thereof is hereby specifically referred to for further particulars.

And now, on account of default having been made in the payment of installments of interest, and the interest falling due on the 4th day of June, 1915, of said promissory notes not having been paid, and the holder of said promissory notes having exercised its option and declared the whole of the principal and interest of each of said promissory notes to be immediately due and payable, and on demand of Orange County Savings & Trust Company, party of the third part, and beneficiary in said Deed of Trust, that W. A. Zimmerman, one of the parties of the second part and surviving trustee in said Deed of Trust, shall sell the real property described in said Deed of Trust, or such parts thereof as shall be deemed necessary to sell in order to make payment of the principal and interest of said two promissory notes due and unpaid, and to effect the same, to comply the objects in said Deed of Trust set forth, the undersigned, W. A. Zimmerman, one of the parties of the second part and surviving trustee in said Deed of Trust, will sell, at public auction to the highest bidder for cash in United States gold coin, on Monday, the 22nd day of November, 1915, at three o'clock in the afternoon of that day, at the south entrance of the Court House in the city of Santa Ana, Orange County, California, the real property described in said Deed of Trust and hereinafter in this Notice described, or so much thereof as may be deemed necessary to sell, in order to pay the aforesaid amounts of principal and interest due on said promissory notes, and the expenses of said sale, and the expenses of said sale, in accordance with the terms and provisions of the said Deed of Trust.

The said real property being located and situated in the County of Los Angeles, State of California, and more particularly described as follows:

Lots Two (2), Three (3), Four (4), Five (5), Six (6), Seven (7), Eight (8), Nine (9), Ten (10), Eleven (11), Twelve (12), Thirteen (13), and Fifteen (15), in (Tract) Number 1574, as per map of said tract now on record in Book twenty (20), at page forty-four (44) of Maps, in the office of the County Recorder of Los Angeles County.

This notice is given by me, and the sale therein mentioned will be conducted by me, as surviving trustee in said Deed of Trust mentioned for the reason that C. E. Lamme, the other of the trustees therein mentioned, has since the 4th day of June, 1914, the date of said Deed of Trust, become deceased.

In Witness Whereof, the said W. A. Zimmerman, the surviving trustee, has hereunto set his hand the 8th day of July, 1915.

W. A. ZIMMERMAN,
Surviving Trustee.

The Kings and Queens of Europe pay from \$4000 to \$8000 for their Knight motor cars! But now, for the first time and as the result of huge production, you can get a Knight motored car for \$1225 f. o. b. Santa Ana!

The World's Lowest Priced Knight Motored Car!

THIS announces, without doubt, the greatest achievement in the history of the automobile business.

A Knight motored car for \$1225 f. o. b. Santa Ana.

The Knight is the automobile motor that revolutionized the entire motor car industry of Europe.

It is the motor that is used by practically all the leading European automobile manufacturers.

The Daimler of England, the Panhard of

France, the Mercedes of Germany, the Minerva of Belgium, all are equipped with the famous Knight motor.

And these are the motor cars that cost from \$4000 to \$8000 each!

Practically every titled family in Europe owns one or more Knight motored cars. The Knight motor is acknowledged to be the most highly developed automobile motor on the market.

This motor differs from other accepted types formerly and now in use. Ordinarily a motor improves with use for its

first few hundred miles only. In the Knight motor this improvement continues indefinitely; carbon, instead of being harmful, is beneficial; size for size, it has more power.

This Knight motor, instead of poppet valves, has noiseless sliding valves and no cams and no valve springs; nothing about the valves to wear and require grinding. All of which combines to make for silence.

It is the ideal automobile motor.

The Willys-Knight has the same advantage

ages and is just as efficient as those costly European Knight cars.

Yet it costs but \$1225 f. o. b. Santa Ana.

As we build more cars in a single week than most European manufacturers build in a whole year, we are able to utilize every modern manufacturing economy. That is why our price is so much less.

The Willys-Knight, in our opinion, has the least vibration and is the smoothest, quietest, and most economical car made. Arrange for demonstration at once.

Orders will be filled in rotation.

SPECIFICATIONS

40-horsepower Knight motor; cylinders cast en bloc, 4 1/2 x 4 1/2 in. stroke. High-tension magneto ignition.

Vacuum tank gasoline system. 114-inch wheelbase. Full floating rear axle.

Underslung rear springs. 34x4 in. tires; non-skids rear. Demountable rims; one extra.

Rain-vision, ventilating type windshield. Magnetic speedometer.

Electric starting and lighting system. Headlight dimmers. One-man mohair top.

Color: Royal blue with ivory striping; grey wheels; nickel and polished aluminum trimmings.

Completely Equipped

WOOD DUCK, ONCE PLENTIFUL, IS NOW NEARLY EXTINCT IN STATE

BY HAROLD C. BRYANT

Game Expert of California Fish and Game Commission

The wood duck is the most beautiful of all our ducks. Its only near competitor in this respect is a near relative, the mandarin duck of Asia. But even the brilliancy of coloration in this species is superseded by that of the wood duck.

Formerly the wood duck was to be found through the low country west of the sierras. At the present time it is but a rare local resident of the Sacramento and San Joaquin valleys and westward to the coast. It has always been rare in Southern California, where favorable conditions are lacking. A specimen taken at Ramona, San Diego county, furnishes the southernmost record. The wood duck frequents timber-bordered streams and fresh water swamps, especially in the oak belt. It can not be considered a distinctly migratory species, for in most instances it is permanently resident within the state. Occasionally a slight migration toward the north in April and to the south in October is noticeable.

The crest and bright coloration of the wood duck is so conspicuous that the bird is usually recognizable at sight. The pure white under parts and the crested head crossed by white stripes are striking characteristics in the male. The female, although lacking the bright coloration to be found

in the male, displays more metallic colors than do females of other species of ducks, and in addition is to be recognized by the white eyering which extends back of the eye as a white streak.

Wood ducks seldom stray far from the secluded wooded streams and sloughs which constitute their habitat. Occasionally one may be startled from the ground in an oak forest or from the limb of a tree overhanging a stream. But more often they are seen swimming in some secluded slow moving creek or river. This bird is one of the few ducks to select a hole in a tree for a nesting site. Usually the nest is built above the water and from fifteen to fifty feet above the ground. Quite often the nest itself, which is composed largely of debris from the cavity and lined with down, is placed several feet below the entrance to the hole. The hollow end of a broken off branch is frequently selected, as is also the deserted hole of a red-shafted nicker or other woodpecker. A large number of eggs, usually ten to fifteen, are laid. The wood duck returns to the same nesting site year after year. Unlike most ducks the male is usually to be found in the near vicinity of the nest and he apparently stands guard while the female is incubating. The young either tumble out of the nest, or, as some observers have asserted, are carried to the water one by one in the bill of the mother.

The wood duck is noted for the swiftness and grace of its flight. The bird is very much at home in a thick growth of trees and it flies about among the branches with apparent ease.

As a rule the wood duck feeds upon aquatic insects and plants found along the stream where it makes its home. But in addition, the bird often forages about the woods in search of other food. They have been seen feeding in corn and wheat fields and still more often on acorns. The stomachs of several examined have contained large quantities of acorns.

The flesh of the wood duck is said to be delicious, and for many years certain hunters preferred to hunt this duck to the exclusion of all others. Our only hope of making use of this bird as food lies in artificial propagation. The bird is readily domesticated and there is no good reason why it can not be raised in captivity and sold on the market. At present there is a brisk demand from breeders and pleasure parks for it.

Some of the early writers state that the wood duck was very common in California in their day. In many places in the state, as, for instance, in Marin and Sonoma counties, wood ducks were to be found in numbers previous to 1890. There have been no reports of the occurrence of this species in many of the same localities in recent years. Individuals are occasionally reported as having been seen along the Sacramento river and in the vicinity

of Gridley, Butte county; but further than this, and an occasional one reported by a collector or market hunter, the species is now almost unknown. During the season 1895 to 1896 there were sold on the markets of San Francisco and Los Angeles 440 wood ducks. During the season of 1910 and 1911 but six of these ducks were sold on the markets of San Francisco, and during the following winter not more than two or three.

It can be seen, therefore, that the wood duck, although formerly very abundant in California, is now nearly extinct. Most of the eastern states have protected this species for several years, and fortunately the federal migratory bird law now gives this duck total protection in this state. It is to be hoped that this legislation has come in time to save this most beautiful species.

HANDSOME DIVIDEND GIVEN BY CHANDLER

CLEVELAND, O., July 15.—The directors of the Chandler Motor Co. have declared a cash dividend of 7 1/2 per cent on the \$22,900 common stock in addition to the regular quarterly dividend of 1 3/4 per cent on the \$200,000 preferred. The 7 1/2 per cent on the common makes a total of 100 per cent on that issue since dividends were commenced by the Chandler concern just one year ago.

LONG COLE TOUR

C. P. Henderson, general sales manager of the Cole Motor Car Company, has just returned from a long tour through the East in which the Cole he drove covered 2000 miles. Mr. Henderson was accompanied by his family.

NEW APPERSON EIGHT A HANDSOME CAR

Waffle & West, who have the agency for the Apperson line of cars, expect their first shipment of 1916 models next week. They have booked several sales just on the printed specifications and they believe the car will be a big seller. Judging by the pictures of the Apperson Eight, it will rank with the best of them in graceful body lines.

The eight is made in seven-passenger touring and four-passenger roadster form, the latter being a new design with individual front seats and the rear one shaped like a horseshoe. This gives an unusually roomy body for a roadster and makes a very neat seating arrangement. In the rear is a large deck under which is luggage space sufficient for any ordinary purpose.

The touring body shows clean lines throughout and gives a low-hung appearance to the car. The fenders are gracefully curved and the hood rather long and unbroken until it meets the radiator, which is novel V-shaped design. The wheelbase is 128 inches.

RICKENBACKER'S \$5000 PRIZE COIN ATTACHED

OMAHA, Neb., July 15.—Eddie Rickenbacker will probably receive small benefit from the \$5000 first prize he won on the Omaha speedway on July 5. The entire amount was attached in a suit filed against him by Mrs. Vera Flynn Payne, of Elkhorn, Neb., who claims to have been injured by Rickenbacker three years ago, when his motor car ran into her carriage. At the time of the accident Mr. Payne brought suit against Rickenbacker and received \$3000, but the case of Mrs. Payne was never adjudicated. A restraining order was issued by the court preventing the payment of the prize money until the suit is settled.

WAGE INCREASE GIVEN OVERLAND WORKERS

Beginning today the 11,000 shop workers of the Willys-Overland company, Toledo, O., will receive a five per cent increase in hourly wages. It is estimated that this wage increase will total about \$525,000 more money for the men during the first year it will be in effect.

SPECIAL CHEVROLETS FOR TRACK RACING

The William Small company, Indianapolis, Ind., distributor for the Chevrolet car in Indiana, has received two specially constructed race cars from the Chevrolet factory that will be used in state fair dirt track races throughout the state this summer. William Brown, of Fort Wayne, Ind., will pilot one of the cars, and the other will be driven by William Doughty of Bluffton, Ind.

MOTORISTS TO KEEP FEET ON SOFT PEDAL IN GOOD OL' BALTIMORE

Terrapin Eaters Object Most Strenuously to All Excessive Racket

Motorists passing through Baltimore will have to be careful in the future and permit their machines to make no unnecessary noises. The police have started a crusade against motorists who cause the machines to be noisy in the neighborhood of hospitals. All hospital zones are marked with large signs and the police have been instructed to see that no unnecessary noises take place within these zones.

PITTSBURG PLANNING ON BIG SPEED TRAIL

PITTSBURG, Pa., July 15.—Pittsburg now is practically sure of having a speedway in the near future. Plans for this speedway are not, as yet, anywhere near completion, but they are far enough advanced to guarantee that the enterprise will be finished, and that at no very distant date. Exact location for the new speedway has not been decided upon, but the association is positive of two sites, advantageously located on macadamized roads, street car lines, and railroads. The railroads entering Pittsburg, especially those able to carry more than 10,000 people to and from the speedway in one day, are about to place before the board proposals for sites on their lines. Membership of the association will, for the present, be limited to 2000 and that number almost has been reached.

QUAKER CITY SPEED COURSE IS STARTED

PHILADELPHIA, July 15.—Work has been started on a motor speedway by the Philadelphia Motor Speedway association and steam shovels now are making the excavations for the \$2,000,000 plant that is situated 16 miles from this city, between the Old York road and the Reading railroad tracks, north of Willow Grove.

The track will be constructed of brick laid on a concrete surface. There will be concrete safety walls, hub high, on either side of the course. The curves will be easy but well banked to permit of high speed. The plans call for concrete grandstands seating 100,000 persons and parking spaces to accommodate 30,000 motor cars.

SEMAPHORE TO GUIDE TRAFFIC IN DAYTON

A traffic semaphore, designed by Safety Director James, of Dayton, O., has been installed on the corner of Main and Fourth streets. The semaphore has four arms, two painted green with the word "go" and two painted red with the word "stop." Director James expects to install the semaphore at every prominent crossing.
